In Re: The Narragansett Electric Company d/b/a National Grid's Application to Change Electric and Gas Base Distribution Rates)))))	Docket No. 4770
In Re: The Narragansett Electric Company d/b/a National Grid's Proposed Power Sector Transformation (PST) Vision and Implementation Plan)))))	Docket No. 4780

The Narragansett Electric Company d/b/a National Grid (the Company)¹ enters into this amended settlement agreement (the Settlement Agreement) with the Division of Public Utilities and Carriers (Division); the Office of Energy Resources (OER); the U.S. Department of the Navy and the Federal Executive Agencies (collectively, Navy/FEA); Conservation Law Foundation (CLF); Energy Consumers Alliance of New England, Inc. d/b/a People's Power and Light (PPL)²; Sierra Club (SC)³; Natural Resources Defense Council (NRDC)⁴; Acadia Center (Acadia); Northeast Clean Energy Council (NECEC); the George Wiley Center (GWC); New

⁴ NRDC intervened in Docket No. 4780 jointly with PPL and Sierra Club.

Energy Rhode Island (NERI); Wal-Mart Stores East, LP and Sam's East, Inc. (collectively, Wal-Mart); Direct Energy Business, LLC, Direct Energy Services, LLC, and Direct Energy Solar (collectively, Direct Energy)⁵; ChargePoint, Inc. (ChargePoint)⁶; and National Railroad Passenger Corporation (Amtrak)⁷ (collectively, the Settling Parties and, each individually, a Settling Party⁸), with regard to the Company's Application for Approval of a Change in Electric and Gas Base Distribution Rates Pursuant to R.I. Gen. Laws §§ 39-3-10 and 39-3-11 (the Application) and the Company's proposed Power Sector Transformation (PST) Vision and Implementation Plan (PST Plan). The Company submitted the Application and the PST Plan to the Rhode Island Public Utilities Commission (the PUC) on November 27, 2017.

Background:

The Company's Application to the PUC requested a change in base distribution rates to address a total Rate Year⁹ revenue deficiency of \$41,294,907 for Narragansett Electric and a total revenue deficiency of \$30,322,543 for Narragansett Gas. The Company's Application was filed to seek recovery of costs necessary for the safe and reliable operation of the Company's electric and gas distribution systems for the benefit of Rhode Island customers. On March 2, 2018, the Company revised its request to account for the impacts of the Tax Cuts and Jobs Act (the Tax Act), which reduced the federal corporate income tax rate from 35 percent to 21 percent. The March 2, 2018 revision reduced the Company's Rate Year revenue deficiency to \$27,434,395 for Narragansett Electric and \$18,408,489 for Narragansett Gas. This revision also

⁵ Direct Energy is an intervenor in Docket No. 4780 only.

⁶ ChargePoint is an intervenor in Docket No. 4780 only.

⁷ Amtrak is an intervenor in Docket No. 4770 only.

⁸ PPL, SC, and NRDC intervened jointly in Docket No. 4780 and together are considered a Settling Party with respect to that docket.

⁹ The Rate Year is the twelve-month period ending August 31, 2019.

included a \$6.7 million correction from a miscalculation of accumulated deferred taxes in the Company's filing that the Division identified. Subsequently, on May 9, 2018, the Company made a second revision to its request to account for additional impacts of the Tax Act and to address certain corrections identified during the course of discovery in Docket No. 4770, also including the acceptance of an adjustment that was recommended by the Division to the amortization of excess deferred income taxes. The May 9, 2018 revision reduced the Company's Rate Year revenue deficiency to \$18,877,761 for Narragansett Electric and \$15,451,041 for Narragansett Gas. Accordingly, after the Company's second revision to its revenue requirement, the Company's total requested revenue increase was \$34,328,802.

Additionally, concurrent with filing the Application, the Company filed its PST Plan to propose investments to further the State of Rhode Island's power sector transformation goals, as identified through the Docket No. 4600 proceedings and through the power sector transformation stakeholder process, which resulted in the Rhode Island Power Sector Transformation Phase One Report to Governor Gina M. Raimondo. The PST Plan included requests for limited Rate Year funding and a proposed funding mechanism for the Company's proposed power sector transformation investments. The PUC separated the PST Plan from the Application and created Docket No. 4780 to assess the PST Plan. After the PUC initiated Docket No. 4780, the Company revised its request related to the PST Plan and requested: (1) approval of \$2 million in Rate Year funding to conduct a planning process for the implementation of Advanced Metering Functionality (AMF); (2) approval of its proposed annual PST Plan process, whereby the Company would submit annual PST Plans for the PUC and Division to review and approve PST investments; (3) approval of the Company's proposed PST Provision, which provided for the

recovery of PST Plan costs on a fully reconciling basis; and (4) guidance from the PUC on the categories of proposed PST investments outlined in the Company's PST Plan filing.

The Settling Parties have filed testimony with the PUC, engaged in discovery and negotiations regarding the matters specified in the articles of this Settlement Agreement, and asserted competing and disputed claims with regard to certain issues contained in the Application and the PST Plan, including, but not limited to: (a) the magnitude of the proposed revenue deficiencies for Narragansett Electric and Narragansett Gas; (b) the scope and structure of the Company's proposed power sector transformation programs, such as AMF implementation, electric vehicle enablement, and grid modernization technology upgrades; (c) a multi-year rate plan; (d) the structure and role of performance incentive mechanisms; and (e) the appropriate cost recovery mechanisms.

The Settling Parties now wish to resolve the contested issues raised by (1) the Division, Navy/FEA, Wal-Mart, NERI, and Acadia in direct testimony and OER and GWC in written comments filed with the PUC on April 6, 2018 in Docket No. 4770; (2) Amtrak in its motion to intervene out of time filed with the PUC on June 1, 2018 in Docket No. 4770; (3) CLF jointly with PPL/SC/NRDC and CLF jointly with NRDC/PPL in direct testimony filed with the PUC on April 17, 2018 in Docket No. 4780; and (4) the Division, Navy/FEA, NERI, Acadia, Direct Energy, ChargePoint, and CLF jointly with NECEC in direct testimony and OER in written comments filed with the PUC on April 25, 2018 in Docket No. 4780, on mutually agreeable terms.

The Settling Parties believe that a settled resolution will reduce costs for Rhode Island customers through the elimination of resource-consuming litigation and achieve a just and reasonable result that takes into account the diverse views of all the Settling Parties.

Accordingly, in consideration of the exchange of promises herein contained, the Settling Parties hereby agree, subject to approval by the PUC, as follows:

ARTICLE I: INTRODUCTION

A. Procedural History

Docket No. 4770: At the outset of these proceedings, the PUC ordered that the Company's PST Plan be moved into Docket No. 4780 and be considered on a separate procedural schedule. Additionally, the PUC directed that it would not consider any settlement proposal until after the Division and intervenors submitted direct testimony setting forth their positions on the various elements of the Company's Application.

Since filing its Application on November 27, 2017, the Company has responded to 1,439 data requests issued by the PUC, the Division, the Navy/FEA, Wal-Mart, NERI, and Acadia. The Division and the intervenors also have responded to data requests issued by the Company and the PUC. On April 6, 2018, the following Division and Intervenor witnesses filed direct testimony in Docket No. 4770: Division Witnesses Tim Woolf (Policy), Michael Ballaban jointly with David J. Effron (Revenue Requirement), Tina Bennett jointly with Alan Neale (Gas Business Enablement), Gregory Booth (Grid Modernization), Matthew Kahal (Cost of Capital and Return on Equity), Tim Woolf jointly with Melissa Whited (Additional Cost of Capital Considerations and Benefit Cost Analysis), Roxie McCullar (Depreciation), Roger Colton (Low Income Discount and Income Eligible Proposals), John Athas (Electric Allocated Cost of Service and Rate Design), and Bruce Oliver (Gas Allocated Cost of Service and Rate Design), raising issues relating to the calculation of the proposed revenue requirement, the computation of allowable uncollectible expense, the cost of capital, and other ratemaking issues including, but not limited to, cost allocation, rate design, the appropriate structure and role of performance

incentive mechanisms, and the appropriate cost recovery mechanisms for grid modernization investments.

- Navy/FEA Witness Ali Al-Jabir, raising issues relating to rate design and revenue allocation;
- Wal-Mart Witness Gregory W. Tillman, raising issues relating to revenue allocation, rate design, and return on equity – as well as the impact of the Tax Act;
- NERI Witness Karl Rabago, raising issues relating to the Company’s proposed revenue requirement, return on equity, rate design, forecasting, revenue allocation, and the streetlighting tariff; and
- Acadia Witness Mark LeBel, raising issues relating to rate design and return on equity.

The following parties also intervened in Docket No. 4770 and filed written comment:

- OER in relation to the alignment of the Company’s proposals with the State of Rhode Island’s overall policy goals for the future of the power sector; and
- GWC in relation to the Company’s low income discount rate design proposals.

CLF, NECEC, PPL, and Amtrak intervened in Docket No. 4770, but did not file direct testimony or written comment.

On May 9, 2018, the Company filed rebuttal testimony responding to the issues contested by the Division and the intervenor witnesses. Specifically, the Company filed the rebuttal testimony of Company Witnesses Robert E. Hevert (return on equity and capital structure); Ned Allis (depreciation); Joseph F. Gredder (electric forecasting); Theodore E. Poe, Jr. (gas forecasting); John Gilbert, Daniel J. DeMauro, and Mukund Ravipaty (information systems); Anthony Johnston and Christopher J. Connolly (Gas Business Enablement); Raymond J. Rosario, Jr., Alfred Amaral, III, and Ryan M. Constable (operational expense); Maureen Heaphy

(human resources); Melissa Little (revenue requirement); Howard S. Gorman (electric allocated cost of service study, revenue allocation, and rate design); Paul M. Normand (gas allocated cost of service study, revenue allocation, and rate design); Ann E. Leary and Scott McCabe (gas and electric pricing, respectively); Kayte O'Neill (PST policy); Rob Sheridan (grid modernization); John Leana (AMF); and Meghan McGuinness and Timothy R. Roughan (performance incentive mechanisms). These witnesses responded to the positions of the Division and intervenor witnesses on each of the identified issues.

To date, the PUC has held 13 open meetings on December 20, 2017, January 3, January 19, February 2, March 5, April 13, April 16, April 17, April 23, May 15, May 16, June 7, and June 19, 2018, at which the PUC analyzed the Company's Application and the respective positions of the Company, the Division, and the intervenors.

Docket No. 4780: Since the initial filing of its Application and the PST Plan on November 27, 2017, and, after the PUC initiated Docket No. 4780 for separate consideration of the PST Plan, the Company has responded to 469 data requests issued by the PUC, the Division, the Navy/FEA, PPL/SC/NRDC, NERI, and NECEC. On April 17, 2018 and/or April 25, 2018, the following Division and Intervenor witnesses filed direct testimony in Docket No. 4780:

- Division Witnesses Gregory Booth, raising issues relating to the Company's proposed grid modernization investments, and Tim Woolf jointly with Melissa Whited, raising issues related to: (a) multi-year rate plans, (b) performance incentive mechanisms, (c) the Company's electric vehicle proposals, (d) the Company's electric heat proposals, (e) the Company's electric storage initiative, (f) the Company's proposal for Company-owned solar generation, (g) AMF, and (h) the Company's benefit-cost analyses;

- Navy/FEA Witness Ali Al-Jabir, raising issues relating to: (a) cost recovery mechanisms for PST proposals; (b) cost allocation and rate design; and (c) performance incentive mechanisms;
- CLF jointly with PPL/SC/NRDC Witness Douglas B. Jester, raising issues relating to AMF and the Company's electric vehicle proposals;
- CLF jointly with PPL/NRDC Witness Benjamin A. Stafford, raising issues relating to the Company's electric heat proposals;
- NERI Witness Karl Rabago, raising issues relating to: (a) overall PST policy and vision; (b) cost recovery mechanisms for PST investments; (c) performance incentive mechanisms; and (d) benefit cost analyses;
- NECEC and CLF Witness Nathan Phelps, raising issues relating to: (a) the Company's proposed grid modernization investments; (b) AMF; (c) the Company's electric storage initiative; (d) the Company's proposal for Company-owned solar generation; and (e) the Company's proposed Income Eligible Customer Rewards Program;
- NECEC and CLF Witness Ronald J. Binz, raising issues relating to performance-based regulation, performance incentive mechanisms, and recovery of PST-related costs;
- Direct Energy Witness Frank Lacey, raising issues relating to: (a) the Company's proposed grid modernization investments; (b) AMF; (c) time-varying rates and (d) the Company's electric vehicle proposals;

- Acadia Witness Mark LeBel, raising issues relating to: (a) performance incentive mechanisms; (b) AMF; (c) the Company's electric vehicle proposals, and (d) the Company's electric heat proposals; and
- ChargePoint Witness David Packard, raising issues relating to the Company's electric vehicle proposals.

OER also intervened in Docket No. 4780 and filed written comment raising issues relating to: (a) performance incentive mechanisms; (b) the Company's proposed grid modernization investments; (c) AMF; (d) the Company's electric vehicle proposals; (e) the Company's electric heat proposals; (f) the Company's electric storage initiative; (g) the Company's proposal for Company-owned solar generation; and (h) cost recovery mechanisms for PST proposals. The GWC also intervened in Docket No. 4780 but did not file direct testimony or written comment.

In addition to the pre-filed written testimony and the responses to data requests that have been filed in Docket No. 4780, the PUC also held technical sessions on the various elements of the Company's PST Plan. Specifically, on January 26, 2018, the PUC held a technical session on the Company's proposed grid modernization investments and cost recovery mechanisms. On January 31, 2018, the PUC held a technical session on the Company's proposed performance incentive mechanisms. On February 8, 2018, the PUC held a technical session on the Company's AMF proposal. On February 20, 2018, the PUC held two technical sessions: one on the Company's electric vehicle proposals, and another on the Company's electric heat proposals. On February 21, 2018, the PUC held two more technical sessions: one on the Company's electric storage initiative, and another on the Company's proposal for Company-owned solar generation.

The Settling Parties have conducted ongoing settlement discussions. The Company and the Division have conducted bilateral negotiations on the various proposals in the Application and the PST Plan. Additionally, the Company has held additional bilateral negotiations with certain other intervening parties to address specific areas of interest and concern to those parties. To supplement those bilateral negotiations and ensure that the positions of all the Settling Parties received appropriate attention and consideration, the Division and the Company arranged for several face-to-face meetings at which all intervenors had an opportunity to raise and advocate for the issues that were of principal concern to them and to negotiate the substance of this Settlement Agreement. Ultimately, the Company and the Division drafted the Settlement Agreement to include all the issues and matters raised by all the Settling Parties during these negotiations. After the Company and the Division completed drafting the Settlement Agreement, they shared the draft with all the intervenors and provided them an opportunity for further comments and revision. This Settlement Agreement, therefore, is the product of a collaborative, inclusive, and comprehensive process that fairly considered the interests of all parties and stakeholders.

The Settlement Agreement was initially filed with the PUC on June 6, 2018. The PUC commenced the hearing on the Settlement Agreement on June 12, 2018; held 11 days of settlement hearings on June 14, June 15, June 18 through June 22, June 25 through June 28, 2018; and concluded the hearing on July 18, 2018. The PUC subsequently held a series of open meetings on July 2, July 3, July 18, July 20, and July 31 to discuss the Settlement Agreement and the testimony from the settlement hearings. On August 3, 2018, the PUC held an open meeting at which the PUC approved the Settlement Agreement filed on June 6, 2018 with modifications.

Following the PUC's open meeting decision, the Settling Parties convened to review and discuss the PUC's modifications, which have been incorporated into this Settlement Agreement.

B. Settling Parties' Statement

This Settlement Agreement is based on extensive discovery and negotiations among the Settling Parties concerning all issues involved in: (1) establishing new base distribution rates for the Company's electric and gas operations to become effective September 1, 2018; and (2) making investments in new programs and initiatives to facilitate power sector transformation. The Settling Parties agree that the outcome of this Settlement Agreement is just and reasonable and in the public interest.

C. Scope

The Settlement Agreement addresses the full scope of all issues presented in and resolves all issues contested among the Settling Parties in both Docket No. 4770 and Docket No. 4780 and establishes base distribution rates for the Company's electric and gas residential, commercial and industrial (C&I), and outdoor lighting customers in Rhode Island.

ARTICLE II: TERMS OF SETTLEMENT

A. Multi-Year Rate Plan Overall Framework

As a result of the collaborative and inclusive settlement negotiations among the Settling Parties in addition to bilateral negotiations between the Company and the Division on the various proposals in the Application and the PST Plan, the Settling Parties have developed a comprehensive set of terms and conditions for a three-year rate plan for Narragansett Electric and Narragansett Gas. The terms and conditions of this rate plan are set forth below and in the Attachments to this Settlement Agreement. Specifically, this Settlement Agreement addresses the following topics:

1. Effective Date and Term;
2. Changes in Revenue Requirements for Three Rate Years;
3. Base Distribution Rate Changes for Rate Year 2 and Rate Year 3;
4. Narragansett Electric - Revenue Requirement;
5. Narragansett Electric - Revenue Allocation, Rate Design, and Tariffs;
6. Narragansett Electric - Earnings Report and Earnings Sharing Mechanism;
7. Narragansett Electric - Other Tariffs and Reconciling Mechanisms;
8. Narragansett Gas - Revenue Requirement;
9. Narragansett Gas - Revenue Allocation, Rate Design, and Tariff;
10. Narragansett Gas - Earnings Report and Earnings Sharing Mechanism;
11. Narragansett Gas - Other Tariffs and Reconciling Mechanisms;
12. Gas Business Enablement Program;
13. Cyber Security and Information Services (IS) Technology Modernization Programs;
14. Commencement of Investments to Enable a Modern Grid;
15. Grid Modernization Plan (GMP);
16. AMF;
17. Clean Energy Programs;
18. Capital Efficiency Mechanism for Narragansett Electric;
19. Performance-Based Incentive Mechanisms;
20. Tracking and Deferral of Certain “Special Sector” Program Costs and Revenues;
21. Next Rate Case Filing;
22. Additional Provisions; and
23. Other Provisions.

B. Definitions

“**Docket 4600 Guidance Document**” means the PUC’s Guidance on Goals, Principles and Values for Matters Involving The Narragansett Electric Company d/b/a National Grid adopted on October 27, 2017 in Docket No. 4600-A.

“**Effective Date**” means September 1, 2018, or such other date as the PUC may determine.

“**ISR**” means the infrastructure, reliability, and safety planning and cost recovery process governed by Section 39-1-27.7.1(c), (d) of Rhode Island General Laws.

“**Rate Year 1**,” sometimes referred to herein as “RY1,” means September 1, 2018 through August 31, 2019.

“**Rate Year 2**,” sometimes referred to herein as “RY2,” means September 1, 2019 through August 31, 2020.

“**Rate Year 3**,” sometimes referred to herein as “RY3,” means September 1, 2020 through August 31, 2021.

The three rate years are referred to herein collectively as “Rate Years,” or “RYs,” and individually as a “Rate Year,” or “RY.”

“**Test Year**,” means July 1, 2016 through June 30, 2017.

C. Rate Plan

1. Effective Date and Term

The term of the Company’s electric and gas rate plan is three years, beginning September 1, 2018 and continuing through August 31, 2021 (Rate Plan or MRP). For administrative reasons, certain targets and mechanisms are on different twelve-month schedules (*e.g.*, calendar year (CY) periods), as provided herein. In addition, unless specifically noted in this Settlement

Agreement, all terms of this Settlement Agreement will continue in effect until changed by the PUC.

2. Changes in Revenue Requirements for Three Rate Years

This Settlement Agreement provides for the following changes in base distribution rate annual revenue requirements for Narragansett Electric and Narragansett Gas for each of the Rate Years of the Rate Plan (*i.e.*, Rate Year 1, Rate Year 2, and Rate Year 3) to provide funding for the Company's electric and gas operations and PST Plan initiatives, including: Updated AMF Business Case (as defined in Section 16 below); GIS Investments; System Data Portal; DSCADA; other Grid Modernization investments; Electric Transportation; and Electric Storage.

	<u>Narragansett Electric (\$M)</u>	<u>Narragansett Gas (\$M)</u>	<u>Total (\$M)</u>
<u>Base Case</u>			
Rate Year 1	\$12.0	\$5.8	\$17.8
Rate Year 2	\$3.9	\$5.7	\$9.6
Rate Year 3	<u>\$2.5</u>	<u>\$3.4</u>	<u>\$5.9</u>
Subtotal – Base Case	\$18.4	\$14.9	\$33.3
<u>Power Sector Transformation</u>			
Rate Year 1	\$2.1	\$0.0	\$2.1
Rate Year 2	\$6.6	\$1.9	\$8.4
Rate Year 3	<u>\$1.9</u>	<u>\$0.6</u>	<u>\$2.5</u>
Subtotal – PST	\$10.6	\$2.5	\$13.0
<u>Base Case plus PST</u>			
Rate Year 1	\$14.1	\$5.8	\$19.9
Rate Year 2	\$10.5	\$7.6	\$18.0
Rate Year 3	<u>\$4.3</u>	<u>\$4.0</u>	<u>\$8.4</u>
TOTAL	<u>\$28.9</u>	<u>\$17.4</u>	<u>\$46.3</u>

A summary of the revenue requirement settlement terms is provided in Attachment 1, Page 1. The base case components of the base distribution revenue requirements for Narragansett Electric and Narragansett Gas are set forth in Attachment 2, Schedules 1-ELEC and

2-GAS, respectively. The PST Plan components of the base distribution revenue requirements for Narragansett Electric and Narragansett Gas are set forth in Attachment 4 and Attachment 5.

To reach a settlement in these proceedings, the Company accepted the majority of the downward adjustments to operating expenses and rate base that were recommended by the Division, as outlined in the table below.

