Re: Fiscal Year 2023 Annual Gas Cost Recovery Reconciliation Docket No. 22-20-NG

Dear Ms. Massaro:

In accordance with the provisions of Rhode Island Energy's Gas Cost Recovery ("GCR") Clause in its gas tariff, R.I.P.U.C. NG-GAS No. 101 at Section 2, Schedule A, Sheet 1, Item 1.2, I have enclosed the Company's annual GCR reconciliation report. The GCR reconciliation contains actual gas cost and revenue data for the 12 months ending March 31, 2023, as set forth in the following six schedules:

- Schedule 1 presents the monthly ending deferred balances and the end-of-period over-recovery of approximately \$4.0 million, as shown on Schedule 1, Line (57).
- Schedule 2 provides a breakdown of actual gas costs.
- Schedule 3 summarizes gas cost revenue.
- Schedule 4 presents the calculation of working capital costs.
- Schedule 5 provides the calculations of inventory finance costs.
- Schedule 6 presents actual customer throughput for each rate class.

The year-end March 31, 2023 reconciliation balance of (\$3,984,358) differs from the March 2023 balance of (\$3,918,092) reflected in the April 2023 Monthly Deferred Report in Docket No. 22-20-NG due to corrections related to the application of the Fiscal Year 2023 Natural Gas Portfolio Management Plan ("NGPMP") Annual Report true-up and the allocation

¹ The Narragansett Electric Company d/b/a Rhode Island Energy ("Rhode Island Energy" or the "Company").

Robinson+Cole

of gas costs to the System Pressure Factor component of the Distribution Adjustment Charge (DAC), as detailed below. The correct year-end March 2023 balance of (\$3,984,358) will be reflected in the Company's June 2023 Monthly Deferred Report, which is scheduled to be filed on July 20, 2023 in Docket No. 22-20-NG.

In filing this annual GCR reconciliation report, the Company has made four adjustments. The first adjustment relates to the fiscal year beginning fixed cost under/(over) recovery balance. The second adjustment relates to the application of the Fiscal Year 2023 NGPMP true-up in the incorrect month. The third adjustment relates to an under allocation of gas costs to the System Pressure Factor component of the DAC for the months of February and March 2023. The fourth adjustment corrects the categorization of a specific contract from a variable cost to a fixed cost for the months of December through March 2023.

The first adjustment is to restate the fiscal year beginning fixed cost under/(over) recovery balance shown in column (a) line (3) of Schedule 1 to include the Fiscal Year 2022 NGPMP Annual Report true-up amount of \$27,224. This amount was erroneously excluded from the Fiscal Year 2022 annual GCR reconciliation report, and so reduced the overall deferral balance. By including the true-up amount in the beginning fixed cost under/(over) recovery balance, the Company is accounting for the Fiscal Year 2022 NGPMP true-up in this year's annual GCR reconciliation report. This adjustment was incorporated in the Company's monthly deferred reports starting with the October 2022 Monthly Deferred Report in Docket No. 5180.

The second adjustment is to reflect the Fiscal Year 2023 NGPMP Annual Report true-up amount of (\$41,872) in the March 2023 deferral balance. In the May 2023 Monthly Deferred Report, filed on June 20, 2023 in Docket No. 22-20-NG, the Fiscal Year 2023 NGPMP Annual Report true-up amount was erroneously applied to the May 2023 deferral balance rather than the March 2023 deferral balance. If this amount is not reflected in the March 2023 deferral balance, the annual GCR reconciliation balance would be understated by the amount of the NGPMP Annual Report true-up. The Company plans to restate the March and May 2023 deferral balances in the June 2023 Monthly Deferred Report, scheduled to be filed on July 20, 2023 in Docket No. 22-20-NG.

Robinson+Cole

Luly E. Massaro, Commission Clerk 2023 Annual Gas Cost Recovery Reconciliation July 7, 2023 Page 3 of 4

The third adjustment is to correct an under allocation of \$24,000 in gas costs associated with hourly peaking supplies to the System Pressure Factor component of the DAC for the months of February and March 2023. These costs are associated with a specific contract and were erroneously excluded from the total cost of gas associated with hourly peaking in the February and March 2023 Monthly Deferred Reports. The Company has correctly identified and allocated these costs to the System Pressure Factor component of the DAC in this annual GCR reconciliation report and plans to incorporate this adjustment in the June 2023 Monthly Deferred Report, scheduled to be filed on July 20, 2023 in Docket No. 22-20-NG.

The final adjustment is to the ending fixed and variable cost deferral balances that comprise the total ending deferral balances for the period December 2022 through March 2023 to correctly categorize certain costs as fixed rather than variable. This adjustment does not change the overall ending deferral balance. Instead, it changes the fixed supply cost ending deferral balance and the variable supply cost ending deferral balance, both of which together equal the overall ending deferral balance.

In particular, this final adjustment concerns costs associated with a specific contract for hourly peaking fixed costs, which are reallocated from the total cost of gas for recovery via the System Pressure Factor component of the DAC. This contract was erroneously characterized in the Company's deferral reports as a variable cost. Since the cost associated with this specific contract is reallocated to the DAC, it does not impact the overall ending deferral balance of the GCR. Its categorization as a fixed cost versus a variable cost does, however, impact the ending deferral balances of the fixed and variable components of the GCR, which are summed to total the overall ending balance. Although the overall ending deferral balance is unaffected, this correction is appropriate since the GCR rates scheduled to take effect November 1, 2023, are composed of fixed and variable rate components. These fixed and variable rate components are calculated separately and include the actual fixed and variable ending deferral balances as of March 2023. Hence, correcting the categorization of the costs associated with this specific contract ensures that the reconciliation components of the fixed and variable rate components of the GCR to take effect November 1, 2023, are properly calibrated. The Company plans to incorporate this adjustment to the fixed and variable deferral balances in the June 2023 Monthly Deferred Report, scheduled to be filed on July 20, 2023 in Docket No. 22-20-NG.
