This document you are looking for comment on is too long.

Break the document up,

short note, hopefully this bill signed into law 4/10/2021 GHG will be significantly modified or out lawed because look at the mess at national level with changes to energy police.

If I had the money, I would be buying beach front property just like high end democrats.

42.6-2, This was feel good legislation without the technology to back it up.