	Rate Year (\$M)		
	1	2	3
<u>Company Base Rate Request</u>			
<i>March 2, 2018 (REV-1) Base Rate Request</i>	\$45.8		
Refund of Excess Deferred Taxes	(\$9.0)		
A&G Expense Reclassification to Capital	<u>(\$4.5)</u>		
<i>March 2, 2018 (REV-1) Base Rate Request adjusted</i>	\$32.4 ¹⁰		
<u>Settlement Adjustments</u>			
Subtotal - Expense Adjustments	(\$14.3)		
Subtotal - Rate Base Adjustments	(\$3.1)		
Adjustment to Revenue Requirement for Rate Base Adjustments	<u>(\$0.3)</u>		
<i>Total Adjustments</i>	<u>(\$14.6)</u>		
<i>Subtotal - Adjusted Base Rate Request</i>	\$17.8	\$9.6	\$5.9
<u>PST Additions</u>			
<i>PST Adjustments</i>	<u>\$2.1</u>	<u>\$8.4</u>	<u>\$2.6</u>
Total Settlement - Base Case plus PST	\$19.9	\$18.0	\$8.5

As detailed in Attachment 2, for Rate Year 1, the revenue requirements are based on the following parameters and adjustments:

- a. A return on equity (ROE) of 9.275 percent;
- b. A capital structure recommended by the Division and overall cost of capital, including a 51 percent common equity ratio. The resulting weighted average cost of capital (WACC) is applicable to the calculation of the revenue requirements associated with the

¹⁰ As described in Section 4.h. (Narragansett Electric) and Section 8.h. (Narragansett Gas), the Company will include all other revenue requirement adjustments either (1) identified during discovery, (2) in the preparation of the May 9, 2018 rebuttal cost of service, and (3) resulting from changes presented in the rebuttal testimony in its compliance filing revenue requirement in this docket. These adjustments account for the difference between the Company's adjusted March 2, 2018 request of \$32.4 million and the request of \$34.3 million submitted with the Company's rebuttal filing on May 9, 2018.

ISR Plans and any other reconciling mechanism that calculates a return based on the approved WACC, which is the same as it is today;

c. A reduction in depreciation expense of \$3.1 million. The Company's depreciation rates for Narragansett Electric and Narragansett Gas have been reduced and are set forth in Attachment 2, respectively;

d. The impacts of the tax rate change to 21 percent and the amortization of excess accumulated deferred income taxes (ADIT);

e. A reduction to Administrative and General expense to reflect a reclassification to capital;

f. An adjustment to labor expense to reflect a smooth hiring pattern over the term of the Rate Plan for all incremental full time equivalents (FTEs) that were included in the Company's November 27, 2017 initial filing but have not yet been filled, as shown on Attachment 2, Schedule 12 and Attachment 3, Workpaper 4;

g. An adjustment to the calculation of the average of net write-offs as a percentage of total revenues for the five years ended June 30, 2017 for Narragansett Gas to eliminate the twelve-month period ended June 30, 2013 from this calculation. The average write-off rate is applied to the Rate Year 1 revenue to calculate the pro forma Rate Year 1 uncollectible accounts expense. This adjustment reduces the average Narragansett Gas write-off rate from 2.08 percent to 1.91 percent;

h. An adjustment to reflect the Division's position on Gas Growth capital;

i. Adjustments to reflect the Division's position on Gas Business Enablement and the IS Technology Modernization Programs (see Sections 12 and 13 below);

j. Existing reconciling mechanisms for costs recovered outside of base

distribution rates remain in effect as operating today, as listed in Attachment 22; and

k. Adjustment to Service Company rents and Gas Business Enablement for reduced ROE at 9.275 percent; and

l. Adjustment for the depreciation expense impact of the growth adjustment.

3. Base Distribution Rate Changes for Rate Year 2 and Rate Year 3

Under the Rate Plan governed by this Settlement Agreement, base distribution rates for Narragansett Electric and Narragansett Gas shall change annually at the start of each Rate Year, effective September 1, 2018, September 1, 2019, and September 1, 2020. The annual increase in base distribution rates shall be allocated to each of Narragansett Electric's and Narragansett Gas's respective rate classes in the same proportion as determined from the final revenue allocation of the revenue requirements for Rate Year 1. The allocation of the increases to rate classes is presented in Attachment 8 for Narragansett Electric and Attachment 16 for Narragansett Gas, and base distribution rates based upon each rate class's Rate Year revenue requirement for Rate Year 2 and Rate Year 3 is contained in Attachment 9 for Narragansett Electric and Attachment 16 for Narragansett Gas.

- a. The development of each Rate Year's base distribution rates consistent with the Rate Plan governed by this Settlement Agreement is incorporated in this Settlement Agreement, and through the PUC's approval of this Settlement Agreement, the base distribution rates for the Rate Years are approved for implementation, subject to any changes pursuant to Sections 8, 15, and/or 16;
- b. Bill impacts for all rate classes comparing the rates in effect at the time of the Company's initial filing and Rate Year 1; Rate Year 1 and Rate Year 2; and Rate

Year 2 and Rate Year 3, are presented in Attachment 10 and Attachment 17 for Narragansett Electric and Narragansett Gas, respectively; and

- c. The PUC's approval of the base distribution rates contained in this Settlement Agreement represents its determination that the proposed base distribution rates are reasonable and consistent with the MRP.

On or before June 1 of each year of the Rate Plan, Narragansett Electric shall submit to the PUC its Summary of Retail Delivery Rates tariff updating this tariff to reflect the base distribution rates approved by the PUC as part of this Settlement Agreement, together with testimony and supporting schedules explaining and itemizing the change in revenue requirement from the prior September 1 through the upcoming September 1, unless otherwise changed pursuant to a separate proceeding before the PUC consistent with Sections 8, 15, and/or 16.

The rate schedule provisions of Narragansett Gas's tariff contained in Attachment 19 include the base distribution rates for each of the Rate Years.

4. Narragansett Electric - Revenue Requirement

a. *Revenue Requirements for the Rate Years.* This Settlement Agreement provides that the base distribution rates for Narragansett Electric shall be set in these proceedings based on a Rate Year 1 revenue requirement increase of \$14.1 million, a Rate Year 2 revenue requirement increase of \$10.4 million, and a Rate Year 3 revenue requirement increase of \$4.4 million, using a test-year ended June 30, 2017 (Test Year), as detailed in Attachment 1 to this Settlement Agreement.¹¹ The resulting revenue requirements for the Rate Years are: \$293.2 million for RY1, \$303.5 million for RY2, and \$308.0 million for RY3. The base case revenue requirement for Rate Year 1 was determined using a total rate base of \$729.5 million; pro forma

¹¹ Schedule A to this Settlement Agreement lists the attachments supporting this Settlement Agreement. Schedule A also provides a cross-reference to the bound volume that contains each respective attachment.

Test Year operating revenues of \$279.2 million; distribution operating expenses of \$150.6 million; income taxes of \$1.1 million; and an overall rate of return of 6.97 percent. The base case revenue requirement for Rate Year 1 established by the Settling Parties allows for recovery of a revenue deficiency of \$12.0 million in Rate Year 1, which represents a reduction of \$29.3 million from the November 27, 2017 original request and a reduction of \$6.9 million from the May 9, 2018 second revision to the cost of service.

b. *Calculation of Rate Base.* The Settling Parties agree that rate base for Narragansett Electric for the Rate Years shall be calculated to include capital additions approved in the ISR Plans for Fiscal Year 2014 (Docket No. 4382), Fiscal Year 2015 (Docket No. 4473), Fiscal Year 2016 (Docket No. 4539), Fiscal Year 2017 (Docket No. 4592), and estimated Fiscal Year 2018 (Docket No. 4682), estimated Fiscal Year 2019, and estimated Fiscal Year 2020 additions through Rate Year 1 (*i.e.*, August 31, 2019). Narragansett Electric's rate base for the Rate Years also shall be calculated to include non-ISR capital additions through August 31, 2021.¹² Narragansett Electric's rate base for the Rate Years also shall reflect the unamortized cost of long-term debt issuance expense. ISR-eligible capital additions for Rate Year 2 and Rate Year 3 will be addressed in the ordinary course outside of base distribution rates through the ISR Plan and included for recovery in future ISR Plans.

c. *Other Adjustments.* The revenue requirements contained in Attachment 2 reflect adjustments agreed to by the Settling Parties associated with the Tax Cuts and Jobs Act, a change in the Company's A&G capitalization policy, and estimated Service Company excess deferred federal income taxes.

¹² Capital additions currently recovered through the ISR Plan will be included in rate base as of September 1, 2018, concurrent with the effective date of new base distribution rates in these proceedings. Therefore, the capital-related portion of the ISR factor will be set to zero as of September 1, 2018.

d. *Operating Expenses.*

i. Uncollectible Accounts Expense

The Settling Parties agree that the recovery of distribution-related uncollectible-accounts expense¹³ shall be calculated using Narragansett Electric's actual five-year average ratio of actual distribution net write-offs as a percentage of distribution revenues (as calculated in Docket No. 4323 and Docket No. 4065) ending with the Test Year, or 1.30 percent. The actual, five-year average write-off rate of 1.30 percent shall also be used to calculate recovery of the uncollectible accounts expense allowance in those reconciling mechanisms that provide for the recovery of uncollectible account expense.

ii. Non-Deferrable Storm Expense

This Settlement Agreement provides that the amount of non-deferrable storm expense allowed for recovery through base distribution rates shall be set at \$3,193,756¹⁴ annually, subject to the following: If the actual level of non-deferrable storm expense in any calendar year commencing in 2019 is greater than \$5,193,756, then the amount in excess of \$5,193,756 shall be charged to the Storm Contingency Fund (the Storm Fund). If the actual level of non-deferrable storm expense in any calendar year commencing in 2019 is less than \$1,193,756, then the amount by which \$1,193,756 exceeds the actual non-deferrable storm expense in that calendar year shall be credited to the Storm Fund. Because new base distribution rates go into effect on September 1, 2018, the dead band for 2018 shall be applied to the average of

¹³ This amount does not include the commodity-related portion of uncollectible accounts expense, which is recovered through various reconciling mechanisms as governed by their respective tariff provisions (see Pre-Filed Direct Testimony of Company Witness Melissa A. Little at Page 47 (Bates Page 51 of Book 8). The calculation of uncollectible account expense is provided in Schedule MAL-22 (Rev-2) (Rebuttal Book 3).

¹⁴ Represents the five-year average of non-deferrable storm expense for the twelve month periods ended June 30, 2013 to June 30, 2017 (see Schedule MAL-31 (Rev-2) at Page 7, Line 13, Column (e)).

\$3,722,000¹⁵ for 8/12th of the year and \$3,193,756 for 4/12th of the year, or \$3,545,919.

iii. Storm Contingency Fund

As further described on Attachment 23, the Storm Contingency Fund is subject to the provisions of the Joint Proposal and Settlement between the Company and the Division filed with the PUC on September 25, 2017 in Docket No. 4686 and approved by the PUC on April 27, 2018 (Docket No. 4686 Settlement Agreement).

The total base distribution rate contributions to Narragansett Electric's Storm Fund effective September 1, 2018 will be \$7.3 million annually, which includes:

- (1) \$4.3 million in annual base distribution rate contributions; and
- (2) \$3.0 million of supplemental Hurricane Sandy base distribution rate contributions through their currently scheduled expiration in March 2021. Thereafter, the continuation of this supplemental \$3.0 million annual Storm Fund contribution will be subject to PUC review.

In addition, a contribution of \$21.1 million annually is credited to the Storm Fund from the Storm Fund Replenishment Factor through its currently scheduled expiration in June 2021.

e. *Return on Rate Base*

i. Capital Structure

The Settling Parties agree that the revenue requirement established by this Settlement Agreement for Narragansett Electric shall be determined by the WACC and its components, as shown in Attachment 2.

¹⁵ The amount of non-deferrable storm expense allowed for recovery through base distribution rates for Narragansett Electric was set at \$3,722,000 in Docket No. 4323, representing the five-year average of non-deferrable storm costs for calendar years 2007 to the 2011 test year in Docket No. 4323. As approved in Docket No. 4323, a \$2,000,000 dead band was established, which would trigger additional charges to the Storm Fund for non-deferrable storm costs in excess of \$5,722,000 in a calendar year, or credits to the Storm Fund for non-deferrable storm costs less than \$1,722,000. See Docket No. 4686 Settlement Agreement, Paragraph (9), at 3.

The actual capital structure shall be adjusted further to include the long-term debt issued on July 27, 2018 pursuant to the separate Settlement Agreement entered into between the Division and the Company dated February 15, 2017, in Division Docket D-17-36, which was approved as set forth in the Division's Report and Order issued February 19, 2017, and as set forth in the statement of basic terms that the Company filed with the Division on August 1, 2018.

ii. Cost of Long-Term Debt

As stated above, the new long-term debt shall be pro-formed at an interest rate of 3.919 percent and debt expense estimated at 0.46 percent, or \$1.61 million. Upon completion of the long-term debt issuance, the revenue requirement established by the Settlement Agreement shall be adjusted to use the actual weighted cost of long-term debt and debt expense after the new debt issuance. The Company shall make a filing to the PUC within 60 days of the completion of the long-term debt issuance to adjust base distribution rates for Narragansett Electric to incorporate the actual debt rate and issuance costs in base distribution rates.

iii. Return on Common Equity

The Settling Parties agree that the return on common equity shall be set at 9.275 percent.

iv. Weighted Average Cost of Capital

The computation of the WACC established by this Settlement Agreement is set forth in Attachment 2. The weighted average cost of capital set forth in Attachment 2, as adjusted pursuant to Section 4(e), above, shall be used for ratemaking purposes, including in the ISR Plan, until the next base distribution rate proceeding for Narragansett Electric.

f. *Miscellaneous Corrections.* The Settling Parties agree that Narragansett Electric shall make all corrections (1) identified during discovery, (2) in the preparation of the May 9, 2018 rebuttal cost of service, and (3) resulting from changes presented in the rebuttal

testimony of Company Witness Melissa A. Little in finalizing the cost of service for Narragansett Electric.

5. Narragansett Electric - Revenue Allocation, Rate Design, and Tariffs

a. *Allocated Cost of Service.* The Settling Parties agree, for the purpose of settlement in these proceedings (except with respect to the customer charge as reflected in this Settlement Agreement), to use the allocated cost of service study (ACOSS) included in Attachment 6, consistent with the ACOSS filed by Narragansett Electric on May 9, 2018.¹⁶ In future rate cases, the Company shall include all costs associated with the PST programs and investments in its revenue requirements and ACOSS.

b. *Revenue Allocation and Rate Design.* The Settling Parties agree that Narragansett Electric's revenue allocation contained in Attachment 8, prepared consistent with the Updated Revenue Allocation (Schedule HSG-3(R)) filed with the PUC on May 9, 2018, and which shall be incorporated into the design of base distribution rates, shall include:

i. A reduction to present revenue for Rate X-01 of \$322,000, which is a reduction from Rate X-01 present revenue of \$692,000 (shown on Line 40 in Attachment 8, Page 2) to \$370,000 to address the concerns raised by Amtrak in these proceedings regarding the significant difference between Rate X-01 revenue at present rates and Rate X-01's allocated rate year revenue requirement. This represents a reduction that balances a significant benefit to Amtrak with the impact this reduction will have on other customers. In addition, the Company will commit, on a going forward basis, to (1) in future general rate cases, propose other changes to address any remaining difference between Rate X-01 revenue at then-present rates and Rate X-01's allocated rate year revenue requirement resulting from an ACOSS filed in those general

¹⁶ See Rebuttal Testimony of Company Witness Howard S. Gorman, at Page 5 (Bates Page 7 of Rebuttal Book 6), and Schedule HSG-1A(R), at Bates Page 37 of Rebuttal Book 6.

rate cases, and will specifically propose to address any difference, to the extent the ACROSS identifies a significant difference in relation to differences identified for the Company's other rate classes, and (2) inform Amtrak of its next general rate case filing for Narragansett Electric reasonably in advance of such filing.

ii. The allocation of the annual base distribution rate allowance of the revenue requirements associated with Grid Modernization programs and Special Sector Programs, as described in Sections 15 and 20, respectively, and the Rate Year 2 and Rate Year 3 annual base distribution rate increases as stated above in Section 4.

The Settling Parties agree with Narragansett Electric's rate design included in Attachment 9, which reflects:

i. The Rate A-16/Rate A-60 rate design reflects a monthly customer charge of \$6.00 and a base distribution per-kWh rate sufficient to recover the remaining Rate A-16/Rate A-60 revenue requirement after consideration of the \$6.00 customer charge.

ii. The Rate A-60 customer charge shall be phased-in over the term of the Rate Plan as proposed by the Company in its initial filing as follows: a customer charge of \$2.00 effective September 1, 2018; a customer charge of \$4.00 effective September 1, 2019; and a customer charge of \$6.00 effective September 1, 2020.

iii. The Rate C-06 rate design reflects a monthly customer charge of \$10.00 and a base distribution per-kWh rate sufficient to recover the remaining Rate C-06 revenue requirement after consideration of the \$10.00 customer charge.

iv. The Rate G-32 rate design reflects impact of the results of the ACROSS submitted on May 9, 2018 in Schedule HSG-1A(R) which redefines transmission level voltage to be electric service received at no less than 69 kV.

c. *Other Settlement Provisions.* The Settling Parties agree to the following:

i. For customers receiving delivery service on Rate A-60, a total bill discount shall be applied. Specifically, (a) the percentage discount off of the total amount billed shall be 25 percent, and (b) for customers receiving benefits through Medicaid, General Public Assistance, and/or the Family Independence Program, an additional discount of 5 percent off of the total amount billed. The Settling Parties agree that Narragansett Electric shall implement the Low Income Discount Recovery Factor (LIDRF) calculated in Attachment 20. Customers billed on Rate A-60 shall not be assessed the LIDRF.

ii. A revision to the Credit for High Voltage Delivery (HVD) provision contained in the Large Demand Rate (G-32) retail delivery service tariff (Rate G-32 Tariff) and Large Demand Backup Service Rate (B-32) retail delivery service tariff (Rate B-32 Tariff) that defines transmission level voltage to be electric service at no less than 69 kV.

iii. The Fox Point Hurricane Barrier (Hurricane Barrier) operated by the United States Army Corps of Engineers (USACE)¹⁷ is designed to protect the City of Providence from flooding and is tested periodically. The USACE has begun conducting its periodic testing of the Hurricane Barrier during off-peak hours, as defined in the Rate G-32 Tariff, to avoid the demand ratchet provision for the assessment of billing demand that would occur for testing during peak hours.

To address the concerns raised by Navy/FEA with respect to the Hurricane Barrier, if the Hurricane Barrier is operated during peak hours, as defined in the Rate G-32 Tariff, as a result of a weather event, (1) immediately following the operation of the Hurricane Barrier during peak hours, the USACE will contact the Company, in writing, notifying the Company that a weather

¹⁷ The USACE is represented in these proceedings by the Navy on behalf of the FEA.

event required the operation of the Hurricane Barrier; (2) after review and confirmation of the conditions at the time of the Hurricane Barrier's operation during peak hours, the Company will waive the demand ratchet provision resulting from the operation of the Hurricane Barrier during peak hours, for the 11 billing months following the month of peak hour operation (billing months 2 through 12). This waiver would be pursuant to the Rate G-32 Tariff under the Demand provision, which defined billing demand "under ordinary load conditions;" and (3) the USACE will be billed based on the billing demand as determined pursuant to the Rate G-32 Tariff based on peak hours metered demand measured in kW and kVa during the month of operation. If the USACE tests the Hurricane Barrier during peak hours, the demand ratchet of the Rate G-32 Tariff would apply for the billing of distribution demand charges in months 2 through 12. However, the USACE can avail itself of the Optional Determination of Demand provision in the Rate G-32 Tariff.

To ensure that the billing account remains on Rate G-32 as a result of the Hurricane Barrier's continued testing during off-peak hours, the Company has revised the availability provision of the Rate G-32 Tariff and the Rate B-32 Tariff to define customers eligible for Rate G-32 and Rate B-32 based on metered demand during all hours, rather than billing demand, which is determined during peak hours. This change will allow a large customer, such as the Hurricane Barrier, respond to the price signals of Rate G-32 and Rate B-32 and remain on Rate G-32 and Rate B-32, and not be transferred to the General C&I Rate (G-02) tariff.

iv. The Company shall add to Rate S-05 another operating schedule allowing customer-owned light-emitting diode (LED) streetlights to operate at an output level that would result in 3,080 annual operating hour equivalents. As this operating schedule is preferred by NERI as compared to the operating schedule Narragansett Electric presented in its

May 9, 2018 rebuttal testimony in Schedule PP-6(R), Narragansett Electric will withdraw its May 9, 2018 operating schedule proposal. In addition, for purposes of billing LED streetlights that operate at an output level that is less than the Dusk-to-Dawn operating schedule existing in the Rate S-05 tariff, the annual operating hour equivalent of such a streetlight shall be compared to the operating schedules contained in the Rate S-05 tariff. If the streetlight's annual operating hour equivalent is no more than five percent of an existing operating schedule's annual operating hour equivalent, the streetlight shall be placed on that operating schedule. If the streetlight's annual operating hour equivalent exceeds the annual operating hour equivalent of an existing operating schedule by more than five percent, the streetlight shall be placed on the operating schedule with the next highest annual operating hour equivalent.

v. The Company shall implement a returned check fee of \$8.00.

vi. The Company shall cancel its Optional Telephone or Web Page Payment Provision, RIPUC No. 2154.

d. *Miscellaneous Corrections.* The Settling Parties agree that Narragansett Electric shall make all corrections (1) identified during discovery, (2) in the preparation of the May 9, 2018 rebuttal ACOSS and rate design, and (3) resulting from changes presented in the rebuttal testimony of Company Witness Howard S. Gorman in finalizing the ACOSS, revenue allocation, and rate design.

e. *Bill Impacts and Tariffs.* Attachment 10 sets forth the electric bill impacts resulting from this Settlement Agreement. Attachment 12 presents the other rates and charges that are impacted by this Settlement Agreement, consistent with what was initially filed on November 27, 2017. Attachment 13 contains the tariffs and tariff provisions, marked to show changes from those currently in effect, that are proposed to become effective September 1, 2018.

