RE: Docket No. 22-33-EE - 2023 Annual Energy Efficiency Plan

Dear Ms. Massaro:

On behalf of The Narragansett Electric Company d/b/a Rhode Island Energy ("Rhode Island Energy" or the "Company"), I have enclosed a copy of updated Attachment 5 and Attachment 6 to the Company's 2023 Annual Energy Efficiency Plan filed with the Public Utilities Commission on November 29, 2022. The Company is filing this update in order to add a separate line item for, and explanation of, a credit to the energy efficiency fund. The isolation of this credit as a distinct line item does not affect the fund balance calculation and the fund balance remains the same as that presented in the Company's November 29, 2022 filing.

Thank you for your attention to this matter. If you have any questions, please contact me at (401) 709-3359.

Very truly yours,

Steven J. Boyajian

(15)	Proposed Adjustment to Reflect Fully Reconciling Funding Mechanism				(\$0.00483)

This fund balance includes actuals as of October 2022.
The added row titled "Prior Years Investigation Credit" does not influence final numbers in this table since it is a sub-set of the "Projected Year-End 2022 Fund Balance and Interest." It is being added just to aid in review per the request of

- (1) Projected Budget from E-2 includes OER and EERMC costs allocated to each sector based on forecasted sales.
- (2) DSM Commitments are projects that are under construction with anticipated completion in 2023.

(3) Fund balance projections include projected revenue and spend through year end with Income Eligible sector set to 50 through projected subsidization from other sectors, minus commitments which are illustrated separately on line (2). The fund balance includes \$5,000,000 representing 2021 regulatory funds that were initially allocated to the Rhde Island Infrastructure Bank (RIB) for program year 2021 but were not transferred to RIB. The fund balance also accounts for a transfer of \$5,000,000 not Bills approved in the 2022 Annual Plan, to be made in 2022. Note that these 2022 stantory funds have not yet been transferred to RIB, however RIB has requested the funds and the Company articipates transferring these funds in accordance with RI Gen. Laws § 39-2-1.2(n) prior to December 31, 2022.

(4) The total projection of FCM revenue is allocated by kWh sales to each sector.

(v) Its inan projection on r LAI revenue is autocated by KVII sales to excit sector.

(S) The finite blance includes a SL3 SAy-96 rectlift from shareholder finisk, with interest, to the fund balance which the Company made in January, May, and Jane, 2022 based on the Company's involvement in Docket 22-05-EE. The charge in performance incentive (PI) was determined by recalculating each year's PI with the awings and spend from the applications in question, recent into the corrected year. This was done in January for Electric 2016-2020) and in May for Electric and Gas GOJ 2-2020). The May calculation was aggregated and then split betweer Electric and Gas based on the actual Electric (SOJ and Gas (24-384%) spending split studing the 2012 - 2020 period. For both calculations, monthly compounding interest was applied through 2022, based on the appropriate Electric and Gas interest rates. These credits were then booked in SAP at the time they were calculated (January, May, June), and reflected in the Electric and Gas Fund Balances excordingly.

- (1) 2023 Large Commercial Retrofit Commitments (\$000):
- $\ensuremath{\text{(2)}}\xspace For more information on Finance Costs, please refer to Attachment 2, Section 9.$
- (3) OER budget is equal to the SBC collections after zeroing out EERMC and OER budgets times 3% times 60%. EERMC budget was approved by the EERMC on November 22nd, 2022 for a total between gas and electric of \$1,096,299.14. 75% of that total has been allocated to the electric budget, in accordance with the proportions of the gas and electric budget.
- (4) Finance Costs are detailed in Table E-9. Finance Costs include an injection of \$2M into the Large C&I Revolving Loan Fund. Without this injection the Large C&I Revolving Loan Fund is projected to be negative by the end of 2023.
- (5) Demonstrations and Assessments budgets are included in specific program level budgets listed above. More information on Demonstration and Assessments descriptions, budgets, and which program level budget they are included in can be found in Attachment 8.

Notes:
(1) Lifetime savings are equal to annual savings multiplied by the expected life of measures expected to be installed in each program.
(2) Annual short rons CO2 savings is based on gross annual energy savings in Year 1. The AESC 2021 study was used to inform the electric emissions factor for 2023, taking the average of summer/winter on/off-peak.

- (1) Planned 2023 participation takes into account net-to-gross and estimates unique participation by taking into account 2021 unique customer accounts to savings ratios. Therefore the number of planned measures may be more than the estimated participants shown. For measure counts please view the widget tables in Attachments I and 2. Table E-7 no longer includes a comparison to the previous year's participation. Due to the way unique participation is calculated it is not possible to compare year-over-year results.

