☒ Yes ☐ No ☐ N/A

Comments: AlsoEnergy is an independent performance monitoring provider and reporting service provider who handles independent data reporting for 13 U.S. based incentive-based programs. AlsoEnergy is an approved Independent Verifier at the NEPOOL GIS reporting data for REC purposes in CT, MA, ME, NH, VT, and RI. AlsoEnergy's software has an automated reporting feature to detect anomalies in meter data.

B.2.3 Aggregation Agreement includes a declaration of any and all business or financial relations between aggregator and Verifier sufficient to ensure the independence of the Verifier in accordance with Section 6.8.iii.c of the RES Regulations (10% or more ownership in voting stock, or family officer/etc.). (per Appendix D.2.c)

☒ Yes ☐ No ☐ N/A

Comments: AlsoEnergy provides independent monitoring and reporting services. Although AlsoEnergy sells equipment to be used in conjunction with the PV system, by no means does AlsoEnergy hold a direct or indirect ownership in the renewable energy source. AlsoEnergy has no financial interest and receives no compensation in Renewable Energy Certificates (RECs) generated by any source using AlsoEnergy as the independent monitor. AlsoEnergy shall not receive compensation for monitoring services that is a function of the number of certificates issued to any source using its independent monitoring and reporting services.

B.2.3.1 Aggregation Agreement includes statement indicating under what circumstances the Verifier would not be considered sufficiently independent of the individual Generation Unit, and that Generation Units not meeting this independence test would not be allowed to participate in the aggregation. (per Appendix D.2.c.1)

☒ Yes ☐ No ☐ N/A

Comments:

B.2.4 Aggregation Agreement identifies the type of technology that will be included in the aggregation and provides a statement that the aggregation will include only individual Generation Units that meet all the requirements of the RES Regulations (physical location, vintage, etc.). (per Appendix D.2.d)

☒ Yes ☐ No ☐ N/A

Comments: The generation unit is a single-axis tracking ground PV system that uses mono-crystalline P-type module technology. It uses string inverter technology and uses revenue grade production meters. The aggregation will only include individual Generation Units that meet all the requirements of these regulations.

B.2.5 Aggregation Agreement provides an adequate description of proposed operating procedures for the aggregation, by which the Verifier shall ensure that individual Generation Units in the aggregation comply with all eligibility requirements and that the NEPOOL GIS Certificates created accurately represent generation (see Section 6.8.iii.e of the RES Regulations). (per Appendix D.2.e)

☒ Yes ☐ No ☐ N/A

Comments: The aggregation owner will verify that the unit is in compliance with the RI RES rules and ensure that the independent verifier follows RI rules. The independent verifier will be required to collect energy production through a revenue grade production meter, taking measurements directly from the system's AC current lines and pushing that data to a data logging gateway device. The verifier will enter this data into the NEPOOLGIS system and confirm this entry with the aggregation owner. The verifier has a dedicated reporting and support team to review and verify data who can report to the Commission.

B.2.5.1 At a minimum the proposed operating procedures include reasonable and sufficient details for:

- Determining that the Generation Unit exists and is in compliance with RES Regulations and Commission-approved Aggregation Agreement.

  ☒ Yes ☐ No ☐ N/A

- Meter reading procedure that allows the Verifier to verify these readings (manual or remote, via the aggregators own system or an independent system) in a manner fully compliant with NEPOOL GIS Operating Rules regarding metering.

  ☒ Yes ☐ No ☐ N/A

- Specifying how generation data will be entered into NEPOOL GIS to create Certificates.

  ☒ Yes ☐ No ☐ N/A

- Documenting a procedure to verify independently that the GIS Certificates created for the aggregation are consistent with the meter readings.

  ☒ Yes ☐ No ☐ N/A

- Correcting discrepancies in NEPOOL GIS Certificate generation identified by the Verifier.

  ☒ Yes ☐ No ☐ N/A

  Comments:

B.2.6 Aggregation Agreement provides an adequate description of how the Verifier will be compensated for its services by the aggregator (in no

instance is the Verifier is compensated in a manner linked to the number of NEPOOL GIS Certificates created by the aggregation). (per Appendix D.2.f)

☒ Yes ☐ No ☐ N/A

Comments: AlsoEnergy provides agency reporting service for a term of 1 year or 5 years for a flat fee as a part of the order the contracted installer and/or system owner purchases from AlsoEnergy. At the end of the term, AlsoEnergy offers a renewal of monitoring and reporting services. This fee would be a fixed price for service and unrelated to the number of NEPOOL GIS Certificates created.

B.2.7 Aggregation Agreement provides an adequate confirmation and a description of how, no less frequently than quarterly, the Verifier will directly energy into the NEPOOL GIS the quantity of energy production in the applicable time period from each Generation Unit in the aggregation. The entry of generation data by the Verifier must be through an interface designated for this purpose by the NEPOOL GIS and in accordance with NEPOOL GIS Operating Rules applicable to Third-Party Meter Readers, and to which the Aggregation Owner shall not have access. (per Appendix D.2.g)

☒ Yes ☐ No ☐ N/A

Comments: AlsoEnergy will enter production directly into the NEPOOL GIS once a month, following the end of the reportable month.