The impact of this Settlement Agreement on the monthly bill of a 500 kWh residential customer receiving Standard Offer Service, as compared to the rates which were in effect at the time of the Company's filing in this case, in each of the Rate Years is as follows:

	<u>Dollar Increase</u>	<u>Percent Increase</u>
Rate Year 1	\$3.67	3.5%
Rate Year 2	\$1.03	0.9%
Rate Year 3	\$0.44	0.4%

6. Narragansett Electric - Earnings Report and Earnings Sharing Mechanism

a. *Annual Earnings Report.* The Company shall file with the PUC and the Division annual earnings reports for Narragansett Electric consistent with and in a form similar to that which the Company has been filing for several years, most recently in Docket No. 4323, calculating electric regulatory earnings for the calendar year with the additions/changes set forth in subsections b. through d. below. The timing of the filing of the annual earnings report for Narragansett Electric shall be May 1 of each year.

b. *Definitions.*

- i. **“Actual Earnings”** means earnings including all Performance Incentives earned for the applicable calendar year.
- ii. **“Base Earnings”** means earnings excluding all Performance Incentives earned for the applicable calendar year. The Base Earnings calculation also shall exclude any financial penalties incurred by Narragansett Electric that may have been assessed by the PUC or the Division during the calendar year, and the report shall disclose those excluded amounts separately.

- iii. **“EE Performance Incentive”** means the Energy Efficiency Program (EEP) Incentive.
- iv. **“Performance Incentives”** means the EE Performance Incentive; any earned System Reliability Procurement incentives; LTCR Remuneration Costs; RE Growth Remuneration Costs; Performance Incentive Mechanisms Incentives; and any other performance incentive that has been or may be approved by the PUC in a future proceeding and that was earned and recorded by Narragansett Electric for performance applicable to the calendar year.
- v. **“Performance Incentive Mechanisms Incentives”** means the incentives earned from the incentive mechanisms as set forth in Section 19 of this Settlement Agreement.

c. *Calculation of Earnings for Annual Earnings Report.* The Company shall show the calculation of the regulatory earned return on distribution rate base and the earned return on distribution common equity, in two ways:

- i. Actual Earnings for the applicable calendar year; and
- ii. Base Earnings for the applicable calendar year.

d. *Earnings Sharing With Customers.* If and when the Base Earnings exceed the allowed ROE of 9.275 percent in any calendar year, the amount in excess of 9.275 percent will be deemed “shared earnings.”

- i. If the level of earnings is greater than the allowed ROE of 9.275 percent, but is less than or equal to 10.275 percent, 50 percent of the shared earnings in this tier shall be credited to customers and the Company shall

retain 50 percent of the shared earnings, which shall not be reflected in any earnings reports.

- ii. If the level of earnings is greater than 10.275 percent, 75 percent of the shared earnings in this tier shall be credited to customers and the Company shall retain 25 percent of the shared earnings, which shall not be reflected in any earnings report.

Narragansett Electric shall retain 100 percent of any excess earnings of the Actual Earnings that are attributable to any of the Performance Incentives. Any shared earnings credited to customers shall be credited to the Storm Fund, unless the PUC otherwise directs the credit to customers in another manner.

7. Narragansett Electric - Other Tariffs and Reconciling Mechanisms

The Settling Parties agree that this Settlement Agreement does not (and is not intended to) amend, modify, or change in any respect any tariff or mechanism currently in effect for Narragansett Electric for costs recovered outside of base distribution rates pursuant to any statute or prior PUC order that is not specifically addressed in this Settlement Agreement, or contained in Attachment 22.

Consistent with the impact of the results of a general rate case and the PUC's rulings thereon, the Company shall implement changes to its other factors and charges associated with its various reconciling mechanisms, effective September 1, 2018, to reflect updated net write off percentages, WACCs, and consolidation of Rate G-32 and Rate G-62. In its compliance filing pursuant the PUC's approval of the Rate Plan, the Company shall file schedules in support of the requisite changes to its other factors and charges that will be reflected in its bills to customers effective September 1, 2018, as illustrated in Attachment 12.

8. Narragansett Gas - Revenue Requirement

a. *Revenue Requirements for the Rate Years.* This Settlement Agreement provides that base distribution rates for Narragansett Gas shall be set in these proceedings based on a Rate Year 1 revenue requirement increase of \$5.7 million, a Rate Year 2 revenue requirement increase of \$7.6 million, and a Rate Year 3 revenue requirement increase of \$4.0 million, using a test-year ended June 30, 2017, as detailed in Attachment 2 to this Settlement Agreement. The resulting revenue requirements for the Rate Years are: \$218.6 million for RY1, \$226.2 million for RY2, and \$230.2 million for RY3. The revenue requirement for Rate Year 1 was determined using a total rate base of \$760.6 million; pro forma Test Year operating revenues of \$212.8 million; distribution operating expenses of \$86.1 million; income taxes of \$5.7 million; and an overall rate of return of 7.15 percent. The revenue requirement for Rate Year 1 established by the Settling Parties allows for recovery of a revenue deficiency of \$5.8 million in Rate Year 1, which represents a reduction of \$24.4 million from the November 27, 2017 original request and a reduction of \$9.6 million from the May 9, 2018 second revision to the cost of service.

As noted in Attachment 23 , the Company will credit the Net Revenue received for Narragansett Gas storm response services performed in other jurisdictions, including those outside of National Grid USA operating companies' service territories, back to customers through the Distribution Adjustment Charge, applicable.

b. *Calculation of Rate Base.* The Settling Parties agree that rate base for Narragansett Gas for the Rate Years shall be calculated to include capital additions approved in the ISR plans for Fiscal Year 2014 (Docket No. 4380), Fiscal Year 2015 (Docket No. 4474), Fiscal Year 2016 (Docket No. 4540), Fiscal Year 2017 (Docket No. 4590), and estimated Fiscal

Year 2018 (Docket No. 4678), estimated Fiscal Year 2019, and estimated Fiscal Year 2020 additions through Rate Year 1 (*i.e.*, August 31, 2019).¹⁸ Narragansett Gas' rate base for the Rate Years also shall be calculated to include non-ISR capital additions through August 31, 2021. The Narragansett Gas rate base also shall reflect the unamortized cost of the long-term debt issuance expense. ISR-eligible capital additions for Rate Year 2 and Rate Year 3 will be addressed in the ordinary course outside of base distribution rates through the ISR and included for recovery in future ISR Plans.

c. *Other Adjustments.* The revenue requirements contained in Attachment 2 reflect adjustments agreed to by the Settling Parties associated with the Tax Cuts and Jobs Act, a change in the Company's A&G capitalization policy, and estimated Service Company excess deferred federal income taxes.

d. *Operating Expenses*

i. Uncollectible Accounts Expense

The Settling Parties agree that the recovery of distribution-related uncollectible-accounts expense¹⁹ shall be calculated using Narragansett Gas's actual five-year average ratio of actual distribution net write-offs as a percentage of distribution revenues (as calculated in Docket No. 4323 and Docket No. 3943) ending with the Test Year, except as follows:

The twelve-month period ended June 30, 2013 will be eliminated from this calculation for Narragansett Gas for the Rate Year(s) in these proceedings. This adjustment reduces the average write-off rate that is applied to the Rate Year 1

¹⁸ Capital additions that are being recovered currently through the ISR will be included in rate base as of September 1, 2018, concurrent with the effective date of new base rates in these proceedings. Therefore, the capital-related portion of the ISR factor will be set to zero as of September 1, 2018.

¹⁹ This amount does not include the commodity-related portion of uncollectible accounts expense (*see* Pre-Filed Direct Testimony of Company Witness Melissa A. Little at Page 47 (Bates Page 51 of Book 8). The calculation of uncollectible account expense is provided in Schedule MAL-22 (Rev-2) (Rebuttal Book 3).

revenues to calculate the pro forma Rate Year 1 uncollectible accounts expense.

This adjustment reduces the average Narragansett Gas write-off rate from 2.08 percent to 1.91 percent.

The write-off rate of 1.91 percent also shall be used to calculate the uncollectible accounts expense allowance in those reconciling mechanisms that provide for the recovery of uncollectible account expense.

e. *Return on Rate Base*

i. Capital Structure

The Settling Parties agree that the revenue requirement established by this Settlement Agreement for Narragansett Gas shall be set, as shown on Attachment 2. The actual capital structure shall be adjusted further to include the long-term debt issued on July 27, 2018 pursuant to the separate Settlement Agreement entered into between the Division and the Company dated February 15, 2017, in Division Docket D-17-36, which was approved as set forth in the Division's Report and Order issued February 19, 2017, and as set forth in the statement of basic terms that the Company filed with the Division on August 1, 2018.

ii. Cost of Long-Term Debt

As stated above, the new long-term debt shall be pro-formed at an interest rate of 3.919 percent and debt expense estimated at 0.46 percent, or \$1.61 million. Upon completion of the debt issuance, the revenue requirement established by the Settlement Agreement shall be adjusted to use the actual weighted cost of long-term debt and debt expense after the new debt issuance. The Company shall make a filing to the PUC within 60 days of the completion of the issuance to adjust base distribution rates to incorporate the actual debt rate and issuance costs in distribution rates.

iii. Return on Common Equity

The Settling Parties agree that the return on common equity shall be set at 9.275 percent.

iv. Weighted Average Cost of Capital

The computation of the pre-tax WACC established by this Settlement Agreement is set forth in Attachment 2. The weighted average cost of capital set forth in Attachment 2, as adjusted pursuant to Section 8(e), above, shall be used for ratemaking purposes, including in the ISR Plan, until the next base-distribution rate proceeding for Narragansett Gas.

f. *Miscellaneous Corrections.* The Settling Parties agree that Narragansett Gas shall make all corrections (1) identified during discovery, (2) in the preparation of the May 9, 2018 rebuttal cost of service, and (3) resulting from changes presented in the rebuttal testimony of Company Witness Melissa A. Little in finalizing the cost of service for Narragansett Gas.

9. Narragansett Gas - Revenue Allocation, Rate Design, and Tariff

a. *Allocated Cost of Service.* The Settling Parties agree, for the purpose of settlement in these proceedings, to use the ACOSS included in Attachment 14, consistent with the ACOSS filed by Narragansett Gas on April 3, 2018.

b. *Revenue Allocation and Rate Design.* The Settling Parties agree that Narragansett Gas' revenue allocation contained in Attachment 16, prepared consistent with the Division's recommended revenue allocation filed with the PUC on April 6, 2018,²⁰ shall be incorporated into the design of base distribution rates. The Settling Parties agree to the allocation of the annual base distribution rate allowance of the revenue requirements associated with Grid Modernization programs allocable to Narragansett Gas, as described in Section 15, and

²⁰ Schedule BRO-4 of the Direct Testimony of Witness Bruce R. Oliver on behalf of the Division.

the Rate Year 2 and Rate Year 3 annual base distribution rate increases as stated above in Section 8.

The Settling Parties agree with Narragansett Gas' rate design included in Attachment 16, which reflects:

i. The rate designs for Rates 10/11 and Rates 12/13 reflect a monthly customer charge of \$14.00 and uniform base distribution per-therm rates sufficient to recover the remaining revenue requirement of these two rate classes after consideration of the \$14.00 customer charge.

ii. The rate designs for Rates 10/11 and Rates 12/13 reflect different uniform base distribution per-therm rates effective during the peak months of November through April as compared to uniform base distribution per-therm rates effective during the non-peak months of May through October.

iii. The rate design for Rate 21 reflects a monthly customer charge of \$25.00 and uniform base distribution per-therm rates sufficient to recover the remaining revenue requirement of these two rate classes after consideration of the \$25.00 customer charge.

iv. The rate designs for Rate 21 reflects different uniform base distribution per-therm rates effective during the peak months of November through April as compared to uniform base distribution per-therm rates effective during the non-peak months of May through October.

c. *Other Settlement Provisions.* The Settling Parties agree to the following:

i. For customers receiving delivery service on Rates 11 and 13, a total bill discount shall be applied. Specifically, (a) the percentage discount off of the total amount billed shall be 25 percent, and (b) customers receiving benefits through Medicaid,

General Public Assistance, and/or the Family Independence Program, an additional discount of 5 percent off the total amount billed. The Settling Parties agree that Narragansett Gas shall implement the LIDRF calculated in Attachment 20. Customers billed on Rates 11 or 13 shall not be assessed the LIDRF.

- ii. The Company shall implement a returned check fee of \$8.00.
- iii. Narragansett Gas shall remove the Optional Credit Card Payment Provision from its tariff.
- iv. Narragansett Gas will weather-normalize the demand billing units of its medium, large, and extra-large commercial and industrial rate classes in future general rate cases.
- v. Narragansett Gas shall revise the language in the Distribution Adjustment Clause of its tariff to clarify the determination of System Pressure costs consistent with the Division's recommendation.
- vi. Narragansett Gas shall revise the language in the Gas Cost Recovery (GCR) Clause of its tariff that will allow for it to include in its annual GCR factor filings an estimate of operation and maintenance (O&M) expense associated with its liquefied natural gas (LNG) activities as a component of fixed gas supply costs. This estimate is subject to reconciliation to actual LNG O&M expense incurred during the applicable GCR factor term, subject to the PUC's review of reasonableness and prudence, consistent with the other fixed gas supply costs, which also are subject to the PUC's review and approval. The implementation of this change in ratemaking treatment of LNG O&M expense is intended to capture any decreases in LNG O&M expense noted by the Division in its April 6, 2018 direct testimony. The amount of LNG O&M expense can be lower or higher than the amount removed from the Rate Year 1

distribution revenue requirement. The proposed revisions to the GCR Clause are included in Attachment 19.

d. *Miscellaneous Corrections.* The Settling Parties agree that, in finalizing the ACOSS, revenue allocation, and rate design, Narragansett Gas shall make all corrections identified during discovery.

e. *Bill Impacts and Tariff.* Attachment 17 sets forth the gas bill impacts resulting from this Settlement Agreement. Attachment 18 presents the other rates and charges that are impacted by this Settlement Agreement, consistent with what was initially filed on November 27, 2017. Attachment 19 contains the tariff, marked to show changes from that currently in effect, proposed to become effective September 1, 2018.

The impact of this Settlement Agreement on the annual bill of an 845 therm residential heating customer, as compared to the rates which were in effect at the time of the Company's filing in this case, in each of the Rate Years is as follows:

	<u>Dollar</u> <u>Increase (Decrease)</u>	<u>Percent</u> <u>Increase (Decrease)</u>
Rate Year 1	(\$10.78)	(0.9%)
Rate Year 2	\$23.01	1.9%
Rate Year 3	\$11.94	1.0%

10. Narragansett Gas - Earnings Report and Earnings Sharing Mechanism

a. *Annual Earnings Report.* The Company shall file with the PUC and the Division annual earnings reports for Narragansett Gas consistent with and in a form similar to that which the Company has been filing for several years, most recently in Docket No. 4323, calculating gas regulatory earnings for the calendar year with the additions/changes set forth in subsection b. below. The timing of the filing of the annual earnings report for Narragansett Gas

shall change from September 1 to May 1 each year to align with the timing of the filing of the Company's earnings report for Narragansett Electric on May 1 of each year. The Company's Annual Report to the PUC for Narragansett Gas will reflect the twelve-month period ending December 31. The Company will file its gas earnings report for Fiscal Year 2018 on or before September 1, 2018. The Company will file its first gas earnings report for the twelve-month period ending December 31, 2018 by May 1, 2019.

b. *Calculation of Earnings for Annual Earnings Report.* The Company shall show the calculation of the regulatory earned return on distribution rate base and the earned return on distribution common equity, in two ways:

- i. Earnings including all Performance Incentives (as hereinafter defined below) earned for the applicable calendar year (Actual Total Earnings); and
- ii. Earnings excluding all Performance Incentives earned for the applicable calendar year (Base Earnings). The Base Earnings calculation also shall exclude any financial penalties incurred by Narragansett Gas that may have been assessed by the PUC or the Division and recorded during the calendar year, and the report shall disclose those excluded amounts separately.

For purposes of this Section, the term "Performance Incentives" refers to each of the following incentives:

- i. Energy Efficiency Program (EEP) incentive;
- ii. The Company's share of any incentive earned pursuant to the Natural Gas Portfolio Management Plan recorded during the calendar year;
- iii. The Company's share of any incentive earned or penalties incurred pursuant to the Gas Procurement Incentive Plan recorded during the calendar year; and

iv. Any other performance incentive that may be approved by the PUC in a future proceeding that was earned and recorded by Narragansett Gas for performance applicable to the calendar year, unless the PUC determines at the time of approval that any such future incentive should be included in the calculation of Base Earnings.

For informational purposes, the Company shall include a separate calculation of the basis point value on the earned return on distribution common equity resulting from and for each of the individual Performance Incentives.

c. *Earnings Sharing With Customers.* If and when the Narragansett Gas Base Earnings exceed the allowed ROE of 9.275 percent in any calendar year, the amount in excess of 9.275 percent will be deemed “shared earnings.”

i. If the level of Base Earnings is greater than the allowed ROE of 9.275 percent but is less than or equal to 10.275 percent, 50 percent of the shared earnings in this tier shall be credited to customers and the Company shall retain 50 percent of the shared earnings, which shall not be reflected in any earnings reports.

ii. If the level of Base Earnings is greater than 10.275, 75 percent of the shared earnings in this tier shall be credited to customers and the Company shall retain 25 percent of the shared earnings, which shall not be reflected in any earnings reports.

Narragansett Gas shall retain 100 percent of any excess gas earnings of the Actual Total Earnings that are attributable to any of the Performance Incentives. Any shared gas earnings credited to customers shall be credited to the Distribution Adjustment Clause (DAC), unless the PUC otherwise directs the credit to customers in another manner.

11. Narragansett Gas - Other Tariffs and Reconciling Mechanisms

The Settling Parties agree that this Settlement Agreement does not (and is not intended

to) amend, modify, or change in any respect any tariff or mechanism currently in effect for Narragansett Gas for costs recovered outside of base distribution rates pursuant to any statute or prior PUC order that are not specifically addressed in this Settlement Agreement, or contained in Attachment 22.

Consistent with the impact of the results of a general rate case and the PUC's rulings thereon, the Company shall implement changes to its other factors and charges associated with its various reconciling mechanisms, effective September 1, 2018, to reflect updated net write off percentages, LNG O&M expense, WACCs, and cash working capital percentages. In its compliance filing pursuant the PUC's approval of the Rate Plan, the Company shall file schedules in support of the requisite changes to its other factors and charges that will be reflected in its bills to customers effective September 1, 2018, as illustrated in Attachment 18.

12. Gas Business Enablement Program

a. *Program Scope; Service Company Rents; Overall Capital Investment.*

The Company will continue to implement the Gas Business Enablement Program during the term of the Rate Plan. The Gas Business Enablement Program is a shared investment across all National Grid USA operating companies, which will be implemented and owned by the National Grid USA Service Company, Inc. (Service Company), with a portion of the costs allocated to the Company. The total Service Company costs of the Gas Business Enablement Program for capital expenses and project operating expenses relating to the capital investment (excluding run the business costs) are forecasted to be \$478.3 million through Fiscal Year (FY) 2023.

b. *Capital Investment Levels for the Company.* The revenue requirements for Narragansett Electric and Narragansett Gas include 85 percent of the Company's share, as charged to the Company by the Service Company as a rent expense, of the annual revenue

requirement on forecasted Gas Business Enablement Program capital investments. The rent expense charged to the Company for the Gas Business Enablement Program includes the return on, and the amortization of, the Company's allocated portion of current Gas Business Enablement Program capital investments along with incremental Gas Business Enablement Program capital investments that are forecasted to be placed in service during the Rate Years. Notwithstanding the specified program level spending amounts, nothing in this Settlement Agreement is intended to alter the Company's flexibility during the term to substitute, change, or modify the timing of its Gas Business Enablement Program capital investments to deliver the scope of the Gas Business Enablement Program.

c. *10-Year Amortization of Operating and Maintenance (O&M) Costs for the Company.* The revenue requirements for Narragansett Electric and Narragansett Gas for each Rate Year include 85 percent of the Company's forecasted annual non-recurring O&M expense for the Gas Business Enablement Program to be charged to the Company during each Rate Year, amortized over 10 years and including a return at Narragansett Electric's and Narragansett Gas's WACC, as applicable. The revenue requirements include a reduction to the non-recurring O&M expense allowance in each Rate Year, representing 100 percent of Type I forecasted O&M savings and 85 percent of Type II forecasted O&M savings expected to be realized as a result of the Gas Business Enablement Program.

d. *Run-the-Business Costs.* The revenue requirements include forecasted incremental costs to maintain the Gas Business Enablement technology in the Rate Years at the level proposed by the Company in its initial filing: \$779,580, \$1.2 million, and \$1.3 million, respectively, for Narragansett Gas. In the Company's initial request, it included an offset to these run-the-business costs representing 100 percent of Type I forecasted O&M savings. As

part of the settlement, the Company has agreed to further offset these costs by an amount representing 85 percent of Type II forecasted O&M savings expected to be realized as a result of the Gas Business Enablement Program. The adjustment to reflect these additional savings result in a reduction to the revenue requirement of \$49,823, \$157,867, and \$265,584 in each Rate Year, respectively.

e. *Deferral.* To the extent the Company incurs costs less than the Narragansett Electric and Narragansett Gas revenue requirement allowances included in base distribution rates for the items described in Section 12.b. and 12.c. above, the Company shall create a regulatory liability to defer that amount to be returned to customers. The credit to customers of the balance of the regulatory liability account shall be determined from the Company's next general rate case or extension of the Rate Plan governed by this Settlement Agreement. To the extent the Company incurs costs in excess of the Narragansett Electric and Narragansett Gas revenue requirement allowances included in base distribution rates for the items described in Section 12.b. and 12.c. above, the Company shall create a regulatory asset to defer that amount, but in no case will the deferral to the regulatory asset result in recovery of a total cost in excess of the Company's forecasted revenue requirement allowances included in base distribution rates for the items described in Section 12.b. and Section 12.c. above, of \$43.8 million (\$38.3 million for Narragansett Gas and \$5.5 million for Narragansett Electric). The recovery of the balance of the regulatory asset account shall be determined from the Company's next general rate case or extension of the Rate Plan governed by this Settlement Agreement. All Gas Business Enablement costs to be recovered shall be subject to the PUC's review of the reasonableness and prudence of such costs. The Company will accrue carrying charges on the deferral balances using the pre-tax WACC.

f. *Gas Business Enablement Program Reporting.* The Company will file quarterly Gas Business Enablement Program reports with the PUC and the Division within 60 days after the end of each quarter of each Rate Year. The report will address the status of the Gas Business Enablement Program and budget, including: (i) a narrative explaining overall program status; (ii) detail on budgets and actual spending; (iii) identification of allocations of costs to the Company; (iv) explanations of variances between budgeted and actual spending; and (v) an update on the status of the deferral balance created pursuant to subsection e. above, including, at a minimum, the increase, decrease, and balance of the deferral at the end of each quarter.

