**RE: Docket No. SB-2021-04 – Narragansett Electric Company Aquidneck Island  
Gas Reliability Project Old Mill Lane, Portsmouth, Rhode Island  
Responses to EFSB Data Requests – Set 3**

Dear Ms. Massaro:

On behalf of The Narragansett Electric Company (the “Company”), I have enclosed the Company’s responses to the Energy Facility Siting Board’s Third Set of Data Requests in the above-referenced docket.

Thank you for your attention to this matter. If you have any questions, please contact me at (401) 709-3351.

Sincerely,

George W. Watson III

EFSB 3-1

Request:

In EFSB 2-1, the Board asked the Company to explain its assertion that Algonquin's plans to increase the diameter of the G-2 lateral pipeline will not impact the capacity constraint nor the capacity vulnerability that the proposed LNG vaporization facility at Old Mill Lane is designed to alleviate. In response, the Company stated that "the capacity constraint can only be resolved with other improvements on the G lateral allowing for increased capacity." Please indicate whether these "other improvements" involve G lateral upgrades to be located within Rhode Island or located somewhere else.

Response:

The Company does not have access to the complete scope of work that would allow for incremental capacity to resolve capacity constraint to Aquidneck Island, but the main trunkline of the G-System that feeds Aquidneck Island is in scope and generally located in Massachusetts. One component to addressing the capacity constraint would be the replacement of the entire length of the G-2 lateral with 12-inch pipe.
