Record Request No. 1

Please identify where in the Long Range Plan 22-06-NG are the tables showing gas consumption on Aquidneck Island?

Response:

Tables showing the forecast peak hour demand for Aquidneck Island can be found in Exhibit 2, pages 39-43 of the Long Range Plan 22-06-NG. It is a combination of the values found in the “Total Firm Peak Hour Model Flow” in rows labeled Portsmouth, one is the AGT meter from the pipeline and the other represents the portable LNG facility at Old Mill Lane which is listed as Portable LNG.

Record Request No. 2

What is the estimated removal costs for the Old Mill Lane site?

Response:

The estimated removal cost for the Old Mill Lane site is \$34,623.45.

This cost accounts for one day of labor for Rhode Island Energy Gas Crew and Support Crew to remove the two above grade manifolds, and one day of labor for a Contractor crew to remove the permanent sound wall.

However, if approved, so long as the natural gas system is active, the Company would likely maintain these items in service so that the site can be used as a backup supply during scheduled work on the transmission line or in the event of an emergency.