The Company will work with the Division to accommodate more in-depth reviews by the Division, PUC Staff, or the Division's consultants of the systems associated with Gas Business Enablement during the term of the Rate Plan.

13. Cyber Security and Information Services (IS) Technology Modernization Programs

a. *Scope of Programs; Service Company Rents; Overall Capital Investment.* The Company will continue to implement the Cyber Security and IS Technology Modernization Programs during the term of the Rate Plan. The Cyber Security and IS Technology Modernization Programs are shared investments across all National Grid USA operating companies, which will be implemented and owned by the Service Company, with a portion of the costs allocated to the Company. The total Service Company costs of the Cyber Security and IS Technology Modernization Programs for capital investments and project operating expenses relating to the capital investment (excluding run the business costs) are included in the revenue requirement.

b. *Capital Investment Levels for the Company.* The revenue requirements for Narragansett Electric and Narragansett Gas include 85 percent of the Company's share, as charged to the Company by the Service Company as rent expense, of the annual revenue requirement on forecasted Cyber Security and IS Technology Modernization Programs capital investments. The rent expense charged to the Company for the Cyber Security and IS Technology Modernization Programs includes the return on, and the amortization of, the Company's allocated portion of current Cyber Security and IS Technology Modernization Program capital investments and incremental Cyber Security and IS Technology Modernization Programs capital investments that are forecast to be placed in service during the Rate Years. Notwithstanding the specified program level spending amounts, nothing in this Settlement Agreement is intended to alter the Company's flexibility during the term to substitute, change, or modify the timing of its Cyber Security and/or IS Technology Modernization Programs capital investments to deliver the scope of the Cyber Security and/or IS Technology Modernization Programs.

c. *Deferral.* To the extent the Company incurs costs less than the Narragansett Electric and Narragansett Gas revenue requirement allowances included in base distribution rates for the items described in Section 13.b. above, the Company shall create a regulatory liability to defer that amount to be returned to customers. The credit to customers of the balance of the regulatory liability account shall be determined from the Company's next general rate case or extension of the Rate Plan governed by this Settlement Agreement. To the extent the Company incurs costs in excess of the Narragansett Electric and Narragansett Gas revenue requirement allowances included in base distribution rates for the items described in Section 13.b. above, the Company shall create a regulatory asset to defer that amount, but in no

case will the deferral of the regulatory asset result in recovery of a total cost in excess of the Company's forecasted revenue requirement of \$17.3 million (\$5.2 million for Narragansett Gas and \$12.1 million for Narragansett Electric). The recovery of the balance of the regulatory asset account shall be determined from the Company's next general rate case or extension of the Rate Plan governed by this Settlement Agreement. All Cyber Security and IS Technology Modernization Program costs to be recovered shall be subject to the PUC's review of the reasonableness and prudence of such costs. The Company will accrue carrying charges on the deferral balances using the pre-tax WACC.

d. *Cyber Security and IS Technology Modernization Programs Reporting.*

The Company will file quarterly Cyber Security and IS Technology Modernization Programs reports with the PUC and the Division within 60 days after the end of each quarter of each Rate Year. The report will address the status of the Cyber Security and IS Technology Modernization Programs and budgets, including: (i) a narrative explaining overall program status; (ii) detail on budgets and actual spending; (iii) identification of allocations of costs to the Company; (iv) explanations of variances between budgets and actual spending, and (v) an update on the status of the deferral balance created pursuant to subsection c. above, including, at a minimum, the increase, decrease, and balance of the deferral at the end of each quarter. In the report for the last quarter of each Rate Year (quarter ending March 31), the Company will also include (i) any cost or timeline differences that exceed ten percent for the Rate Year; and (ii) the latest Cyber Security and IS Technology Modernization Programs sanction papers authorized during that Rate Year.

The Company will work with the Division to accommodate more in-depth reviews by the Division, PUC Staff, or the Division's consultants of these programs during the term of the Rate

Plan. The Company commits to submit to the Division and PUC the report produced by the independent cyber security consultant who reviewed the Company's cyber security investments and strategy no later than 30 days after the approval of the Settlement Agreement. The report will be filed under the protection of confidentiality.

14. Commencement of Investments to Enable a Modern Grid

The Company shall commence implementation of the following initiatives that the Company originally identified in its PST Plan filing in Docket No. 4780, as provided below:

a. *System Data Portal*

Narragansett Electric will implement this project beginning in Rate Year 1. The revenue requirement in Rate Year 1 will include \$0.5 million for up to two FTEs in support of this project; the revenue requirement in Rate Year 2 will include an incremental \$0.2 million for one additional FTE in Rate Year 2.

b. *Control Center Enhancements*

i. Geographic Information System (GIS) Data Enhancement Project

Narragansett Electric will commence the GIS Data Enhancement Project, as proposed in its initial filing, in Rate Year 1, and will use reasonable efforts to complete it within 12 months after the project is commenced. The Company's allocated share of the GIS Data Enhancement Project is \$427,000, which will be amortized over the three years of the MRP and included in Narragansett Electric's revenue requirement, with a return at the customer deposit rate.

Narragansett Electric will commence populating the system with Rhode Island information in Rate Year 2. An allowance of \$1 million will be included in the revenue requirements for Rate Year 2 and Rate Year 3 for this project.

ii. Distribution Supervisory Control and Data Acquisition (DSCADA) and Advanced Distribution Management System (ADMS)

Narragansett Electric shall begin the DSCADA/ADMS project, as proposed in its initial filing, during the MRP. To provide Narragansett Electric an opportunity to coordinate implementation of DSCADA/ADMS with its Massachusetts affiliates, Narragansett Electric shall have the discretion to determine the commencement date of the DSCADA/ADMS project. An allowance for the Company's multi-jurisdictional share of the DSCADA/ADMS project in an amount of \$0.4 million to cover the initial costs for project Requirements and Definition will be included in the revenue requirement in Rate Year 2. If, however, the DSCADA/ADMS project commences on a later schedule during the MRP, the allowance shall be deferred and applied to the cost of the project, regardless of the timing of completion, and the deferral of which will accumulate interest at the customer deposit rate. A three-year project development and deployment phase will then commence with an expected in-service date beyond the term of the MRP; therefore, revenue requirements for the deployment are not included in this plan.

iii. Remote Terminal Unit (RTU) Separation

Narragansett Electric will begin a program to separate distribution RTUs from transmission RTUs in support of DSCADA/ADMS. Distribution system data will be disaggregated from transmission system data by separating the field RTUs that capture the data and incorporating it into the Company's Supervisory Control and Data Acquisition (SCADA) system. In addition to enabling dedicated DSCADA, a secondary benefit from creating a bright line separation between transmission operations and distribution operations is that it eliminates FERC Critical Infrastructure Protection (CIP) oversight, and its associated risks and costs, from distribution operations. Allowances of \$0.0 million, \$0.2 million, and \$0.3 million are included in Rate Year 1, Rate Year 2, and Rate Year 3 revenue requirements, respectively, for RTU investments.

c. *Other Grid Modernization Investments.* In addition to these foundation initiatives, the following IS-related grid modernization investments are included in the Rate Year 2 and Rate Year 3 revenue requirements: Enterprise Service Bus, Data Lake, PI Historian, Advanced Analytics, Telecommunications, and Cybersecurity.

15. Grid Modernization Plan (GMP)

a. Narragansett Electric will engage with stakeholders via the PST Advisory Group or relevant subcommittee, to develop a comprehensive Grid Modernization Plan (GMP), in parallel with the collaborative effort to develop the Updated AMF Business Case. The GMP will provide a full assessment of the various initiatives being contemplated, including an explanation and evaluation of how the initiatives link to each other. The assessment will consider short and long-term initiatives to include active and future programs. The GMP will present implementation plans outlining the details and technologies over a five-year horizon plus an outline of how this plan aligns with the longer term (i.e., a ten year roadmap). The GMP will provide a roadmap of potential investments beyond the term of the current MRP; requests to fund those investments will be included as part of a general rate case, MRP, or ISR Plan filings.

b. Narragansett Electric will file the GMP with the PUC within a reasonable time after, or in conjunction with, the filing of the Updated AMF Business Case, as described in Section 16, below, but in any event no later than six (6) months following the filing of the Updated AMF Business Case to allow the PUC to consider the GMP and Updated AMF Business Case together.

c. The GMP will take into account the time period for any proposed AMF implementation, and it will include, at a minimum:

i. Objectives for the electric grid to advance the Goals for the Energy System and Rate Design Principles, and potential visibility requirements of the benefit-cost framework in Docket 4600 Guidance Document.

ii. Explanation of the role of currently active programs;

iii. Investments and technology deployments planned through the end of any proposed AMF implementation;

iv. Functionalities to achieve those objectives;

v. Review of options for candidate technologies to deliver those functionalities;

vi. Transparent, updated benefit cost analyses that fully incorporate the Docket No. 4600 framework;

vii. An implementation plan that provides a detailed explanation of the prioritization, sequencing, and pace of investments;

viii. A plan and explanation for the integration and leveraging of customer-side technologies and resources in the near and long-term;

ix. Identification of the possible communications solutions that address current and future needs and support a wide array of potential grid modernization programs and activities;

x. Explanation of congruency with grid modernization activities in New York and Massachusetts;

xi. A plan and explanation of how the selected investments and implementation plan address risks of redundancy or obsolescence; and

xii. A description of how the GMP, in particular the distribution planning components, addresses the relationship between electrification of heating and transportation and energy efficiency to allow for the furtherance of overall reduced peak demand while also encouraging electrification of heating and transportation.

d. The Settling Parties recognize that the Company's GMP and associated Company proposals will be subject to consideration by the PUC in a separate docket in conjunction with the Updated AMF Business Case, and all interested parties will have an opportunity to participate in any such docket prior to PUC action on the GMP and proposals contained therein. The Settling Parties acknowledge and agree that the PUC will make a final determination on whether and how to implement the GMP.

e. To the extent it is determined by the PUC that implementation of any grid modernization initiatives not already funded in the MRP should move forward, and Narragansett Electric must begin to incur costs during the MRP to begin the implementation process, the MRP may be re-opened to include the revenue requirement for any such approved initiatives during the term of the MRP in base distribution rates, as approved by the PUC.

16. AMF

a. *Updated AMF Business Case.* Provided this Settlement Agreement is approved by the PUC, the Company will commence the next phase of work to refine and update its AMF business case (referred to herein as the Updated AMF Business Case) for the Company's proposed AMF investments. Design and procurement efforts undertaken during that phase will be in coordination with the development of a similarly updated AMF business case for the Company's New York affiliate as part of a collaborative with the New York Public Service Commission Staff and other interested parties in that jurisdiction. The Company will use

reasonable efforts to file the Updated AMF Business Case for Rhode Island with the PUC no later than February 1, 2019, which will include an evaluation of shared communications infrastructure and various ownership models for key AMF components, including the potential for incremental revenue that might be generated by these models in the future. Furthermore, the Updated AMF Business Case will address data governance regarding customer, non-regulated power producer (NPP), and third party access to system and customer data, with the proper privacy and security protections in place. The Updated AMF Business Case will propose to implement AMF in the most cost-effective way, and will provide a cost estimate that can be relied upon for purposes of establishing future revenue requirements for deployment of AMF in Rhode Island.

The Company's share of the costs to develop the Updated AMF Business Case is forecasted to be approximately \$2 million. An allowance for this forecasted cost is included in the revenue requirements, which will be spread evenly over the three years of the MRP.

b. *Stakeholder Process and Regulatory Filing.* The Company will convene a preliminary meeting with Division staff and the Office of Energy Resources (OER) to develop a common understanding of the next phase of work, to identify areas of the current AMF business plan (as filed in Docket No. 4780, Book One, Chapter 4) requiring further exploration or refinement, and to identify areas for input from the PST Advisory Group (as defined in Section 17(e) below), or relevant subcommittee. An output of this preliminary meeting of the Company, the Division, and OER will be a document to formally agree on additional areas of exploration, pending the PUC's approval of the Company's \$2 million funding request for the Updated AMF Business Case. The schedule for the phase of work starting August 1, 2018 and concluding February 1, 2019 with the filing of the Updated AMF Business Case is further discussed below:

i. Between August 1, 2018 and November 15, 2018, the Company will refine and update its AMF business case. As part of this process, the Company will engage stakeholders, via the PST Advisory Group, or relevant subcommittee, to explore and develop a common understanding of specific AMF proposal areas, a customer engagement plan for AMF, including the role of non-regulated power producers (NPP), and assumptions and rationale upon which a proposal to develop time varying rates will be based.

ii. By September 15, 2018, the Company will convene a second meeting with Division staff and OER to present its Updated AMF Business Case addressing stakeholder identified areas, and further discuss additional questions, comments, or proposed modifications for the Company's consideration.

iii. By October 30, 2018, the Company will convene a third meeting with Division staff and OER. At this meeting, the Company will seek clarification, as required, of stakeholder concerns and comments on the Company's Updated AMF Business Case, and provide new information, if any, to address stakeholder concerns and comments.

iv. The Company will use reasonable efforts to file the Updated AMF Business Case with the PUC for review and approval of the funding necessary to deploy statewide AMF in Rhode Island in a timeframe consistent with the Updated AMF Business Case no later than February 1, 2019. The Updated AMF Business Case will contain the following elements:

- A refined and updated AMF business plan, benefit-cost analysis (BCA), and a detailed customer engagement plan;
- An updated AMF deployment schedule with a BCA (using the Societal Cost Test) for different meter deployment periods;

- Revenue requirement for AMF deployment;
- Deployment proposals, a proposal for cost recovery of AMF, and any activities associated with implementation of AMF;
- A proposal to allocate AMF costs among rate classifications;
- Assumptions upon which a proposal to develop time varying rates will be based;
- A Data Governance Plan regarding timely customer, NPP, and third-party access to system and customer data, (e.g., elements may include, but are not limited to, customer assigned peak load contribution, energy and capacity loss factors, interval usage, or other information needed for efficient wholesale and retail market participation) in place and billing quality customer data (e.g., elements may include, but are not limited to, electric usage in kilowatt-hours containing both “register reads” and “interval reads”) with the proper privacy and security protections;
- Updated costs for AMF deployment based on information gained from a procurement effort;
- Transparent, updated benefit cost analysis that fully incorporates the Docket No. 4600 framework;
- Investigation of alternative business models and ownership models;
- Analysis of data latency;
- Deployment details;
- Role of non-regulated power producers, including articles to share customer information and customer engagement;
- Ownership model for assets and telecom;

- Detailed AMF functionalities, how Rhode Island will achieve those functionalities, and a timeline for when those functionalities will be available;
- Identification of the most cost effective way to achieve the functionalities, and how the functionalities align to the policy objectives;
- Explanation of whether the realization of those functionalities will require additional future work and costs over 20 years;
- Identification of what functionalities the AMF will achieve that are part of the grid modernization plan and which are in addition to the Grid Modernization Plan;
- Identification of which functionalities are dependent on a full-scale roll out instead of a targeted roll out;
- Business cased based on both a Rhode Island-only scenario and a Rhode Island/New York scenario;
- A business case based on the length (duration) of meter deployment;
- Identification of the critically linked parts of grid modernization and AMF; and
- Identification of whether the AMF solution would allow for proper net metering according to the tariff.

The Settling Parties recognize that the Company's Updated AMF Business Case and associated Company proposals in relation to time varying rates will be subject to consideration by the PUC in a separate docket, and all interested parties will have an opportunity to participate in any process provided prior to PUC action on the Updated AMF Business Case and proposals contained therein. The Settling Parties acknowledge and agree that the PUC will make a final

determination on whether and how to implement AMF and time varying rates in the Company's service territory.

c. To the extent it is determined by the PUC that deployment of AMF should move forward and the Company must incur costs during the MRP to begin the deployment process, the MRP may be re-opened to propose the revenue requirement for any such approved initiatives during the term of the MRP in base distribution rates, as approved by the PUC.

17. Clean Energy Programs

The Solar Demonstration Program for Income Eligible Customers and the Income Eligible Customer Rewards Program, originally proposed in the Company's PST Plan filing in Docket No. 4780, are hereby withdrawn. Narragansett Electric will implement a portfolio of clean energy programs in other areas that the Company originally identified in its PST Plan filing in Docket No. 4780, with some modifications to the programs, as provided below:

a. *Electric Transportation.* The Settling Parties recognize that the Company has a role in facilitating the growth of Electric Vehicle (EV) adoption and scaling of the market for EV charging equipment to advance Rhode Island's zero emission vehicles and greenhouse gas emissions policy goals. In furtherance of these goals, Narragansett Electric will implement a phased electric transportation initiative over the term of the MRP, which will be comprised of the following components: (i) Off-Peak Charging Rebate Pilot, (ii) Charging Station Demonstration Program, (iii) Discount Pilot for Direct Current Fast Charging (DCFC) Station Accounts, (iv) fleet advisory services, and (v) Electric Transportation Initiative Evaluation. The revenue requirement for this initiative will include \$0.7 million in Rate Year 1, \$1.1 million in Rate Year 2, and \$2.1 million in Rate Year 3. The costs of this initiative shall be subject to a deferral mechanism, as described in Section 20, below.

i. Off-Peak Charging Rebate Pilot

Narragansett Electric will offer an Off-Peak Charging Rebate as a pilot to reward customers for charging their EV during off-peak hours, study customer charging patterns at various charging locations and levels, understand customer responsiveness to time-differentiated price signals, and evaluate technology and partnership alternatives to monitor and report charging. Participating customers will earn a rebate for every kWh charged between 9 p.m. and 1 p.m. The off-peak charging rebate will be 6 cents per kWh during the summer months (June through September), and 4 cents per kWh in all other months. Narragansett Electric reserves the right to offer the higher rebate value in the winter months if, for example, system conditions warrant, or to otherwise modify the rebate value. Narragansett Electric will evaluate the rebate value following the first full year of the program and will include any findings and recommendations in the Annual Evaluation Report, as discussed in subsection d., below.

ii. Charging Station Demonstration Program

Narragansett Electric will demonstrate new approaches to electric charging infrastructure development. Narragansett Electric may not own any of the Level 2 charging ports (*i.e.*, charging power between 10-20 miles per hour) to be developed as part of this initiative. Narragansett Electric also may not own any of the DCFC ports to be developed as part of this initiative. Prior to Rate Year 2, Narragansett Electric may propose to re-evaluate utility ownership of Level 2 and DCFC ports as a program design modification in the Annual Program Modification Report. The proposed categories of charging stations under the program are set forth in the tables below.

Charging Station Demonstration Project: Level 2

Level 2	Total Sites	Ports Per Site	Total Ports
Workplaces	14	10	140
Apartment Buildings	6	6	36
Income Eligible Community Sites	6	6	36
Public Transit Stations	6	10	60
Government light-duty fleet	3	8	24
Corporate light-duty fleet	3	8	24
Total	38		320

Charging Station Demonstration Project: DCFC

DCFC	Total Sites	Ports per Site	Total Ports
Public DCFC	4	5	20
Public transit buses	2	5	10
Rideshare company charging hub	1	5	5
Other heavy-duty/DCFC (port, airport)	2	4	8
Municipal school buses	3	1	3
Total	12		46

Narragansett Electric may not act to preclude third party provider market development. This Settlement Agreement does not impose any limitations or prohibitions on non-utility product and competitive service providers from offering EV-related products and services, including charging station hardware and software, to the government light duty fleets or to site hosts located in underserved market segments.

As part of this program, Narragansett Electric will provide site hosts with the Make-Ready work necessary to host a charging station up to the costs as provided in this section. As such, Narragansett Electric will be responsible for making the site ready for charging to be installed, owned, and operated by the Site Host. For all Make-Ready sites, Site Hosts will have a

choice of both EV charging equipment and network services. The Company will pre-qualify options for equipment and network services. All pre-qualified equipment will have open standards for communications and operations.

