

**STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS  
PUBLIC UTILITIES COMMISSION**

PETITION TO ACCELERATE DUE TO DG  
PROJECTS – TIVERTON PROJECTS

Docket No. 23-37-EL

**MOTION TO INTERVENE BY  
GREEN DEVELOPMENT, LLC**

By its attorneys, Green Development, LLC (“Green”) moves to intervene in the above-captioned proceeding pursuant to Rule 1.14 of the Rhode Island Public Utilities Commission (“PUC”) Rules of Practice and Procedure (“Rules”), 810-RICR-00-00-1. In support of this motion, Green states:

1. Green is a developer of renewable energy projects across Rhode Island.
2. Rule 1.14(B) states any person claiming an interest of such nature that intervention is necessary or appropriate may intervene in any proceeding before the PUC.
3. It is necessary and appropriate that Green intervene in this proceeding as Green has an interest that will be directly affected, which is not adequately represented by existing parties, and will be bound by the Commission’s action in the proceeding. Rule 1.14(B)(2).
4. R.I. Gen. Laws §39-26.3-4.1(a) provides that “The electric distribution company may only charge an interconnecting, renewable energy customer for any system modifications to its electric power system specifically necessary for and directly related to the interconnection.” R.I. Gen. Laws §39-26.3-4.1(b) requires that “[a]ny system modifications benefiting other customers shall be included in rates as determined by the public utilities commission.” The interconnection tariff incorporates that statutory language and adds:

5.4 Separation of Costs

a. The Company may combine the installation of System Modifications with System Improvements to the Company's EDS to serve the Interconnecting Customer or other customers, but shall not include the costs of such System Improvements in the amounts billed to the Interconnecting Customer for the System Modifications required pursuant to this Interconnection Tariff. Interconnecting Customers shall be directly responsible to any Affected System operator for the costs of any System Modifications necessary to the Affected Systems.

5. The statute's provision on cost sharing, RI Gen. Laws Section 39-26.3-4.1(b),

provides:

(b) If the public utilities commission determines that a specific system modification benefiting other customers has been accelerated due to an interconnection request, it may order the interconnecting customer to fund the modification subject to repayment of the depreciated value of the modification as of the time the modification would have been necessary as determined by the public utilities commission. Any system modifications benefiting other customers shall be included in rates as determined by the public utilities commission.

6. In reliance on these laws, Green has entered into agreements with Narragansett Electric d/b/a Rhode Island Energy (RIE) to self-construct upgrades to the electric distribution system (system improvements) that will benefit other customers and will, therefore, be directly and significantly impacted by the decision issued in this docket.

7. As described in the petition itself, Green chose to, and was approved by RIE to, self-perform design and construction of the civil duct bank work for the interconnection of its Tiverton project. More specifically, "the construction of a dedicated circuit (33F6) out of Tiverton Substation and the installation of approximately 21,000 feet of a manhole and duct system with conductor 1000 kcmil SCU EPR cable were accelerated due to the interconnection of the Tiverton Projects ('System Improvements')." *Pre-Filed Joint Direct Testimony of Erica J. Russell Salk and Stephanie A. Briggs*, at p. 12.

8. This work will benefit other customers. *Id.* at p. 15.

9. RIE proposes to cost share for this work in order to accommodate additional customers. RIE would "pay Green for the specific system improvements that benefitted distribution

customers, less the estimated depreciated value, at the time that the project is placed in service, the third party audit and verification is complete, and the project is fully reconciled.” Id. at p. 19.

10. RIE would “pay Green for the specific system improvements that benefitted distribution customers, less the estimated depreciated value, at the time that the project is placed in service, the third party audit and verification is complete, and the project is fully reconciled.” Id.

11. Green supports RIE’s Petition as filed. Green will advocate (if and as necessary) for positions that are consistent with the purpose of 39-26.4-1 and its implementing tariff. Green will comment on how the purpose of the Act and tariff can be achieved as currently stated.

12. Green has currently unrepresented interests in this proceeding that will be represented by this intervenor.
