Greetings,

National Grid has received all required documentation regarding your 199.8kW (AC) Inverter system located at [17 PECKHAM DR, BRISTOL, RI, 02809](#). Your system is now authorized to interconnect to and operate in parallel with the National Grid electric power system.

Location System Size Details:

Total Generator kW AC: 199.8

Total Storage kW AC: 0

DC Rating (kW): 225

Existing Constrained Output kW AC:

Total Constrained Output kW AC: 199.8

Storage Coupling:

- Please note that the payments for energy, capacity, or other environmental attributes will not occur until the required metering is commissioned, the Company is successfully able to communicate with the meter, and all other related requirements are met (which may include, without limitation, ISO-NE asset registration)
- For more information on Performance-Based Incentive credit allocations and timing (for the Certificate of Eligibility Recipients), refer to [National Grid First Bill Walkthrough](#).
- The communication with the DER is critical in order for the Company to register the asset with ISO-NE (if required) and to obtain the necessary data used to calculate incentive payments. The customer's failure to provide or maintain the communication systems in good working condition could result in diminished, suspended, or terminated incentive payments.
- As per [Renewable Energy Growth Program RIPUC 2152-H](#), Section 8, Clause A on sheet 10, the Certificate of Eligibility Recipient will only be able to receive Performance-Based Incentive Payments once all conditions are met including, but not limited to, registration with ISO-NE and NEPOOL GIS; and awarded a certificate of Eligibility.

Jurisdictional Statement: The Company is a public utility subject to the concurrent jurisdiction of the Federal Energy Regulatory Commission (FERC) and the Rhode Island Public Utilities Commission (R.I.P.U.C.), and

the Company has joined the Regional Transmission Organization (RTO) operated by the Independent System Operator-New England (ISO-NE). Pursuant to Section 205 of the Federal Power Act ("FPA"), 16 U.S.C. § 824d, and FERC regulations, 18 C.F.R. Part 35, certain Interconnection Service Agreements (ISAs) are deemed to be agreements that "affect or relate to" jurisdictional transmission or sales of electric energy, which are FERC jurisdictional and must be filed in a timely manner or civil penalties may apply to the Company. If an ISA is executed between the Company and the Interconnecting Customer as a result of this application for interconnection service, the Company may, out of an abundance of caution, file a copy of the ISA with FERC.

This authorization is based upon the Facility as described in the fully executed Interconnection Service Agreement dated 5/29/2020 and all related documentation. Please note that your obligation to report any proposed changes to the Facility (e.g., Facility ownership, type of technology, Facility equipment, etc.) is governed by all applicable tariffs and the rules and regulations of the Department of Public Utilities, including but not limited to the Company's Interconnection Tariff, R.I.P.U.C. 2163.

Please submit any changes to system ownership to: Submit an inquiry in the nCAP Portal

Any changes to ownership information should be reported immediately to ensure that our records are up-to-date, that Performance-Based Incentives (PBI) are allocated appropriately, and legal and emergency notifications are issued correctly. Changes to ownership that need to be reported include, but are not limited to:

- A sale of the generating system to a third party owner
- A sale of the property at which the generating system is located (e.g. a new homeowner is moving into a house that hosts a net metered system)
- A change in the responsible party for the billing account (e.g. business mergers where the name of the business changes).

Payments for energy exported by the facility cannot be made until the project has satisfied all requirements under the Renewable Energy Growth Tariff. For questions regarding your RE Growth application, please contact our Environmental Transactions group at: RenewableContracts@nationalgrid.com

Please check National Grid's Distributed Generation website for the latest updates and information: https://www.nationalgridus.com/narragansett/home/energyeff/distributed_generation.asp

National Grid wishes you the best with your new system and hopes you get many productive years of use.

Sincerely,
National Grid