For DCFC stations, the Company will work closely with the PST Advisory Group, or relevant subcommittee, to ensure that DCFC stations deployed via this initiative are complementary to deployments using the Volkswagen Settlement Agreement funds administered by the Rhode Island Department of Environmental Management. Narragansett Electric will coordinate with OER and will reserve up to twenty-five percent (25%) of the DCFC ports to be allocated to State-funded, -supported, or -hosted stations that deliver benefits to the public. The Company will seek to co-locate one of the DCFC sites with a storage unit, as further described in subsection d. of this section, below. Deployment of the remaining DCFC sites will be in coordination with OER and the Division. For energy supply for the charging stations, the site host is the customer of record and accordingly will select competitive generation supply or standard offer service (the Company does not, and should not, have a say in the customer's decision on its choice of energy supplier).

iii. Discount Pilot for Direct Current Fast Charging Station Accounts

Narragansett Electric will offer a time-limited discount on the electric bills for dedicated DCFC electric accounts. This discount pilot will be available on a first come, first served basis, with the annual value limited to \$300,000 per year. Any existing or new customers with General C&I Rate G-02 or Large Demand Rate G-32 for dedicated DC Fast Charging purposes will be eligible for the discount, provided that twenty five percent (25%) of the stations receiving the discount shall be in stations that enable electric public transit. The monthly bill discount will be based on a per kW credit set at the same rate as the applicable (Rate G-02 or Rate G32)

distribution demand charge. The discount for participants who enroll in Rate Year 1 will be equal to one hundred percent (100%) of the distribution demand charge for a period of three years from the start of service. Sixty (60) days prior to enrollment for Rate Year 2 and Rate Year 3, the Company shall make, as part of the Electric Transportation Evaluation and Annual Program Modification Report, with input from the PST Advisory Group, a recommendation for the appropriate level of discount for new participants in such Rate Year based on enrollment data and lessons learned, for approval by the PUC. The results of the pilot and any proposed DCFC demand charges or rebates will be reviewed as part of the next MRP, which may include a phase out over years four, five, and six with the details of such phasing out to be included in the next MRP.

iv. Fleet Advisory Services

As a new component of the program arising from the settlement discussions, and not included in the Company's original filing, Narragansett Electric will, through a combination of internal and third-party expertise, offer a new advisory service to support electrification of customer fleets, the scope of which will include conducting long-term fleet electrification studies for a total of approximately twelve (12) fleet operators in Rhode Island, including government light-duty, corporate light-duty, public transit, government medium/heavy-duty (on-road and off-road), and municipal school buses. This program will replace Narragansett Electric's originally proposed Company Fleet Expansion program, which shall be eliminated, and Narragansett Electric will reallocate thirty-six percent (36%) of the funds previously identified for the Company Fleet Expansion program to fleet advisory services, provided that twenty-five percent (25%) of the funds address fleets owned by government or public transit entities.

v. Electric Transportation Initiative Evaluation

Narragansett Electric is committed to evaluating each element of the electric transportation initiative on an annual basis, and sharing its learnings with stakeholders and industry participants. In furtherance of this goal, Narragansett Electric will produce and publicly present an Annual Evaluation Report, using the metrics provided in the original filing, with appropriate modifications to be made to reflect the programs as approved in this Settlement Agreement within two months following the end of each Rate Year, describing implementation of the electric transportation initiative, and documenting the information gained through this initiative and any recommendations to enhance the program. The Company will file a copy of the Annual Evaluation Report with the PUC. The Company's Annual Evaluation Report will include, at a minimum, the following information, if available:

- location, category (as defined in the table in Section 17.a.ii. of this Settlement Agreement), in-service date, and utilization of each charging station installed;
- effectiveness of the Discount Pilot for DCFC Station Accounts, accounting for free-ridership and spillover effects;
- learnings on how the Company can integrate Electric Vehicles with minimal impacts on the cost of the distribution system, including an understanding of the effectiveness of the Off-Peak Charging Rebate Pilot;
- evaluation of the effectiveness of each component of the initiative in stimulating consumer adoption of electric vehicles, including an understanding of the effectiveness of the type and level of the incentive;

- results of the Fleet Advisory Services program, including the number of fleet vehicles converted to electric vehicles at the end of each rate year and at the end of the rate plan;
- the incremental CO2 reductions resulting from incremental vehicle adoption as described under the Distributed Energy Resources, CO2: Electric Vehicles metric; and
- evaluation of the Company's impact on fleet electric vehicle adoption.

The process for implementing any findings or recommendations contained in the Annual Evaluation Report will be through the PST Advisory Group, as discussed in subsection (e), below.

b. *Electric Heat.* Narragansett Electric shall not receive any funding for its proposed electric heat initiative through base distribution rates. Narragansett Electric may propose an electric heat initiative similar to the initiative proposed in this docket through the Energy Efficiency program plan, which, if proposed, will: (1) offer equipment incentives to lower the upfront cost barrier for Rhode Island residential customers to convert to efficient cold-climate air-source or ground-source heat pump systems; (2) offer rebates to a mix of standard offer service, competitive supply, and Income Eligible customers with approximately fifty percent (50%) of the rebate budget to be used for Income Eligible customers; and (3) be limited to residential customers for whom efficient electric heating has a Societal Cost Test ratio greater than 1 (e.g., currently delivered fuel customers and electric resistance customers). For standard offer service customers, the rebate level will depend on the installed system. For Income Eligible customers, the rebate level will be one hundred percent (100%) of the all-in cost of heating capacity.

c. *Strategic Electrification Education Fund.* The Settling Parties acknowledge that the ongoing electrification of transportation in Rhode Island has the potential to significantly reduce greenhouse gas emissions and to provide significant distribution system benefits. At the same time, the Settling Parties acknowledge that electric transportation, if not optimally integrated, has the potential to increase peak electric demand with negative consequences for system cost, system efficiency and emissions. To support the electric transportation initiatives discussed above, Narragansett Electric will create a Strategic Electrification Education Fund. The fund shall be administered consistent with R.I. Gen. Laws § 39-2-1.2. The revenue requirement shall include the following amounts for the fund: \$7,500 in Rate Year 1 to inform customers of the availability of the off-peak charging rate; \$11,250 in Rate Year 2 to inform customers of the availability of the off-peak charging rate; and \$18,750 in Rate Year 3 to inform customers of the availability of the off-peak charging rate. The Settling Parties also agree that, prior to the beginning of Rate Year 2, the Company may submit, in consultation with the Division, OER, and the members of the PST Advisory Group, a revised proposal to the PUC for funding the Strategic Electrification Education Fund, consistent with R.I. Gen. Laws § 39-2-1.2. The Settling Parties agree that this provision may be severed from the remainder of this Settlement Agreement without affecting the validity of the overall settlement if the PUC deems this provision inconsistent with its motions.

d. *Energy Storage Demonstration.* The Settling Parties agree that energy storage is critical for achieving a clean energy future as it provides the ability to optimize system performance over time and allows intermittent renewable resources, such as wind and solar, to make a larger contribution to overall generation. The Settling Parties also recognize the Company has a role to effectively integrate storage. To this end, Narragansett Electric will

demonstrate two energy storage solutions: (i) one behind-the-meter storage system co-located with a DCFC site, which will consist of an approximate 250 kW two hour energy storage system, supporting approximately two to six DCFC ports, and (ii) one front-of-the-meter storage system, which will consist of an approximate 500 kW three hour energy storage system for the primary purpose of realizing distribution system value, with the exact storage size and capacity to be determined by system need and location. The revenue requirement for this initiative will include \$0.1 million in Rate Year 1, \$0.2 million in Rate Year 2, and \$0.4 million in Rate Year 3. The costs of this initiative shall be subject to a deferral mechanism, as described in Section 20, below.

Narragansett Electric will procure each storage solution through a competitive RFP process, which will set forth the technical requirements, and will request proposals for both a third party-owned system with a service agreement, and an Engineering Procurement and Construction delivered system owned by the utility, which will explore alternative ownership models on a like-for-like basis, and benefits associated with each model. Narragansett Electric will share the draft RFP with stakeholders, via the PST Advisory Group, for feedback. The Company will file each draft RFP with the PUC no fewer than 30 days before it is issued to ensure that the PUC understands the barriers the pilot demonstration is designed to overcome and the learnings the Company intends to obtain from the project. The proposal(s) that have the best value and that also are compliant with the RFP will be selected. The Company will work with the Division and OER to ensure the procurement process and selection process has been done in an independent, transparent, and fair manner. The costs included in the revenue requirement for this initiative are based on a Company ownership model. The Company will prepare a cost/benefit analysis at the conclusion of each pilot/demonstration using the Docket No. 4600

Benefit-Cost Framework.

e. *Engagement and guidance in support of PST Programs.* The Company and the Settling Parties recognize that the initiatives included in this section are new in nature, with a higher level of uncertainty about the performance and results and that delivery of these programs over the period of the MRP will benefit from broad stakeholder engagement, review, and guidance. To formalize engagement of stakeholders that will be additional to the regular engagement of the Company with the Division and OER, the Company proposes the following:

- Establishment of a “PST Advisory Group,” to be chaired by the Company and whose members shall include the Division, OER, and representatives of the following interests: environment, clean energy industry or businesses, low income, NPP, community groups, and additional members as the Company, the Division, and OER may agree. The mission of the PST Advisory Group shall be to review at a high level progress on the delivery of all PST components of the MRP (Grid Modernization, AMF, time-varying rates, Electric Transportation, Storage, and Performance Incentive Mechanisms) and to provide guidance, and prioritization to support successful delivery of the components as a holistic suite. The Advisory Group shall also serve as a connection with other relevant programs / proceedings outside the MRP, for example, the Energy Efficiency Resource Management Council (EERMC), and to enable appropriate participation, alignment and coordination with such programs and proceedings.
- Creation of subcommittees under the PST Advisory Group, including but not limited to: 1) Strategic Electrification Subcommittee, and 2) AMF and Grid Modernization Subcommittee. Subcommittees shall be chaired by the Company and will include

Division and OER participation. The mission of the subcommittees shall be to provide guidance and prioritization on a more granular level in relation to the individual program.

- Quarterly updates: on a quarterly basis, commencing October 2018, the PST Advisory Group, and relevant subcommittees, will each meet to discuss the progress and challenges in the development and implementation of the PST components of the MRP, along with emerging insights and learnings. The schedule will be designed such that, wherever possible, meetings will all take place in one day, with the PST Advisory Group in the morning, followed by sequential subcommittee meetings. Prior to each quarterly meeting the Company will consult with the Division and OER to plan the agenda and topics for discussion. All PST Advisory Group members will have an opportunity to provide input on the agendas for meetings. PUC staff and Commissioners may also provide input on the agendas for topics to be addressed at PST Advisory Group meetings.
- Annual evaluation and program modification: The first PST Advisory Group meeting after the end of each Rate Year shall include a review of results and learnings from the previous year's performance. The meeting will also review recommendations for any modifications to program design or funding for the electric transportation and storage programs. The Company will file any recommendations requiring a transfer of funds between programs, following review by the PST Advisory Group, with the PUC for review and approval.
- In the event that the Company, the Division, and OER unanimously agree to adjust the schedule of meetings in the public interest, they are empowered to do so without

the agreement of all signatories to this Settlement Agreement, but they shall advise all signatories of the revised schedule.

- The Division and OER commit to leverage the guidance of the PST Advisory Group in its engagement with the Company on the development of future PST program development.
- The PST Advisory Group shall participate in two to four technical sessions or open meetings with the PUC. The PUC and all PST Advisory Group members shall have the opportunity to provide input on the creation of the agendas for these technical sessions or open meetings. The subcommittees of the PST Advisory Group shall attend and, if the PUC so directs, shall make presentations at these technical sessions or open meetings.

18. Capital Efficiency Mechanism for Narragansett Electric

The PUC is considering the Capital Efficiency Mechanism for Narragansett Electric in Docket No. 4857.

19. Performance-Based Incentive Mechanisms

The Settling Parties agree that the goal of a performance incentive mechanism is the development of meaningful performance incentives in support of key state energy policy goals. This Settlement Agreement represents a starting point for the role of performance incentive mechanisms in Rhode Island, which the Settling Parties expect will grow over time, both in terms of their financial importance and their role in driving important outcomes. Currently, the Company shall not earn any performance incentives based on values associated with unquantified benefits. The Settling Parties agree that the Division, in consultation with the Company, OER, and the members of the PST Advisory Group shall develop transparent and

well-defined metrics for describing unquantified benefits and providing evidence that such unquantified benefits have been advanced, for purposes of providing a future value for a performance incentive to drive such unquantified benefits. The Settling Parties further acknowledge that the appropriate mix and definitions of performance incentive mechanisms may evolve over time as PST progresses.

Narragansett Electric will implement the following performance incentive mechanism: System Efficiency: Annual MW Capacity Savings. The System Efficiency metric includes minimum, mid, and maximum targets, with an increasing earning opportunity at each level. The Company may earn proportionally for achievements that fall between target levels up to the maximum level.²¹ The potential earnings for the System Efficiency metric are calculated as 45% of the Quantified Net Benefits of achieving the metrics, as set forth in Attachment 28. The maximum earnings the Company can achieve from the System Efficiency metric are set forth in the table below.

2019	2020	2021
\$362,085	\$622,370	\$944,141

Additionally, the Settling Parties have identified several additional metrics to be tracked at this time, and for some of which the Company may become eligible for a financial performance incentive during the term of the MRP. These additional metrics are: (1) Distributed Energy Resources: Installed Energy Storage Capacity; (2) Distributed Energy Resources, CO2: Electric Vehicles; (3) Distributed Energy Resources: Light Duty Government and Commercial Fleet Electrification; (4) PST Enablement: Awarded Low-income and Multi-unit EVSE Sites; and (5)

²¹ In other words, for achievement at or above the minimum and up to the target level, the award will be calculated as the product of the maximum earnings level and the ratio of the achieved level to the maximum target.

PST Enablement: Distributed Generation (DG) Interconnection – Time to ISA.

a. *System Efficiency: Annual MW Capacity Savings.* The metric for this performance incentive mechanism will be the mega-watts (MW) of annual peak capacity savings. This metric is intended to reflect avoided capacity coincident with the ISO-NE peak hour. The proposed list of eligible resources for Annual MW Capacity Savings includes: (i) Demand Response, which will not be eligible for an incentive under the existing energy efficiency shareholder incentive; (ii) incremental net-metered behind-the-meter PV distributed generation in excess of Company forecast levels; (iii) incremental installed energy storage capacity; and (iv) any additional actions that the Company can identify to reduce peak demand, including non-wires alternatives expected to influence system peak that are not captured already under this or other metrics, and partnerships with third parties to provide peak reduction solutions. Achievement of the target is not based on any pre-determined mix of qualifying resources, but rather a total count of MW savings across all categories. The table below sets forth the targets and maximum earnings opportunity.

Annual MW Capacity Savings: Targets and Maximum Earnings Opportunity

	2019	2020	2021
Minimum	14	17	21
Target	17	21	24
Maximum	20	25	29
Earnings at Maximum (\$000)	\$362.09	\$622.37	\$944.14

For reporting performance on this metric, Narragansett Electric will submit resource-specific estimated MW savings. For existing eligible resources, Narragansett Electric will base savings on the following assumptions:

- For solar PV, Narragansett Electric will estimate the peak impact as the product of annual incremental installed capacity in excess of forecast levels available at the time

of the ISO New England system peak, multiplied by a coincidence factor of 0.21.

Narragansett Electric will report the forecast capacity and peak impacts of PV included in its annual peak forecast for the compliance year from the most recent annual forecast.²²

- For residential Demand Response under the Company's Connected Solutions program, Narragansett Electric will report the number of participating customers multiplied by a deemed kW savings value per thermostat of 0.46 kW. Should the Company modify the structure of this program or otherwise expand residential demand response offerings, the calculation of savings will be appropriately modified. Any such modifications to the incentive calculation will be presented to the PUC for approval prior to the commencement of the relevant performance year.
- For commercial and industrial Demand Response, Narragansett Electric will report the average observed MW savings over called events.
- For any resources not listed above, Narragansett Electric will report the calculation of resource-specific savings and provide explanation of any underlying assumptions.

b. *Distributed Energy Resources*

i. Installed Energy Storage Capacity

This metric will be a scorecard metric as described in subsection f., below.

ii. CO₂: Consumer Electric Vehicles

The metric is the incremental avoided tons of CO₂ resulting from the Company's proposed Electric Transportation Initiative, as shown in the table below. The Company forecast was developed by applying a growth rate in EV sales for 2018 through 2021 derived from the

²² For example, the Company's 2018 peak forecast projects incremental peak impacts from load-reducing solar PV in 2019 of 7.41 MW (35.3 MW of incremental capacity) in 2019.

Energy Information Administration’s Annual Energy Outlook 2018 projection of EV sales in New England, to historic data on EV registrations in Rhode Island from R.L. Polk. The Company’s forecast for incremental EVs adopted for years 2019 through 2021 is provided in the table below.

**Narragansett Electric Forecast of Incremental EVs Registered in Rhode Island
(Number of incremental vehicles)**

	2019	2020	2021
Forecast incremental EVs	857	1,180	1,644

The Company will track and report performance by (1) calculating incremental vehicles above Company forecasts; (2) calculating the number of incremental BEVs and PHEVs by multiplying the total number of incremental vehicles by the share of all new registrations that were BEVs, and the share of all new registrations that were PHEVs; and (3) applying per vehicle annual CO2 emissions reduction values as follows:

- Incremental BEVs x 2.32 metric tons CO2
- Incremental PHEVs x 2.08 metric tons CO2

The PUC will evaluate whether to allow a financial performance incentive to be attached to the achievement of this metric prior to Rate Year 2.

iii. Light Duty Government and Commercial Fleet Electrification

This metric is intended to capture the impact of Narragansett Electric’s electric transportation initiative on light-duty fleet adoption in Rhode Island relative to predicted market trends. The metric will measure incremental increase – above predicted levels – of government and commercial light-duty fleet electric vehicles in the state on an annual basis. The Company will track and report the incremental registrations (both in total and above the Company forecast

included in Attachment 29) based on R.L. Polk data or an acceptable substitute should the Polk data become unavailable. The PUC will evaluate whether to allow a financial performance incentive to be attached to the achievement of this metric prior to Rate Year 2.

c. *PST Enablement.* This category of incentives will track Narragansett Electric's activities that support broad access to the benefits of power sector transformation activities, or otherwise provide foundational support for power sector transformation objectives. These incentives are reflective of the qualitative benefits of this support and enablement. Incentives are described in more detail below:

i. Activated Apartment Building and Disadvantaged Community EVSE Sites

This metric will track the Company's activation of EVSE sites for apartment buildings and disadvantaged communities. The Company will report the in-service date for make-ready work and charging stations installed in both site categories.

ii. Distributed Generation (DG) Interconnection – Time to ISA

This metric will be a scorecard metric, as described in subsection f., below.

d. *Calculating Incentive Value.* For the System Efficiency performance incentive, the value of the incentive is established using the following steps:

- the quantified net benefits of the relevant initiative were estimated using the Company's BCA assumptions and methodology; and
- 45% of the quantified net benefits were used to determine the utility incentive; the remaining 55% of net benefits will go to customers.

When the Company achieves one of the System Efficiency targets, it will receive an incentive based upon the dollar value associated with the relevant target. The magnitude of the utility incentive will be based upon the BCA results used at the time the Commission approves

the Performance Incentive Mechanism. The utility incentive will not be modified based on after-the-fact reassessment of benefits and costs of the initiatives.

The Settling Parties agree that establishing a certain and meaningful incentive value is essential in order to most effectively drive Company performance in the delivery of the objectives supported by the incentive, and for these reasons, the Settling Parties agree that the System Efficiency Annual MW Capacity Savings performance incentive mechanism targets require a presumption of cost-effectiveness to establish the incentive size based on the BCA results, as more fully described below. For this initiative, the Company will be allowed to earn the incentive regardless of whether it turns out to be cost-effective. The Settling Parties agree and acknowledge that the Company's demand response initiatives are expected to play an important role in achievement of the System Efficiency Annual MW Capacity Savings targets. It is not clear that these programs will be demonstrated as cost-effective based on quantifiable benefits in their initial years; however, given their expected value to the system as they are further developed and expanded, their importance to enabling investment in and development of load management solutions, and the potential savings to participating customers, they are assumed to be cost-effective (via the assumed ratio of costs to benefits for the incentive) for the purpose of setting the value of the Annual MW Capacity Savings incentive.

e. *Reporting Performance.* Narragansett Electric will file an annual performance incentive mechanism report with the PUC no later than March 1 annually (1) comparing the Company's performance relative to each performance incentive mechanism target; (2) describing the savings achieved, (3) calculating incentives earned, including proration of any incentives related to metric achievement between the minimum, midpoint, and the maximum target levels, (4) any targets not achieved, and (5) demonstrating the cost and benefit

impacts of the metric on the energy system, customers, and society using the Docket No. 4600 Benefit-Cost Framework. Narragansett Electric will file a mid-year update on or before September 1 annually that describes the Company's progress toward each Performance Incentive Mechanism metric target and the actions taken by the Company to achieve target performance. The mid-year update also will include an assessment of whether (and, for the Annual MW Capacity Savings performance incentive mechanism, through which measures) the Company expects to meet its annual performance incentive mechanism targets.

f. *Scorecard Metrics.* The Company is proposing to track and report the following scorecard metrics:

i. DG Interconnections

Narragansett Electric will track the number of business days from executed ISA to distribution system modifications by category of interconnection (*i.e.*, simple, expedited, standard). For each category, the Company will calculate and report the averages and the variances from the averages.

ii. DG-Friendly Substation Transformers

Narragansett Electric will base reporting on the number of incremental 3VO installations completed.

iii. Utilization of EVSE in Low-income Areas

Narragansett Electric will report utilization rates at all EVSE sites installed through the Charging Station Demonstration Program. The reports will identify which EVSE sites are in low income areas.

iv. Reduction of Uncollectable Debt

Narragansett Electric will report enrollment in the Arrearage Management Plan (AMP) at the point of potential termination from service for purposes of developing a baseline and eventually setting an improvement target from this baseline, to maintain service to the low-income customer and prevent expansion of uncollectible debt.

v. Increased Stability of Service through Increased Enrollment in the Low Income Discount

Narragansett Electric will report enrollment in the low-income discount, represented by number of customers receiving delivery service on Rate A-60, for the purposes of developing a baseline and eventually setting an enrollment target that improves upon the baseline. Such a target would incentivize expanded enrollment on Rate A-60 thus increasing stability of service and reducing the frequency of the termination/reconnection cycle. This provision shall not be construed to allow customers to remain on Rate A-60 if they no longer are eligible for Rate A-60.

vi. NPP Residential Customer Demand Response Participation

Narragansett Electric will work with NPPs to measure the number of NPP residential customers participating in Narragansett Electric's Connected Solution program or any future demand response program that works with WiFi-enabled or smart thermostat(s) and other connected smart devices to reduce electricity use during periods of high energy demand.

vii. Distributed Energy Resources - Installed Energy Storage Capacity

Narragansett Electric will track incremental installed energy storage capacity. It is the intention of the Settling Parties that Narragansett Electric will coordinate deployment of energy storage with its distribution system planning and heat map activities, and that storage activities

undertaken by Narragansett Electric should provide opportunities for market engagement by NPPs and other third-parties.

viii. PST Enablement - Distributed Generation (DG) Interconnection – Time to ISA

Narragansett Electric will track its performance for the simplified, expedited without supplemental review, and standard tracks in meeting or outperforming tariff timelines for providing an executable interconnection service agreement. Narragansett Electric's performance will be measured by:

- aggregating the average time measured in Business Days necessary to issue an executable Interconnection Service Agreement commencing from the date an application is received, for each track identified above (Aggregate Necessary Tariff Time Frames), and comparing such performance to
- the total aggregate number of Business Days allowed by its Interconnection Tariff to issue an executable Interconnection Service Agreement commencing from the date an application is received (Aggregate Allowed Tariff Time Frames).

g. *Recovery of Earned Incentives.* The Company shall recover any approved performance incentives earned for achieving the performance incentive mechanism targets listed above through the operation of a new reconciling mechanism pursuant to the Performance Incentive Recovery Provision. The Company will make an annual filing with the PUC to request recovery of performance incentives earned pursuant to the Performance Incentive Mechanisms authorized by the PUC and approval of a separate Performance Incentive Factor filing based upon the requested earned incentives.