  (2) There are additional Low Income participatum in Residential New Construction.

  (3) A customer can participate in more than one program, for example, Residential Consumer Products and and Home Energy Reports, therefore the population reached can be more than 100%.

#### Notes

- (1) Funding injections since loan funds began. Net of any adjustments.
- (2) Current Loan Fund Balance is through May 2022; it includes all loans and repayments made by May 2022. Public Sector Revolving Loan Fund reduced by transfers to RI PEP Incentives. EBF reports in terms of loans outstanding.
- (3) Projected Loans from May to Year-End 2022 is estimated based on projects currently under construction that are anticipated to be paid out by year-end. It is difficult to project this amount accurately due to the fact that projects could be delayed by a month or two resulting in payment occurring in 2023 instead of 2022.
- (4) Projected Repayments from June to Year-End 2022 is estimated based on the monthly average amount of repayments.
- (5) Equal to (2) (3) + (4).
- (6) Fund injection of \$2M for the Large C&I Revolving Loan Fund in included under the Finance Cost line in Table E-2.
- (7) Equal to (5) + (6).
- (8) Assumption based on monthly average repayments in 2022 over 12 month period; repayments accumulate over time and may vary widely.
- (9) Amount projected to be lent to customers in 2023
- (10) Equal to (7) + (8) (9).

The 2023 Annual Plan only includes two values for Efficient Buildings Fund (EBF): 1) The Energy Efficiency Funds allocated to EBF through 2021. 2) Total EBF Loans Outstanding as of July 2022. Additional (11) information is not available because RIBB has informed the Company that, commencing with the 2022 Plan, it will not be providing forward looking projections to the Company regarding EBF. The Company is therefore unable to provide any fiture projections in the 2023 Annual Plan regarding EBF. The state's System Reliability and Least Cost procurement statute (amended in 2021) directs that SSM shall be transferred to RIBB. However, RIBB has not informed the Company the statuatory SSM transfer to RIBB in 2023 will go to EBF.

(1) Energy Efficiency Budget includes total expenditures and commitments. Includes all demand side management program-related expenses, including rebates, administration and general expenses, evaluation, commitments for future years and Company incentive.

- (2) Prior to 2017, Spending Budget Eligible for Shareholder Incentive includes. Implementation, Administration, General, and Evaluation Expenses; excludes EERMC and OER Costs, Commitments, Copays, and Outside Finance Costs. Beginning in 2017, Outside Finance Costs were also excluded. Beginning in 2019 Connected Solutions
- expenses and assessments were also excluded.

  (3) Actual Expenditures is actual spend during calendar year. Includes expenditures and commitments. Includes all demand side management program-related expenses, including rebates, administration and general expenses, evaluation, commitments for future years and Company incentive.
- (4) In the Company's gas and electric rate cases in docket 4323, the PUC approved the uncollectibles gross-up in the electric EE Program Charge effective February 1, 2013, and a new rate applicable to the gross-up of the gas EE Program Charge, effective February 1, 2013.

- (6) 2023 values are proposed.
- (s) 2012 values are proposed.
  (7) Beginning in 2012, the EE Program Charge includes the System Reliability Factor. It does not include the \$0.0003 renewables per RI General Laws §39-2-1.2 and Order #19608, which appears on customer bills. In 2022, the surcharge was in effect for an 11 month period beginning February 1, 2022.
  (8) Reflects the annual cost including Gross Earnings Tax.
  (10) Incentive percentage not applicable for 2021 and going forward due to new performance incentive mechanism developed for the 2021 Annual Plan. See Section 11 of the Main Text of the 2023 Annual Plan for additional details.

### Notes

This fund balance includes actuals as of October 2022.

The added row titled "Prior Years Investigation Credit" does not influence final numbers in this table since it is a sub-set of the "Projected Year-End 2022 Fund Balance and Interest." It is being added just to aid in review per the request of PUC and Division counsel.

(1) Projected Budget from G-2 includes OER and EERMC costs allocated to each sector based on forecasted volume.

(2) Fund Balance projections include projected revenue and spend through year-end with Residential and C&I sector subsidies applied to Income Eligible as detailed in the 2023 EE Plan Table G-1

(3) The fund balance includes a \$562.736 credit from shareholder funds to the fund balance, with interest, which the Company made in May and June, 2022 based on the Company's involvement in Docket 22-05-EE. The change in performance incentive (PI) was determined by recalculating each year's PI with the savings and spend from the applications in question, recast into the corrected year. This was done in January for Electric (2016-2020) and in May for Electric and Gas (2012-2020). The May calculation was aggregated and then split between Electric and Gas based on the actual Electric (7.5.62%) and Gas (24.38%) spending splits during the 2012 – 2020 period. For both calculations, monthly compounding interest was applied through 2022, based on the appropriate Electric and Gas interest rates. These credits were then booked in SAP at the time they were calculated (January, May, June), and reflected in the Electric and Gas Fund Balances accordingly.