20. Deferral of Certain “Special Sector” Program Costs and Revenues

- a. In recognition of the uncertainty of timing and control of certain Special Sector Programs identified below, a deferral mechanism shall be implemented in accordance with this section.
- b. The Special Sector Programs to which this section shall apply includes:
 - i. The Electric Transportation program, described in Section 17.a. of this Agreement; and
 - ii. The Energy Storage Demonstration program, described in Section 17.d. (collectively referred to as the Special Sector Programs).
- c. The costs and annual base distribution rate allowances allocated to each of the Special Sector Programs shall be separately monitored and reconciled at the end of each Rate Year.
- d. To the extent the base distribution rate allowances allocated to the program exceed the actual costs incurred, the Company shall record the difference to a regulatory liability account. To the extent the deferral was caused by a reasonable delay in implementation, the deferral shall be applied to program cost incurrence when the program costs are later incurred. To the extent the deferral was caused by a cost reduction or funds not spent for reasons other than a reasonable delay, the deferral shall be held for the benefit of customers and the PUC shall determine how it shall be applied against other programs or costs that otherwise might have been borne by customers. The amount of any such deferral shall incur carrying charges at the WACC for Narragansett Electric for capital expenses and the customer deposit rate for Narragansett Electric for O&M costs.

e. To the extent the actual costs of a program exceed the base distribution rate allowances that were allocated to the program, the overspending shall be borne by the Company, unless the PUC allows the Company to record the difference to a regulatory asset for recovery at a later date. The PUC shall be under no obligation to approve a regulatory asset; however, a regulatory asset shall only be approved if the Company demonstrates that the costs were prudently incurred consistent with the program objectives and the overspending was out of its reasonable control.

21. Next Rate Case Filing

The Company's next general rate case shall be a combined electric and gas rate case unless the Company and the Division mutually agree that they should be filed separately. When the Company's next rate case is filed, the Company shall file complete revenue requirements for the rate year and no fewer than two additional consecutive twelve-month rate-year periods, to facilitate the PUC's and Division's review and potential approval of a multi-year rate plan.

a. The Company shall submit its next rate case filing to the PUC so that new base distribution rates take effect no later than September 1, 2022. Nothing in this Settlement Agreement shall preclude the Company from filing its next general rate case at any time earlier during the term of this Rate Plan or any extension thereof.

b. If the Division provides its consent to an extension of the term of this Rate Plan, the Division may specify another date upon which new base distribution rates are to become effective beyond September 1, 2022 in its place, but is not required to do so.

i. To the extent new base distribution rates resulting from the filing of the Company's next general rate case are not in effect by September 1, 2022, the Settlement

Agreement shall remain in effect during the interim and if required, the Performance Incentive Mechanism provision shall be extended to cover the additional interim period.

22. Additional Provisions

a. *Excess Deferred Taxes True Up.* As discussed in the Company's response to PUC 4-1 (Supplemental), a copy of which is provided as Attachment 24 hereto, to account for revisions to the corporate tax rate modified by the federal Tax Cuts and Jobs Act (Tax Act), the Company has recorded the \$116 million and \$51 million estimates of customer-related excess deferred federal income tax for Narragansett Electric and Narragansett Gas, respectively, to a tax regulatory liability account in recognition that customers will be refunded those excess deferred taxes. The Company will be able to calculate more accurately excess deferred taxes and the timing over which they should be returned when its fiscal year ended March 31, 2018 audited financial statements are completed during the late summer 2018. These estimates will become final with the filing of the fiscal year ended March 31, 2018 federal income tax return in December 2018, and the excess deferred tax regulatory liability will be adjusted to reflect that final balance.

This Settlement Agreement provides for a reduction to Narragansett Electric and Narragansett Gas revenue requirements by a high level estimate of excess deferred income tax amortization of \$5.1 million and \$2.0 million, respectively. The Company will true up these estimates in a supplemental compliance filing to be filed with the PUC in Docket No. 4770 after the Company files its Fiscal Year 2018 federal income tax return in December 2018. The true-up will reconcile the impact of the actual excess deferred tax amortization with the estimated amounts identified above, and will determine the final revenue requirements for Narragansett Electric and Narragansett Gas effective September 1, 2018. From these supplemental revenue

requirements, the Company will calculate the difference between the revenue requirements it began recovering September 1, 2018 and the revenue requirements in the supplemental compliance filing in Docket No. 4770 (Deferred Tax Differential). The Company will submit to the PUC for its review and approval a filing to address the ratemaking treatment of the Deferred Tax Differential for Narragansett Electric and Narragansett Gas no later than March 1, 2019. The filing shall propose the following:

Narragansett Electric: The Company will provide the calculation of the Narragansett Electric Deferred Tax Differential and the revised Annual Target Revenue (ATR) of its Revenue Decoupling Mechanism (RDM), reflecting an adjustment for the Deferred Tax Differential. In addition, Narragansett Electric will evaluate the appropriateness of proposing revised base distribution rates based upon the amount of the true-up to the revenue requirement to reflect the effect of the Deferred Tax Differential if the difference is determined to be of an amount that adjusting base distribution rates would be appropriate. The Company will present its evaluation on the necessity of revising base distribution rates as part of its proposal regarding the ratemaking treatment of the Deferred Tax Differential.

Narragansett Gas: The Company will provide the calculation of the Narragansett Gas Deferred Tax Differential. In addition, Narragansett Gas will evaluate the appropriateness of (i) proposing revised base distribution rates based upon the amount of the true-up to the revenue requirement to reflect the effect of the Deferred Tax Differential as described below, or (ii) proposing that the Deferred Tax Differential be credited through the DAC if the difference is determined to be relatively small such that adjusting base distribution rates would not be needed. The Company will present its evaluation on the necessity of revising base distribution rates as part of its proposal regarding the ratemaking treatment of the Deferred Tax Differential. If

Narragansett Gas proposes to change base distribution rates, the filing shall include the following: (1) for all customers, new base distribution rates effective on a prospective basis on a date determined with respect to the timing of the supplemental compliance filing; (2) for customers included in Narragansett Gas's RDM,²³ revised target revenue-per-customer amounts based upon the supplemental revenue requirements; and (3) for customers excluded from Narragansett Gas's RDM,²⁴ the difference for this group of customers be credited to, or recovered from, these customers through a one-time adjustment included in the DAC filing submitted to the PUC by August 1, 2019. If Narragansett Gas revises its target revenue-per-customer amounts, the revised revenue-per-customer amounts shall be reflected in its subsequent RDM reconciliation filings submitted to the PUC annually by July 1 until the effective date of base distribution rates resulting from a future general rate case. Any revised target revenue-per-customer amounts shall be subject to Section 22.c. of this Settlement Agreement.

For this high level estimate, this Settlement Agreement provides for the amortization of all property related excess deferred taxes over an approximate 30 year average service life of its assets. The composite depreciation rate currently in effect is 3.40 percent and 3.38 percent for Narragansett Electric distribution plant and Narragansett Gas plant, respectively, both of which equate to average service lives of just under 30 years. The Company agrees to amortize its non-property related excess deferred taxes over a period of ten years, as was proposed by the Division, until the true-up is performed.

b. *Minimum Funding Obligation.* For the purpose of determining its "Minimum Funding Obligation" and the carrying costs that apply to that obligation, the

²³ Pursuant to Narragansett Gas's tariff, customers included in the RDM are those receiving service on Narragansett Gas's residential, small C&I, and medium C&I rate schedules.

²⁴ Pursuant to Narragansett Gas's tariff, customers excluded from the RDM are those receiving service on Narragansett Gas's large C&I, extra-large C&I, and non-firm rate schedules.

Company shall be permitted to combine the funding of pensions and post-employment benefits other than pensions (PBOPs), thereby offsetting, for example, any deficiencies in PBOPs funding with any excess pension funding. The Company will be required to accrue and defer carrying charges on only the net unfunded pension/PBOP amount. The Minimum Funding Obligation is the Company's obligation to contribute amounts recovered from customers to the pension and PBOP plans as it is being recovered. The Minimum Funding Obligation level is equal to the amount billed to customers plus the amounts of capitalized pension and PBOP costs. The amount billed to customers includes (1) the pension and PBOP allowance in base distribution rates, and (2) plus or minus the amount billed or credited to customers through the PAF. If the Company does not fund its pension and PBOP plans at the Minimum Funding Obligation level, the Company will pay a carrying charge to customers at the weighted average cost of capital. This payment will be applied to the cumulative five-quarter average shortfall between the Minimum Funding Obligation level and amounts the Company contributes to the pension and PBOP plans, plus amounts paid to the Service Company for allocated pension and PBOP costs. The ability to combine the funding of pension and PBOPs will give the Company the flexibility to avoid permanently overfunding the PBOP plan, while at the same time, giving the Company the ability to meet its Minimum Funding Obligation.

c. *Narragansett Gas Forecast of Plant Additions for Gas Growth.* To ensure that customers will be credited with an accurate level of gas growth revenue and to address the Division's concern regarding the Company's growth capital forecast, this Settlement Agreement provides that Narragansett Gas will calculate the difference between the forecast gas-growth capital revenue requirement and the actual gas growth capital revenue requirement in Rate Year 1. Attachment 25 provides an illustrative calculation to be employed at the end of Rate

Year 1. As shown on this attachment, this difference shall be added to or subtracted from the total Revenue Decoupling Mechanism (RDM) class revenue requirement used to establish base distribution rates in these proceedings. This adjusted total RDM class revenue requirement will be divided by the actual average customer totals per rate class during Rate Year 1 to arrive at the class revenue per customer amount to be used in the calculation of RDM adjustments for all periods commencing September 1, 2018, and until new base distribution rates are established for gas service. The method illustrated in Attachment 25 does not establish any precedent for the calculation of RDM adjustments subsequent to future gas base distribution rate cases.

d. *Charitable Contributions.* Intentionally Deleted.

e. *American Gas Association (AGA) and Edison Electric Institute (EEI)*

Annual Membership Dues. To settle concerns raised by NERI associated with lobbying costs, which are not included in the Company's revenue requirements for Narragansett Gas and Narragansett Electric, charged to the Company by AGA and EEI, respectively, the Company has agreed to send letters to AGA and EEI requesting information regarding how such trade associations allocate costs between lobbying and non-lobbying expenses and substantiation of the allocation. The Company will provide the responses to the Division and the PUC.

f. *Low Income Reporting.* The Company, the Division, and GWC shall work together with PUC Staff to develop reporting requirements for existing and new electric and natural gas low-income rates, programs, and discounts. These reporting requirements shall be designed to: (1) inform the PUC how the low-income rates, programs, and discounts advance the rate design principles set forth in the Docket 4600 Guidance Document, and (2) provide information needed to support future investigation into a more dynamic low-income-rate design.

23. Other Provisions

a. The Settling Parties agree to request that the PUC adopt the terms of this Settlement Agreement without modification. The Settling Parties intend that this Settlement Agreement will be adopted by the PUC as being in the public interest and agree individually to advocate its adoption by the PUC in its entirety and to act so as to expedite that result.

b. The Settling Parties intend this Settlement Agreement to be a complete resolution of all issues in Docket No. 4770 and Docket No. 4780. It is understood that each provision of this Settlement Agreement is in consideration and support of all the other provisions, and expressly conditioned upon acceptance by the PUC. Except as expressly set forth herein, none of the Settling Parties is deemed to have approved, agreed to, or consented to any principle, methodology, or interpretation of law underlying or supposed to underlie any provision herein, including without limitation with respect to the PUC's August 3, 2018 open meeting decisions (and rationale therefor) regarding charitable contributions, carrying charges, and R.I. Gen. Laws § 39-2-1.2.

c. Except as otherwise stated in this Settlement Agreement, the provisions of the Settlement Agreement apply solely to, and are binding only in the context of, this Settlement Agreement and these proceedings. It is not the intention of this Settlement Agreement that it establishes any binding precedent. None of the positions taken by any Settling Party with respect to this Settlement Agreement nor the fact that a Settling Party is a signatory to this Settlement Agreement, may be referred to, cited by, or relied upon by anyone in any manner as precedent or otherwise in any other proceeding before the PUC or any other regulatory body or before any court of law as proof of assent or agreement by such Settling Party to the approval of any particular regulatory policy or principle that may be interpreted to arise out of this Settlement

Agreement. Concessions made by any Settling Party on any issue do not preclude that party from addressing such issues in future rate proceedings or in other proceedings. Any failure by any Settling Party to abide by the terms of this subsection shall not give rise to any claim against such Settling Party for breach of this Settlement Agreement, unless: (i) the Settling Party is provided notice of such failure and an opportunity to cure such failure; and (ii) such Settling Party does not cure such failure within seven (7) business days after such notice.

d. The Settling Parties recognize that certain provisions of this Settlement Agreement contemplate actions to be taken in the future and agree to cooperate with each other in good faith in taking such actions.

In the event of any disagreement over the interpretation of this Settlement Agreement that cannot be resolved informally among the Settling Parties, the party claiming a dispute will serve a Notice of Dispute on the remaining parties, briefly identifying the provision or provisions of this Settlement Agreement under dispute and the nature of the dispute, and convening a conference in a good faith attempt to resolve the dispute. If any such efforts are not successful in resolving the dispute among the Settling Parties, the matter will be submitted to the PUC for resolution.

e. Except as set forth herein, following the expiration of the term of the Rate Plan, all provisions of this Settlement Agreement will continue until changed by order of the PUC. Except as expressly provided otherwise, any targets, goals, deferral thresholds, or other similar items set forth in this Settlement Agreement for Rate Year 3 will continue beyond Rate Year 3 until modified by the PUC.

f. Nothing in this Settlement Agreement will be construed as precluding the active parties from convening additional conferences and from reaching agreement to extend this

Settlement Agreement on mutually-acceptable terms and from presenting an agreement concerning such extension to the PUC for its approval.

g. The Settling Parties recognize that the PUC has an ongoing obligation to modify rates to protect the public against improper and unreasonable rates that cannot be precluded by a settlement agreement

h. This Settlement Agreement sets forth the entire agreement of the Settling Parties and supersedes any prior or contemporaneous written documents or oral understandings among the Settling Parties concerning the matters addressed herein. In the event of any conflict between this Settlement Agreement and any other document addressing the same subject matter, this Settlement Agreement will control. Notwithstanding the foregoing, nothing in this Settlement Agreement is intended to modify the terms of the Docket No. 4686 Settlement Agreement.

i. Notices and other communications required to be provided or made under the Settlement Agreement shall be in writing and shall be deemed to have been given:

- i. When delivered by hand (with written confirmation of receipt);
- ii. When received by the addressee if sent by a nationally recognized overnight courier or by certified or registered mail, return receipt requested, postage prepaid; or
- iii. On the date sent by e-mail if sent before 5:00 p.m., recipient's time, and on the next day that is not a Saturday, Sunday, or Federal Holiday, if sent thereafter; in each case, to the applicable address and/or email address set forth on Attachment 27; provided that, if any notice is tendered to an addressee and the delivery thereof is refused by such addressee, such notice shall be effective upon such tender.

Any party hereto may change its address and/or email address reflected in Attachment 27 upon 15 days' prior notice of such change to the other parties hereto.

ARTICLE III: SETTLEMENT CONDITIONS

- A. This Settlement Agreement is the result of negotiations among the Settling Parties. The discussions that have produced this Settlement Agreement have been conducted on the explicit understanding that all offers of settlement and discussions relating hereto are and shall be privileged, shall be without prejudice to the position of any party or participant presenting such offer or participating in any such discussion, and are not to be used in any manner in connection with these or other proceedings involving any one or more of the parties to this Settlement Agreement or otherwise. The agreement by a party to the terms of this Settlement Agreement shall not be construed as an agreement as to any matter of fact or law for any other purpose.
- B. Unless expressly stated herein, the making of this Settlement Agreement establishes no principles and shall not be deemed to foreclose any Settling Party from making any contention in any other proceeding or investigation.
- C. The Settling Parties submit this Settlement Agreement on the condition that it be approved in full by the PUC and on the further condition that, if the PUC (i) rejects this Settlement Agreement; (ii) fails to accept this Settlement Agreement as filed; or (iii) accepts this Settlement Agreement subject to conditions unacceptable to any Settling Party hereto, then this Settlement Agreement shall be deemed withdrawn, shall not constitute part of the record in any proceeding or be used for any purpose, and shall be deemed null and void, and the Settling Parties will be free to pursue their respective positions in these proceedings without prejudice.

- D. The Settling Parties recognize that the PUC has an ongoing obligation to modify rates to protect the public against improper and unreasonable rates, and that obligation cannot be precluded by a settlement agreement.
- E. This Settlement Agreement may be signed in counterparts, each of which shall be deemed an original and all of which together shall constitute one in the same document, and will be binding on each Settling Party when the counterparts have been executed.

[SIGNATURE PAGES FOLLOW]

IN WITNESS WHEREOF, the parties agree that this Settlement Agreement is reasonable and have caused this document to be executed by their respective representatives, each being fully authorized to do so, as of this 16th day of August, 2018.

Summary of Adjustments - Settlement Filing to Compliance Filing
ELECTRIC Operation & Maintenance Expense

<u>Labor</u>	
1 Settlement Balance	\$51,707,475
2 Remove RE Growth labor captured in Docket 4748 (PUC 3-32/PUC Decision)	(\$347,134)
3 Additional Service Company A&G overhead study adjustment (DIV 21-10 Supplemental)	(\$315,185)
4 Remove lobbying costs (Record request 1-4)	(\$178,815)
5 Remove Band A non-financial variable pay (Rebuttal adjustment)	(\$112,087)
6 Update 2018 non-union wage increase from 3.0% to 3.25% (Rebuttal adjustment)	\$69,444
7 Adjusted O&M % for balance sheet adjustments (accounts 242/184) (PUC 1-31)	(\$13,192)
8 Additional rebuttal adjustments	(\$825)
9 FTE Smoothing (Rebuttal adjustment)/Remove CEI Marketing Analyst double-counted in Customer Affordability Program (DIV 3-7/DIV 3-9)	(\$395)
10 Compliance Balance	\$50,809,286
11	
12 <u>Health Care</u>	
13 Settlement Balance	\$6,458,547
14 Labor flow-through	(\$67,122)
15 Compliance Balance	\$6,391,424
16	
17 <u>Group Life Insurance</u>	
18 Settlement Balance	\$567,542
19 Remove lobbying costs (Record Request 1-4); labor flow-through	(\$6,895)
20 Compliance Balance	\$560,647
21	
22 <u>Thrift Plan</u>	
23 Settlement Balance	\$2,426,402
24 Remove lobbying costs (Record request 1-4); labor flow-through	(\$27,930)
25 Compliance Balance	\$2,398,472
26	
27 <u>Service Company Rents</u>	
28 Settlement Balance	\$13,285,082
29 Revised IS forecast (DIV 38-1)	(\$276,029)
30 Microsoft SaaS Contract/Renewal (Rebuttal adjustment)	\$107,958
31 Compliance Balance	\$13,117,011
32	
33 <u>Joint Facilities</u>	
34 Settlement Balance	\$1,065,547
35 Reclass of IFA Rents adjustment (Rebuttal adjustment)	\$130,387
36 Removal of Airplane charge from Joint Facilities (Rebuttal adjustment)	(\$19,313)
37 Compliance Balance	\$1,176,621
38	
39 <u>Uninsured Claims</u>	
40 Settlement Balance	\$1,858,628
41 Labor flow-through	(\$18,456)
42 Compliance Balance	\$1,840,172
43	
44 <u>PBOP</u>	
45 Settlement Balance	\$4,901,371
46 Labor flow-through	(\$85,439)
47 Compliance Balance	\$4,815,932
48	
49 <u>Pension</u>	
50 Settlement Balance	\$6,233,401
51 Labor flow-through	(\$232,527)
52 Compliance Balance	\$6,000,874
53	
54 <u>Other Operating and Maintenance Expenses</u>	
55 Settlement Balance	\$38,809,400
56 Contractors - Service Company A&G overhead study adjustment (DIV 21-10 Supplemental)	(\$748,196)
57 Donations - remove all charitable contributions as disallowed (PUC Decision)	(\$606,735)
58 Third Party Rents - Reclass of IFA Rents adjustment (Rebuttal adjustment)	\$531,517
59 Other Benefits - Reclass labor portion of RE Growth costs to labor (PUC 3-32/PUC Decision)	\$331,214
60 Contractors - Contact Voltage - remove from base rates to recover through ISR (Rebuttal adjustment)	(\$231,986)
61 Consultants - Remove lobbying costs (Record request 1-4)	(\$105,882)
62 Employee Expenses - Service Company A&G overhead study adjustment (DIV 21-10 Supplemental)	(\$103,094)
63 Contractors - Update RE Growth costs to most recent filing, Docket 4748 (PUC Decision)	\$3,142
64 Other - Update RE Growth costs to most recent filing, Docket 4748 (PUC Decision)	\$1,887
65 Consultants - Update RE Growth costs to most recent filing, Docket 4748 (PUC Decision)	(\$441)
66 Compliance Balance	\$37,880,827
67	
68 <u>Gas Business Enablement</u>	
69 Settlement Balance	\$460,685
70 Revised project forecast with change in allocations (DIV 17-13)	\$21,356
71 Compliance Balance	\$482,041
72	
73 Total Settlement balance for items above	\$127,774,080
74 Total Compliance balance for items above	\$125,473,307
75 Total change in O&M expense (agrees to Page 2, Line 35)	(\$2,300,773)

Line Notes

12(g) (h) (i) - Change in Cash Working Capital caused by (1) \$1.8 million increase to correct error in Settlement filing; CWC was calculated on total O&M of \$133.3 million , which should have been calculated on \$148.7 million (total \$152.9 million minus uncollectible expense of \$4.2 million). Results in an increase of \$1.85 million in CWC from Settlement ; (2) decrease in O&M expense from Settlement to Compliance drives a decrease of \$275,000; and (3) decrease in tax expense drives a decrease of \$691,000 from Settlement.

16(g) (h) (i) - Change in Unamortized debt issuance costs related to new debt issued in July 2018. Original estimate of \$2.3 million over a 30 year term; revised to \$1.6 million over a 10 year term.

¹ Gas Information System

Line Notes

19(g) (h) (i) - Change in Cash Working Capital caused by (1) \$450,000 increase to correct error in Settlement filing; CWC was calculated on total O&M of \$78.8 million, which should have been calculated on \$83.8 million (total \$87.2 million minus uncollectible expense of \$3.4 million). Results in an increase of \$450,00 in CWC from Settlement; (2) decrease in O&M expense from Settlement to Compliance drives a decrease of \$92,000; and (3) decrease in tax expense drives a decrease of \$187,000 from Settlement.

24(g) (h) (i) - Change in Unamortized debt issuance costs related to (1) settlement rate base erroneously included total unamortized issuance costs instead of the gas-only portion - decrease of \$1.62 million; and (2) revised estimate of issuance costs in July 2018. Settlement included estimated issuance costs of \$2.3 million over a 30 year term; revised to \$1.6 million over a 10 year term for compliance - decrease of \$225,000.

12	5 Year Average (2013-2017)	1/ (\$198,662)			(\$436,861)	
13						
14	Percentage Charged to Narragansett Electric - Total	100.00%			6.32%	
15	Percentage Charged to Narragansett Electric - O&M Labor	46.60%			56.93%	
16						
17	Total 5 Year Average Charged to O&M	(\$92,576)			(\$15,728)	(\$108,305)
18						
19	Minimum Anticipated Expense		2/			\$0
20						
21	Greater of Lines 12 or 17					\$0
22						
23	Normalizing Adjustment					\$333,759

1/ 5 Year Average to be updated to include FY 2018 costs when the reports are made available by the Company's actuary

2/ The Company records a liability on its balance sheet in accordance with FAS 112/ASC 712 to accrue for the costs of benefits to employees who are in an inactive status, primarily employees who are on long-term disability. Adjustments in any particular year can increase or decrease the reserve resulting in positive or negative expense. Reserve decreases and the resulting negative expense would not be expected to occur on a long-term basis nor be reflected as positive income in a cost of service. As such, the minimum expected cost for FAS 112/ASC 712 for rate making purposes would be \$-0-.

14 Percentage Charged to Narragansett Electric - Total	100.00%			3.70%	
15 Percentage Charged to Narragansett Electric - O&M Labor	44.82%			59.11%	
16					
17 Total 5 Year Average Charged to O&M	(\$89,040)			(\$9,546)	(\$98,586)
18					
19 Minimum Anticipated Expense 2/					\$0
20					
21 Greater of Lines 12 or 17					\$0
22					
23 Normalizing Adjustment					\$238,762

1/ 5 Year Average to be updated to include FY 2018 costs when the reports are made available by the Company's actuary

2/ The Company records a liability on its balance sheet in accordance with FAS 112/ASC 712 to accrue for the costs of benefits to employees who are in an inactive status, primarily employees who are on long-term disability. Adjustments in any particular year can increase or decrease the reserve resulting in positive or negative expense. Reserve decreases and the resulting negative expense would not be expected to occur on a long-term basis nor be reflected as positive income in a cost of service. As such, the minimum expected cost for FAS 112/ASC 712 for rate making purposes would be \$-0-.

Postal Service Announces 2017 Mailing Services Prices

Single Price for Commercial Letters up to 3.5 ounces; Adjusts FSS Pricing; Allows Extra Weight for Standard Flats

WASHINGTON — The United States Postal Service today filed notice with the Postal Regulatory Commission (PRC) of price changes for Mailing Services products planning to take effect in January 2017. The proposal includes a two cent increase in the price of a First-Class Mail Forever stamp, returning the price to 49 cents, which was the price of a Forever stamp before the Postal Service was required to remove the exigent surcharge by the PRC. The new prices, if approved, include a single price for First-Class Mail commercial presort letters weighing up to 3.5 ounces and a reduction in the one ounce meter price to 46 cents. This pricing strategy is designed to keep bills and statements in the mail by continuing to add value to commercial First-Class Mail.

Standard Mail is being rebranded as USPS Marketing Mail to better align the product name with our customer's use of this mail class. Proposed changes in Marketing Mail include removing the Flats Sequencing System (FSS) pricing which was of concern to mailers. This change will ensure that mailers pay for flats based on their volume density instead of the equipment flats are processed on. In addition, other changes include increasing the piece

pound breakpoint from 3.3 to 4.0 ounces for Marketing Mail Flats and Parcel shaped pieces to encourage mailers to include more content, which will lead to more sales for mailers and support volume growth.

Some examples of new prices as follows:

	Exigent Price	Current Price	Proposed Price	% Change
				(Current to Proposed)
First-Class Letters				
Meters	\$0.485	\$0.465	\$0.460	-1.1%
Auto AADC	\$0.416	\$0.399	\$0.403	1.0%
Auto 5-D	\$0.391	\$0.376	\$0.373	-0.8%
Marketing Mail Letters				
Auto 5-D DSCF	\$0.221	\$0.211	\$0.217	2.8%
Saturation DSCF	\$0.157	\$0.151	\$0.155	2.7%
Flats – Piece Rated				
Auto 5-D DSCF	\$0.348	\$0.333	\$0.335	0.6%
CR Basic DSCF	\$0.256	\$0.245	\$0.252	2.9%
CR/CR Pallet DSCF	\$0.251	\$0.240	\$0.232	-3.3%
CR/CR Pallet DDU	\$0.243	\$0.233	\$0.221	-5.2%

The last time Single Piece First-Class prices increased was in January 2014. Today's price change filing does not include any price change for Postcards, for letters being mailed to international destinations or for additional ounces for Single Piece Letters. Stamp prices have stayed consistent with the average annual rate of inflation since the Postal Service was formed in 1971. In addition, the incentive for Full-Service IMB remains the same at three tenths of a cent for First-Class and one tenth of a cent for Marketing Mail and Periodicals. The PRC will review the prices before they are scheduled to take effect on January 22, 2017.

Pricing for Periodicals, Package Services and Extra Services will also be adjusted next year and can be found at <http://www.prc.gov/docs/97/97431/NOTICE-FINAL.pdf>. Today's filing does not affect Postal Service Shipping products and services.

The Postal Service receives no tax dollars for operating expenses and relies on the sale of postage, products and services to fund its operations.

We will be providing members with information regarding the impact on nonprofit rates as soon as possible.

1/ Sales and use tax liability is comprised primarily of sales tax collected from customers on taxable sales each month. These taxable sales are reported on a calendar month basis with the liability for each calendar month payable by the 20th of the following calendar month. Since these taxable sales are spread uniformly throughout the month, the average liability date for sales tax liability is assumed to be the 15th of each calendar month. In addition to sales tax, a minor amount of use tax is paid on taxable purchases from vendors. These amounts are individually small and are also incurred uniformly throughout the month. Accordingly, the average date vendor invoices are received (i.e. 15th of the month as assumed elsewhere in this study) is used as the average liability date for use tax in each calendar month. Since the average liability and payment dates for sales and use tax are the same, both are combined in the above analysis.

2/ Rhode Island law (Sec. 44-19) requires monthly reporting and payment of sales and use tax. The return for sales and use tax liability for the month, and payment of the entire liability for that month are due no later than the 20th of the following month. Rhode Island law (Sec. 44-1) states that liability and payment dates that fall upon a Saturday, Sunday, or legal holiday are extended by law to the next business day. Also under this Sec., payments are considered timely with evidence of mailing on or before the due date.

1/ Rhode Island law (Sec. 44-26) requires the payment of estimated Corporate Gross Earnings Tax (GET) during the tax year. This code section also stipulates the above payment dates and minimum payment percentages. Code Sec. 44-1 extends the required payment dates that fall upon a Saturday, Sunday or legal holiday, to the next business day. Finally, payments are considered timely under Sec. 44-1 with evidence of mailing on or before the required date. The Company pays 40% of 85% of its prior year GET on March 15 and 60% of 85% of its prior year GET on June 15. Any remaining tax due for the calendar year is paid with its GET return on February 28 of the subsequent year.

2/ Because Gross receipts taxes are collected and remitted on a calendar year basis, this amount reflects gross receipts tax accrual for the twelve months ended March 15, 2018

1/ For the purposes of this calculation, the weighted average liability date is deemed to be the 15th of each month. This is based on the fact that on average, salaries and wages (and the corresponding unemployment tax liabilities) accrue evenly throughout the month as employee hours are worked.

2/ IRS Code Sec. 3301 stipulates quarterly payment of unemployment tax liability. 100% of the liability for each quarter must be paid by the last day of the first month following that quarter.

1/ For the purposes of this calculation, the weighted average liability date is deemed to be the 15th of each month. This is based on the fact that on average, salaries and wages (and the corresponding unemployment tax liabilities) accrue evenly throughout the month as employee hours are worked.

2/ Rhode Island law (Sec. 28-42 through 28-44) stipulates quarterly payment of unemployment tax liability. 100% of the liability for each quarter must be paid by the last day of the first month following that quarter.

1/ Payroll dates are the actual dates on which payroll was paid.

2/ Payment of FICA expense is governed by the same rules as the other components of Federal payroll tax deposits (see notes on monthly FICA and Federal Income Tax withholding.

3/ Two different types of monthly payroll are paid: regular monthly (i.e. salaries) and manual/misc. (e.g. termination pay). Since these different payrolls are paid on different dates, separate weighted payment lags for each have been calculated.

- 1/ Payroll dates are the actual dates on which payroll was paid.
- 2/ The IRS Code stipulates payment of all withheld FICA and Federal Income Tax within one banking day under the \$100,000 One-Day Rule. 100% of the withholding must be deposited in a Federal Depository Bank within one day of the date payments are made. Payment due dates which fall upon a Saturday, Sunday, or holiday (i.e. non-banking day) are extended until the next banking day.
- 3/ Two different types of monthly payroll are paid: regular monthly (i.e. salaries) and manual/misc. (e.g. termination pay). Since these different payrolls are paid on different dates, separate weighted payment lags for each have been calculated above.

1/ For the purposes of this calculation, the weighted average liability (withholding) date is deemed to be the 15th of each month. This is based on the fact that on average, weekly salaries and wages (and the corresponding Temp. Disability Ins. liabilities) accrue evenly throughout the month as employee hours are worked.

2/ Rhode Island's Temporary Disability Insurance Act (Title 28 of R.I. law) stipulates quarterly payment of Temporary Disability Insurance withheld. 100% of the liability for each quarter must be paid by the last day of the first month after that quarter ends. Under Sec. 44-1, payment dates which fall upon a Saturday, Sunday or legal holiday are extended to the next business day. Payments are considered timely with evidence of mailing by the required date.

1/ Sales and use tax liability is comprised primarily of sales tax collected from customers on taxable sales each month. These taxable sales are reported on a calendar month basis with the liability for each calendar month payable by the 20th of the following calendar month. Since these taxable sales are spread uniformly throughout the month, the average liability date for sales tax liability is assumed to be the 15th of each calendar month. In addition to sales tax, a minor amount of use tax is paid on taxable purchases from vendors. These amounts are individually small and are also incurred uniformly throughout the month. Accordingly, the average date vendor invoices are received (i.e. 15th of the month as assumed elsewhere in this study) is used as the average liability date for use tax in each calendar month. Since the average liability and payment dates for sales and use tax are the same, both are combined in the above analysis.

2/ Rhode Island law (Sec. 44-19) requires monthly reporting and payment of sales and use tax. The return for sales and use tax liability for the month, and payment of the entire liability for that month are due no later than the 20th of the following month. Rhode Island law (Sec. 44-1) states that liability and payment dates that fall upon a Saturday, Sunday, or legal holiday are extended by law to the next business day. Also under this Sec., payments are considered timely with evidence of mailing on or before the due date.

1/ Rhode Island law (Sec. 44-26) requires the payment of estimated Corporate Gross Earnings Tax (GET) during the tax year. This code section also stipulates the above payment dates and minimum payment percentages. Code Sec. 44-1 extends the required payment dates that fall upon a Saturday, Sunday or legal holiday, to the next business day. Finally, payments are considered timely under Sec. 44-1 with evidence of mailing on or before the required date. The Company pays 40% of 85% of its prior year GET on March 15 and 60% of 85% of its prior year GET on June 15. Any remaining tax due for the calendar year is paid with its GET return on February 28 of the subsequent year.

2/ Because Gross receipts taxes are collected and remitted on a calendar year basis, this amount reflects gross receipts tax accrual for the twelve months ended March 15, 2018

1/ For the purposes of this calculation, the weighted average liability date is deemed to be the 15th of each month. This is based on the fact that on average, salaries and wages (and the corresponding unemployment tax liabilities) accrue evenly throughout the month as employee hours are worked.

2/ IRS Code Sec. 3301 stipulates quarterly payment of unemployment tax liability. 100% of the liability for each quarter must be paid by the last day of the first month following that quarter.

1/ Payroll dates are the actual dates on which payroll was paid.

2/ Payment of FICA expense is governed by the same rules as the other components of Federal payroll tax deposits (see notes on monthly FICA and Federal Income Tax withholding).

3/ Two different types of monthly payroll are paid: regular monthly (i.e. salaries) and manual/misc. (e.g. termination pay). Since these different payrolls are paid on different dates, separate weighted payment lags for each have been calculated.

- 1/ Payroll dates are the actual dates on which payroll was paid.
- 2/ The IRS Code stipulates payment of all withheld FICA and Federal Income Tax within one banking day under the \$100,000 One-Day Rule. 100% of the withholding must be deposited in a Federal Depository Bank within one day of the date payments are made. Payment due dates which fall upon a Saturday, Sunday, or holiday (i.e. non-banking day) are extended until the next banking day.
- 3/ Two different types of monthly payroll are paid: regular monthly (i.e. salaries) and manual/misc. (e.g. termination pay). Since these different payrolls are paid on different dates, separate weighted payment lags for each have been calculated above.

1/ Payroll dates are the actual dates on which payroll was paid.

2/ Rhode Island law (Sec. 44-30) stipulates payment of all withheld State Income Tax within three banking days after the end of each quarter-monthly liability period. 100% of the withholding on all payroll paid during each quarter-monthly period must be paid no later than the third banking day after the end of that period. Under Sec. 44-1, payment due dates which fall upon Saturday, Sunday, or a legal holiday, are extended until the next banking day. In addition, payment is considered timely with evidence of mailing by the due date.

1/ Payroll dates are the actual dates on which payroll was paid.

2/ Rhode Island law (Sec. 44-30) stipulates payment of all withheld State Income Tax within three banking days after the end of each quarter-monthly liability period. 100% of the withholding on all payroll paid during each quarter-monthly period must be paid no later than the third banking day after the end of that period. Under Sec. 44-1, payment due dates which fall upon Saturday, Sunday, or a legal holiday, are extended until the next banking day. In addition, payment is considered timely with evidence of mailing by the due date.

Notes:

Two different types of monthly payroll are paid: regular monthly (i.e. salaries) and manual/misc. (e.g. termination pay). Since these different payrolls are paid on different dates, separate weighted payment lags for each have been calculated on the attached schedules. This schedule simply summarizes these two separate calculations.

1/ For the purposes of this calculation, the weighted average liability (withholding) date is deemed to be the 15th of each month. This is based on the fact that on average, weekly salaries and wages (and the corresponding Temp. Disability Ins. liabilities) accrue evenly throughout the month as employee hours are worked.

2/ Rhode Island's Temporary Disability Insurance Act (Title 28 of R.I. law) stipulates quarterly payment of Temporary Disability Insurance withheld. 100% of the liability for each quarter must be paid by the last day of the first month after that quarter ends. Under Sec. 44-1, payment dates which fall upon a Saturday, Sunday or legal holiday are extended to the next business day. Payments are considered timely with evidence of mailing by the required date.

Average Billing Days					30.42	
Average Billing Lag						1.39

Line Notes

- 1/ Number of Days in Bill = Number of days between meter reads
2/ Billing lag = Number of days between meter read and bill date. Once billed, the sales become part of A/R and will be included in the Collection Lag calculation.

FAS 112 / ASC 712

April 26, 2013

Ms. Mari-Louise Messuri
National Grid USA
40 Sylvan Road
Waltham, MA 02451

Dear Mari,

Subject: April 1, 2012 to March 31, 2013 ASC 712 Expense Results—New England

Enclosed is the fiscal year 2013 ASC 712 expense valuation for New England. The valuation is based on January 1, 2012 data provided by National Grid. Based on a 4.00 percent discount rate assumption, the incremental operating expense for the period April 1, 2012 through March 31, 2013 is \$3.0 million.

Based on our discussions last year with National Grid and Deloitte, we have incorporated changes into this year's valuation. Specifically, we have incorporated the following:

- A change in the accrual method for those groups with benefits that accumulate over a given period (i.e. those with benefits that vary based on a specific age/service criteria). Previously, liabilities for future disableds beyond the current fiscal year were not considered in the valuation for these groups. Our valuation now includes a liability for the expected future disableds for benefits that accumulate over the specific age/service period.
- A discount rate assumption that is specific to the shorter durations of the ASC 712 obligations rather than using the same discount rate used for the company's pension and postretirement medical/life insurance plans

Fiscal Year 2013 Valuation Results

The plan's overall experience in fiscal year 2012 was less favorable than budgeted. In aggregate, the projected liability at year-end was \$3.7 million higher than expected.

The key items that impacted the liability included:

- Introduction of liabilities for active employees with accumulating benefits; and
- Change in discount rate from 5.90% to 4.00%; offset by
- Change in assumption to reflect the fact that Medicare pays primary for those who are expected to be eligible;
- Favorable claims experience; and
- Demographic gains

Enclosed is a summary of expense/(income) by company, as well as a summary of the assumptions and benefit provisions used in the valuation.

Ms. Mari-Louise Messuri

Preparation of this Actuarial Valuation

This valuation has been prepared to present to management the necessary information to comply with ASC 712-10 for the fiscal year ending March 31, 2013. Determinations for purposes other than financial accounting requirements may be significantly different from the results reported herein. Thus, the use of this information for purposes other than those expressed here may not be appropriate. The results as of other dates may also be significantly different from the results reported herein.

In conducting the valuation, we have relied on personnel, plan design and health care claim cost supplied by National Grid. While we cannot verify the accuracy of all of the supplied information, the information was reviewed for consistency and reasonability. As a result of this review, we have no reason to doubt the substantial accuracy or completeness of the information and believe that it has produced appropriate results.

This valuation has been conducted in accordance with generally accepted actuarial principles and practices, including the applicable Actuarial Standards of Practice as issued by the Actuarial Standards Board. In addition, the valuation results are based on our understanding of the requirements of ASC 712-10. The information in this report is not intended to supersede or supplant the advice and interpretations of National Grid's auditors.

The actuarial assumptions and methods used in this valuation are described in the ASC 712 Assumptions and Methods section. National Grid selected the economic, demographic, and health care claims cost assumptions and prescribed them for use for purposes of compliance with ASC 712-10. Aon Hewitt provided guidance with respect to these assumptions, and it is our belief that they represent reasonable expectations of anticipated plan experience. The actuarial cost method is prescribed by ASC 712-10.

The undersigned are familiar with the near-term and long-term aspects of post-employment valuations and meet the Qualification Standards of the American Academy of Actuaries necessary to render the actuarial opinions herein.

Mari, if you have any questions, please call.

Sincerely,

A handwritten signature in black ink that reads "Ditah M. Rimer".

Ms. Mari-Louise Messuri
National Grid USA
40 Sylvan Road
Waltham, MA 02451

Dear Mari,

Subject: April 1, 2013 to March 31, 2014 ASC 712 Expense Results—New England

Enclosed is the fiscal year 2014 ASC 712 expense valuation for New England. The valuation is based on January 1, 2013 data provided by National Grid. Based on a 2.70 percent discount rate assumption, the incremental operating expense for the period April 1, 2013 through March 31, 2014 is \$4.9 million.

Fiscal Year 2014 Valuation Results

The plan's overall experience in fiscal year 2013 was less favorable than budgeted. In aggregate, the projected liability at year-end was \$5.3 million higher than expected.

The key items that impacted the liability included:

- Demographic losses; and
- A change in discount rate from 4.00% to 2.70%; offset by
- Favorable claims experience

Enclosed is a summary of expense/(income) by company, as well as a summary of the assumptions and benefit provisions used in the valuation.

Preparation of this Actuarial Valuation

This valuation has been prepared to present to management the necessary information to comply with ASC 712-10 for the fiscal year ending March 31, 2014. Determinations for purposes other than financial accounting requirements may be significantly different from the results reported herein. Thus, the use of this information for purposes other than those expressed here may not be appropriate. The results as of other dates may also be significantly different from the results reported herein.

In conducting the valuation, we have relied on personnel, plan design and health care claim cost supplied by National Grid. While we cannot verify the accuracy of all of the supplied information, the information was reviewed for consistency and reasonability. As a result of this review, we have no reason to doubt the substantial accuracy or completeness of the information and believe that it has produced appropriate results.

This valuation has been conducted in accordance with generally accepted actuarial principles and practices, including the applicable Actuarial Standards of Practice as issued by the Actuarial Standards Board. In addition, the valuation results are based on our understanding of the requirements of ASC 712-10. The

information in this report is not intended to supersede or supplant the advice and interpretations of National Grid's auditors.

The actuarial assumptions and methods used in this valuation are described in the ASC 712 Assumptions and Methods section. National Grid selected the economic, demographic, and health care claims cost assumptions and prescribed them for use for purposes of compliance with ASC 712-10. Aon Hewitt provided guidance with respect to these assumptions, and it is our belief that they represent reasonable expectations of anticipated plan experience. The actuarial cost method is prescribed by ASC 712-10.