## (4) Line (2) + Line (3)

- (11) The proposed EE program charges allow for the use of collections from one sector to fund energy efficiency services in other sectors that would otherwise not be supported with the proposed collection rates.
- (12) Uncollectible rate approved in Docket No. 4770.
- (14) This is an 11 month rate that went into effect February 1, 2022.

  (1) OER budget is equal to the SBC collections after zeroing out EERMC and OER budgets times 3% times 60%. EERMC budget was approved by the EERMC on November 22nd, 2022 for a total between gas and electric of \$1,096,299.14. 25% of that total has been allocated to the gas budget, in accordance with the proportions of the gas and electric budget.
- (2) Demonstrations and Assessments are included in specific program level budgets listed above. More information on Demonstration and Assessments descriptions, budgets, and which program level budget they are included in can be found in Attachment 8.
- (3) Based on the state's System Reliability and Least Cost procurement statute (amended in 2021), funds transferred to the Rhode Island Infrastructure Bank are now classified under Regulatory costs.

Notes:

1) Lifetime savings are equal to annual savings multiplied by the expected life of measures expected to be installed in each program.

(2) Annual short tons CO2 savings is based on gross annual energy savings in Year 1. The AESC 2021 study was used to inform the electric emissions factor for 2023, taking the average of summer/winter on/off-peak

<sup>(1)</sup> Participants can participate in more than one program, for example Home Energy Reports and EnergyWise.

<sup>(2)</sup> Planned 2023 participation takes into account net-to-gross and estimates unique participation by taking into account 2021 unique customer accounts to savings ratios. Therefore the number of planned measures may be more than the planned participants. For measure counts please view the widgets tables at the end of the Residential and C&I text sections. Table G-7 no longer includes a comparison to the previous year's participation. Due to the way unique participation is calculated it is not possible to compare year-over-year results.

- (1) Energy Efficiency Budget includes total expenditures and commitments. Includes all demand side management program-related expenses, including rebates, administration and general expenses, evaluation, commitments for future years and Company incentive.
- (2) Prior to 2017, Spending Budget Eligible for Shareholder Incentive includes: Implementation, Administration, General, and Evaluation Expenses; excludes EERMC and OER Costs, Commitments, Copays, and Outside Finance Costs. Beginning in 2017, Outside Finance Costs were also included. Beginning in 2018 Pilot expenses were also excluded. Beginning in 2019 ConnectedSolutions expenses and assessment were also excluded.
- (3) Actual Expenditures is actual spend during calendar year. Includes expenditures and commitments. Includes all demand side management program-related expenses, including rebates, administration and general expenses, evaluation, commitments for future years and Company incentive
- (4) Gas programs began during July 2007 and were not reported on separately that year since programs were still in development. The 2007 gas programs are included in 2008 reporting. Systems Benefit Charge shown for 2007 is the weighted average of \$0.063 per decatherm from January 1, 2007 June 30, 2007 and \$0.107 per decatherm from July 1, 2007 through December 31, 2008.
- (5) On July 25, 2011 the Commission ordered that National Grid could increase the gas System Benefits Charge from \$0.15 to \$0.411 per decatherm for the period of August 1, 2011 through December 31, 2011. Annual cost represents 7 months usage (632 therms) at \$0.015 per therm and 5 months usage (214 therms) at \$0.0411 per therm.
- (6) In the Company's gas and electric rate cases in docket 4323, the PUC approved the uncollectibles gross-up in the electric EE Program Charge effective February 1, 2013, and a new rate applicable to the gross-up of the gas EE Program Charge, effective February 1, 2013.
- (7) 2021 values are planned.
- (8) 2022 values are proposed.
- (9) Reflects the annual cost excluding Gross Earnings Tax.
- (10) Reflects the annual cost including Gross Earnings Tax.
- (11) The Gas EE Program Charge was uniform for all customers until 2014, at which time the Company proposed and the PUC approved individual factors for the residential and C&I sectors.
- (12) Incentive percentage not applicable for 2022 due to new performance incentive mechanism developed for the 2022 Annual Plan. See Section 11 of the Main Text of the 2022 Annual Plan for additional details.