The undersigned are familiar with the near-term and long-term aspects of post-employment valuations and meet the Qualification Standards of the American Academy of Actuaries necessary to render the actuarial opinions herein.

Mari, if you have any questions, please call.

Sincerely,

A handwritten signature in black ink that reads "Ditah M. Rimer".

2020+	5.00%	5.00%	5.00%

Cost of Medical Coverage The medical claims costs reflect the expected impact of the Health Care reform, including eligibility expansion to include dependent children up to age 26, elimination of lifetime maximums, and 100% in-network preventive care coverage. In addition, we have reflected the effect of the excise tax on the portion of the costs of health care coverage exceeding the specified dollar thresholds beginning in 2018.

Disabled participants are assumed to generate medical costs which vary with duration from disability:

Ms. Mari-Louise Messuri
National Grid USA
40 Sylvan Road
Waltham, MA 02451

Dear Mari,

Subject: April 1, 2014 to March 31, 2015 ASC 712 Expense Results—New England

Enclosed is the fiscal year 2015 ASC 712 expense valuation for New England. The valuation is based on January 1, 2014 data provided by National Grid. Based on a 2.95 percent discount rate assumption, the incremental operating income for the period April 1, 2014 through March 31, 2015 is \$7.4 million.

Fiscal Year 2015 Valuation Results

The plan's overall experience in fiscal year 2014 was more favorable than budgeted. In aggregate, the projected liability at year-end was \$8.9 million lower than expected.

The key items that impacted the liability included:

- Reduction in LTD income replacement claimants
- A change in discount rate from 2.70% to 2.95%; and
- Favorable claims experience; offset by
- Change in mortality table from IRS Generational Mortality Table to RP2000 Combined Healthy Generational Mortality Table with Scale BB

Enclosed is a summary of expense/(income) by company, as well as a summary of the assumptions and benefit provisions used in the valuation.

Preparation of this Actuarial Valuation

This valuation has been prepared to present to management the necessary information to comply with ASC 712-10 for the fiscal year ending March 31, 2015. Determinations for purposes other than financial accounting requirements may be significantly different from the results reported herein. Thus, the use of this information for purposes other than those expressed here may not be appropriate. The results as of other dates may also be significantly different from the results reported herein.

In conducting the valuation, we have relied on personnel, plan design and health care claim cost supplied by National Grid. While we cannot verify the accuracy of all of the supplied information, the information was reviewed for consistency and reasonability. As a result of this review, we have no reason to doubt the substantial accuracy or completeness of the information and believe that it has produced appropriate results.

March 5, 2015

This valuation has been conducted in accordance with generally accepted actuarial principles and practices, including the applicable Actuarial Standards of Practice as issued by the Actuarial Standards Board. In addition, the valuation results are based on our understanding of the requirements of ASC 712-10. The information in this report is not intended to supersede or supplant the advice and interpretations of National Grid's auditors.

The actuarial assumptions and methods used in this valuation are described in the ASC 712 Assumptions and Methods section. National Grid selected the economic, demographic, and health care claims cost assumptions and prescribed them for use for purposes of compliance with ASC 712-10. Aon Hewitt provided guidance with respect to these assumptions, and it is our belief that they represent reasonable expectations of anticipated plan experience. The actuarial cost method is prescribed by ASC 712-10.

Mari, if you have any questions, please call.

Sincerely,

Hewitt Associates LLC, an Aon Hewitt company

Cost of Medical Coverage The medical claims costs reflect the expected impact of the Health Care reform, including eligibility expansion to include dependent children up to age 26, elimination of lifetime maximums, and 100% in-network preventive care coverage. In addition, we have reflected the effect of the excise tax on the portion of the costs of health care coverage exceeding the specified dollar thresholds beginning in 2018.

Disabled participants are assumed to generate medical costs which vary with duration from disability.

Ms. Mari-Louise Messuri
National Grid USA
40 Sylvan Road
Waltham, MA 02451

Dear Mari,

Subject: April 1, 2015 to March 31, 2016 ASC 712 Expense Results—New England

Enclosed is the fiscal year 2016 ASC 712 expense valuation for New England. The valuation is based on January 1, 2015 data provided by National Grid. Based on a 2.75 percent discount rate assumption, the incremental operating income for the period April 1, 2015 through March 31, 2016 is \$6.3 million.

Fiscal Year 2016 Valuation Results

The plan's overall experience in fiscal year 2016 was more favorable than budgeted. In aggregate, the projected liability at year-end was \$7.5 million lower than expected.

The key items that impacted the liability included:

- Reduction in LTD income replacement claimants
- Favorable pre-65 claims experience; offset by
- A change in discount rate from 2.95% to 2.75%; and
- Change in mortality table from RP2000 Combined Healthy Generational Mortality Table with Scale BB the RP2014 Aggregate Generational Mortality Table projected with Scale MP2014

Enclosed is a summary of expense/(income) by company, as well as a summary of the assumptions and benefit provisions used in the valuation.

Preparation of this Actuarial Valuation

This valuation has been prepared to present to management the necessary information to comply with ASC 712-10 for the fiscal year ending March 31, 2016. Determinations for purposes other than financial accounting requirements may be significantly different from the results reported herein. Thus, the use of this information for purposes other than those expressed here may not be appropriate. The results as of other dates may also be significantly different from the results reported herein.

In conducting the valuation, we have relied on personnel, plan design and health care claim cost supplied by National Grid. While we cannot verify the accuracy of all of the supplied information, the

Cost of Medical Coverage The medical claims costs reflect the expected impact of the Health Care reform, including eligibility expansion to include dependent children up to age 26, elimination of lifetime maximums, and 100% in-network preventive care coverage. In addition, we have reflected the effect of the excise tax on the portion of the costs of health care coverage exceeding the specified dollar thresholds beginning in 2018.

Disabled participants are assumed to generate medical costs which vary with duration from disability:

Ms. Mari-Louise Messuri
National Grid USA
40 Sylvan Road
Waltham, MA 02451

Dear Mari,

Subject: April 1, 2016 to March 31, 2017 ASC 712 Expense Results—New England

Enclosed is the fiscal year 2017 ASC 712 expense valuation for New England. The valuation is based on January 1, 2016 data provided by National Grid. Based on a 2.80 percent discount rate assumption, the incremental operating income for the period April 1, 2016 through March 31, 2017 is \$3.5 million.

Fiscal Year 2017 Valuation Results

The plan's overall experience in fiscal year 2017 was more favorable than budgeted. In aggregate, the projected liability at year-end was \$4.3 million lower than expected.

The key items that impacted the liability included:

- Reduction in LTD income replacement claimants
- Favorable pre-65 claims experience
- A change in the medical trend rates; and
- A change in discount rate from 2.75% to 2.80%

Enclosed is a summary of expense/(income) by company, as well as a summary of the assumptions and benefit provisions used in the valuation.

Preparation of this Actuarial Valuation

This valuation has been prepared to present to management the necessary information to comply with ASC 712-10 for the fiscal year ending March 31, 2017. Determinations for purposes other than financial accounting requirements may be significantly different from the results reported herein. Thus, the use of this information for purposes other than those expressed here may not be appropriate. The results as of other dates may also be significantly different from the results reported herein.

In conducting the valuation, we have relied on personnel, plan design and health care claim cost supplied by National Grid. While we cannot verify the accuracy of all of the supplied information, the information was reviewed for consistency and reasonability. As a result of this review, we have no reason to doubt the substantial accuracy or completeness of the information and believe that it has produced appropriate results.

January 31, 2017

This valuation has been conducted in accordance with generally accepted actuarial principles and practices, including the applicable Actuarial Standards of Practice as issued by the Actuarial Standards Board. In addition, the valuation results are based on our understanding of the requirements of ASC 712-10. The information in this report is not intended to supersede or supplant the advice and interpretations of National Grid's auditors.

The actuarial assumptions and methods used in this valuation are described in the ASC 712 Assumptions and Methods section. National Grid selected the economic, demographic, and health care claims cost assumptions and prescribed them for use for purposes of compliance with ASC 712-10. Aon Hewitt provided guidance with respect to these assumptions, and it is our belief that they represent reasonable expectations of anticipated plan experience. The actuarial cost method is prescribed by ASC 712-10.

Mari, if you have any questions, please call.

Sincerely,

Hewitt Associates LLC, an Aon Hewitt company

National Grid USA
40 Sylvan Road
Waltham, MA 02451

Dear Mari,

Subject: April 1, 2012 to March 31, 2013 ASC 712 Expense Results—KeySpan

Enclosed is the fiscal year 2013 ASC 712 expense valuation for KeySpan. The valuation is based on January 1, 2012 data provided by National Grid. Based on a 4.00 percent discount rate assumption, the incremental operating expense for the period April 1, 2012 through March 31, 2013 is \$6.1 million.

Based on our discussions last year with National Grid and Deloitte, we have incorporated changes into this year's valuation. Specifically, we have incorporated the following:

- A change in the accrual method for those groups with benefits that accumulate over a given period (i.e. those with benefits that vary based on a specific age/service criteria). Previously, liabilities for future disableds beyond the current fiscal year were not considered in the valuation for these groups. Our valuation now includes a liability for the expected future disableds for benefits that accumulate over the specific age/service period.
- A discount rate assumption that is specific to the shorter durations of the ASC 712 obligations rather than using the same discount rate used for the company's pension and postretirement medical/life insurance plans

Fiscal Year 2013 Valuation Results

The plan's overall experience in fiscal year 2012 was less favorable than budgeted. In aggregate, the projected liability at year-end was \$6.4 million higher than expected.

The key items that impacted the liability included:

- Introduction of liabilities for active employees with accumulating benefits; and
- Change in discount rate from 5.90% to 4.00%; offset by
- Change in assumption to reflect the fact that Medicare pays primary for those who are expected to be eligible;
- Favorable claims experience

Enclosed is a summary of expense/(income) by business unit, as well as a summary of the assumptions and benefit provisions used in the valuation.

Ms. Mari-Louise Messuri

Preparation of this Actuarial Valuation

This valuation has been prepared to present to management the necessary information to comply with ASC 712-10 for the fiscal year ending March 31, 2013. Determinations for purposes other than financial accounting requirements may be significantly different from the results reported herein. Thus, the use of this information for purposes other than those expressed here may not be appropriate. The results as of other dates may also be significantly different from the results reported herein.

In conducting the valuation, we have relied on personnel, plan design and health care claim cost supplied by National Grid. While we cannot verify the accuracy of all of the supplied information, the information was reviewed for consistency and reasonability. As a result of this review, we have no reason to doubt the substantial accuracy or completeness of the information and believe that it has produced appropriate results.

This valuation has been conducted in accordance with generally accepted actuarial principles and practices, including the applicable Actuarial Standards of Practice as issued by the Actuarial Standards Board. In addition, the valuation results are based on our understanding of the requirements of ASC 712-10. The information in this report is not intended to supersede or supplant the advice and interpretations of National Grid's auditors.

The actuarial assumptions and methods used in this valuation are described in the ASC 712 Assumptions and Methods section. National Grid selected the economic, demographic, and health care claims cost assumptions and prescribed them for use for purposes of compliance with ASC 712-10. Aon Hewitt provided guidance with respect to these assumptions, and it is our belief that they represent reasonable expectations of anticipated plan experience. The actuarial cost method is prescribed by ASC 712-10.

The undersigned are familiar with the near-term and long-term aspects of post-employment valuations and meet the Qualification Standards of the American Academy of Actuaries necessary to render the actuarial opinions herein.

Mari, if you have any questions, please call.

Sincerely,

A handwritten signature in black ink that reads "Ditah M. Rimer".

Waltham, MA 02451

Dear Mari,

Subject: April 1, 2013 to March 31, 2014 ASC 712 Expense Results—KeySpan

Enclosed is the fiscal year 2014 ASC 712 expense valuation for KeySpan. The valuation is based on January 1, 2013 data provided by National Grid. Based on a 2.70 percent discount rate assumption, the incremental operating income for the period April 1, 2013 through March 31, 2014 is \$4.9 million.

Fiscal Year 2014 Valuation Results

The plan's overall experience in fiscal year 2013 was more favorable than budgeted. In aggregate, the projected liability at year-end was \$3.2 million lower than expected.

The key items that impacted the liability included:

- An update to the valuation methodology for the Workers' Compensation liability; and
- Favorable claims experience; offset by
- A change in discount rate from 4.00% to 2.70%

Note that we have reflected the LIPA transition to PSEG in that those current active participants who are a part of the transition would not be expected to become disabled after December 31, 2013.

Enclosed is a summary of expense/(income) by business unit, as well as a summary of the assumptions and benefit provisions used in the valuation.

Preparation of this Actuarial Valuation

This valuation has been prepared to present to management the necessary information to comply with ASC 712-10 for the fiscal year ending March 31, 2014. Determinations for purposes other than financial accounting requirements may be significantly different from the results reported herein. Thus, the use of this information for purposes other than those expressed here may not be appropriate. The results as of other dates may also be significantly different from the results reported herein.

In conducting the valuation, we have relied on personnel, plan design and health care claim cost supplied by National Grid. While we cannot verify the accuracy of all of the supplied information, the information was reviewed for consistency and reasonability. As a result of this review, we have no reason to doubt the substantial accuracy or completeness of the information and believe that it has produced appropriate results.

Cost of Medical Coverage

The medical claims costs reflect the expected impact of the Health Care reform, including eligibility expansion to include dependent children up to age 26, elimination of lifetime maximums, and 100% in-network preventive care coverage. In addition, we have reflected the effect of the excise tax on the portion of the costs of health care coverage exceeding the specified dollar thresholds beginning in 2018.

Disabled participants are assumed to generate medical costs which vary with duration from disability:

Ms. Mari-Louise Messuri
National Grid USA
40 Sylvan Road
Waltham, MA 02451

Dear Mari,

Subject: April 1, 2014 to March 31, 2015 ASC 712 Expense Results—KeySpan

Enclosed is the fiscal year 2014 ASC 712 expense valuation for KeySpan. The valuation is based on January 1, 2014 data provided by National Grid. Based on a 2.95 percent discount rate assumption, the incremental operating income for the period April 1, 2014 through March 31, 2015 is \$3.3 million.

Fiscal Year 2015 Valuation Results

The plan's overall experience in fiscal year 2015 was more favorable than budgeted. In aggregate, the projected liability at year-end was \$1.7 million lower than expected.

The key items that impacted the liability included:

- Favorable claims experience; and
- A change in discount rate from 2.70% to 2.95%; offset by
- Increase in LTD claimants; and
- Change in mortality table from IRS Generational Mortality Table to RP2000 Combined Healthy Generational Mortality Table with Scale BB

Enclosed is a summary of expense/(income) by business unit, as well as a summary of the assumptions and benefit provisions used in the valuation.

Preparation of this Actuarial Valuation

This valuation has been prepared to present to management the necessary information to comply with ASC 712-10 for the fiscal year ending March 31, 2015. Determinations for purposes other than financial accounting requirements may be significantly different from the results reported herein. Thus, the use of this information for purposes other than those expressed here may not be appropriate. The results as of other dates may also be significantly different from the results reported herein.

In conducting the valuation, we have relied on personnel, plan design and health care claim cost supplied by National Grid. While we cannot verify the accuracy of all of the supplied information, the information was reviewed for consistency and reasonability. As a result of this review, we have no reason to doubt the substantial accuracy or completeness of the information and believe that it has produced appropriate results.

Ms. Mari-Louise Messuri
Page 2
March 5, 2015

This valuation has been conducted in accordance with generally accepted actuarial principles and practices, including the applicable Actuarial Standards of Practice as issued by the Actuarial Standards Board. In addition, the valuation results are based on our understanding of the requirements of ASC 712-10. The information in this report is not intended to supersede or supplant the advice and interpretations of National Grid's auditors.

The actuarial assumptions and methods used in this valuation are described in the ASC 712 Assumptions and Methods section. National Grid selected the economic, demographic, and health care claims cost assumptions and prescribed them for use for purposes of compliance with ASC 712-10. Aon Hewitt provided guidance with respect to these assumptions, and it is our belief that they represent reasonable expectations of anticipated plan experience. The actuarial cost method is prescribed by ASC 712-10.

Mari, if you have any questions, please call.

Sincerely,

Hewitt Associates LLC, an Aon Hewitt company

Waltham, MA 02451

Dear Mari,

Subject: April 1, 2015 to March 31, 2016 ASC 712 Expense Results—KeySpan

Enclosed is the fiscal year 2016 ASC 712 expense valuation for KeySpan. The valuation is based on January 1, 2015 data provided by National Grid. Based on a 2.75 percent discount rate assumption, the incremental operating income for the period April 1, 2015 through March 31, 2016 is \$0.5 million.

Fiscal Year 2016 Valuation Results

The plan's overall experience in fiscal year 2016 was less favorable than budgeted. In aggregate, the projected liability at year-end was \$0.8 million higher than expected.

The key items that impacted the liability included:

- Increase in LTD claimants in New York and Long Island plans
- Unfavorable pre-65 claims experience especially in GHI and Empire plans
- A change in discount rate from 2.95% to 2.75%; and
- Change in mortality table from RP2000 Combined Healthy Generational Mortality Table with Scale BB the RP2014 Aggregate Generational Mortality Table projected with Scale MP2014

Enclosed is a summary of expense/(income) by business unit, as well as a summary of the assumptions and benefit provisions used in the valuation.

Preparation of this Actuarial Valuation

This valuation has been prepared to present to management the necessary information to comply with ASC 712-10 for the fiscal year ending March 31, 2016. Determinations for purposes other than financial accounting requirements may be significantly different from the results reported herein. Thus, the use of this information for purposes other than those expressed here may not be appropriate. The results as of other dates may also be significantly different from the results reported herein.

In conducting the valuation, we have relied on personnel, plan design and health care claim cost supplied by National Grid. While we cannot verify the accuracy of all of the supplied information, the

information was reviewed for consistency and reasonability. As a result of this review, we have no reason to doubt the substantial accuracy or completeness of the information and believe that it has produced appropriate results.

This valuation has been conducted in accordance with generally accepted actuarial principles and practices, including the applicable Actuarial Standards of Practice as issued by the Actuarial Standards Board. In addition, the valuation results are based on our understanding of the requirements of ASC 712-10. The information in this report is not intended to supersede or supplant the advice and interpretations of National Grid's auditors.

The actuarial assumptions and methods used in this valuation are described in the ASC 712 Assumptions and Methods section. National Grid selected the economic, demographic, and health care claims cost assumptions and prescribed them for use for purposes of compliance with ASC 712-10. Aon Hewitt provided guidance with respect to these assumptions, and it is our belief that they represent reasonable expectations of anticipated plan experience. The actuarial cost method is prescribed by ASC 712-10.

Mari, if you have any questions, please call.

Sincerely,

Hewitt Associates LLC, an Aon Hewitt company

Cost of Medical Coverage The medical claims costs reflect the expected impact of the Health Care reform, including eligibility expansion to include dependent children up to age 26, elimination of lifetime maximums, and 100% in-network preventive care coverage. In addition, we have reflected the effect of the excise tax on the portion of the costs of health care coverage exceeding the specified dollar thresholds beginning in 2018.

Disabled participants are assumed to generate medical costs which vary with duration from disability:

Dear Mari,

Subject: April 1, 2016 to March 31, 2017 ASC 712 Expense Results—KeySpan

Enclosed is the fiscal year 2017 ASC 712 expense valuation for KeySpan. The valuation is based on January 1, 2016 data provided by National Grid. Based on a 2.80 percent discount rate assumption, the incremental operating expense for the period April 1, 2016 through March 31, 2017 is \$0.2 million.

Fiscal Year 2017 Valuation Results

The plan's overall experience in fiscal year 2017 was slightly more favorable than budgeted. In aggregate, the projected liability at year-end was \$0.2 million lower than expected.

The key items that impacted the liability included:

- Reduction in LTD claimants
- A change in the medical trend rates; and
- A change in discount rate from 2.75% to 2.80%

Enclosed is a summary of expense/(income) by business unit, as well as a summary of the assumptions and benefit provisions used in the valuation.

Preparation of this Actuarial Valuation

This valuation has been prepared to present to management the necessary information to comply with ASC 712-10 for the fiscal year ending March 31, 2017. Determinations for purposes other than financial accounting requirements may be significantly different from the results reported herein. Thus, the use of this information for purposes other than those expressed here may not be appropriate. The results as of other dates may also be significantly different from the results reported herein.

In conducting the valuation, we have relied on personnel, plan design and health care claim cost supplied by National Grid. While we cannot verify the accuracy of all of the supplied information, the information was reviewed for consistency and reasonability. As a result of this review, we have no reason to doubt the substantial accuracy or completeness of the information and believe that it has produced appropriate results.

Ms. Mari-Louise Messuri
Page 2
January 31, 2017

This valuation has been conducted in accordance with generally accepted actuarial principles and practices, including the applicable Actuarial Standards of Practice as issued by the Actuarial Standards Board. In addition, the valuation results are based on our understanding of the requirements of ASC 712-10. The information in this report is not intended to supersede or supplant the advice and interpretations of National Grid's auditors.

The actuarial assumptions and methods used in this valuation are described in the ASC 712 Assumptions and Methods section. National Grid selected the economic, demographic, and health care claims cost assumptions and prescribed them for use for purposes of compliance with ASC 712-10. Aon Hewitt provided guidance with respect to these assumptions, and it is our belief that they represent reasonable expectations of anticipated plan experience. The actuarial cost method is prescribed by ASC 712-10.

Mari, if you have any questions, please call.

Sincerely,

Hewitt Associates LLC, an Aon Hewitt company

2024	4.75%	4.50%	5.00%
2025+	4.50%	4.50%	4.50%

Cost of Medical Coverage The medical claims costs reflect the expected impact of the Health Care reform, including eligibility expansion to include dependent children up to age 26, elimination of lifetime maximums, and 100% in-network preventive care coverage. In addition, we have reflected the effect of the excise tax on the portion of the costs of health care coverage exceeding the specified dollar thresholds beginning in 2020.

Disabled participants are assumed to generate medical costs which vary with duration from disability:
