Generation Unit Information	<a href="#">+/- Expand/Collapse</a>
Commercial Operation, Metering and Location	<a href="#">+/- Expand/Collapse</a>
<b>Appendix F - Required of all Applicants Proposing to Use An Eligible, including Unlisted, Biomass Fuel</b>	<a href="#">+/- Expand/Collapse</a>
F.1 The attached Fuel Source Plan includes a detailed description of the type of Eligible Biomass Fuel to be used at the Generation Unit.	Yes
F.1 Comments	Yes, the Facility will produce biogas from biomass already considered Eligible Biomass Fuels in their own right. These Eligible Biomass Fuels are bark, wood chips, slash, lumber ends and trimmings, yard trimmings, and energy crops.
F.2 If the proposed fuel is "other clean wood," the Fuel Source Plan should include any further substantiation to demonstrate why the fuel source should be considered as clean as those clean wood sources listed in the legislation. Further substantiation attached?	N/A
F.3 In the case of co-firing with ineligible fuels, the Fuel Source Plan must include a description of (a) how such co-firing will occur; (b) how the relative amounts of Eligible Biomass Fuel and ineligible fuel will be measured; and (c) how the eligible portion of generation output will be calculated. Description attached?	N/A

<p>F.4 Comments</p>	<p>Vermont Renewable Gas' parent company, Synergy Bioproducts Corp. has entered into commercial discussions with several suppliers of Eligible Biomass Fuel. These suppliers are independent, small businesses already part of the mature lignocellulosic biomass supply chain in Vermont's Northeast Kingdom. As the Facility will not reach commercial operation until Q3 2023 a fuel supply contract(s) is not yet in place.</p>
<p>5 Please include in the Fuel Source Plan an acknowledgement that the fuels stored at or brought to the Generation Unit will only be either Eligible Biomass Fuels or fossil fuels used for co-firing and that Biomass Fuels not deemed eligible will not be allowed at the premises of the certified Generation Unit. And please certify that this statement is true.</p>	<p>Yes</p>
<p>F.6 If the proposed fuel includes recycled wood waste, please submit documentation that such fuel meets the definition of Eligible Biomass Fuel and also meets material separation, storage, or handling standards acceptable to the Commission and furthermore consistent with the RES Rules. Documentation attached?</p>	<p>N/A</p>
<p>F.7 Please certify that you will file all reports and other information necessary to enable the Commission to verify the on-going eligibility of the renewable energy generators pursuant to RES Rules Section 2.6(C). Specifically, RES Rules Section 2.6(C)(1) states that Renewable Energy Resources of the type that combust fuel to generate electricity must file quarterly reports due 60 days after the end of each quarter on the fuel stream used during the quarter.</p>	<p>Yes</p>
<p>F.8 Please attach a copy of the Generation Unit's Valid Air Permit or equivalent authorization. Valid Air Permit or equivalent attached?</p>	<p>No</p>
<p>F.8 Comments</p>	<p>Vermont Renewable Gas has submitted a valid air permit application to the Vermont Department of Environmental Conservation on November 21, 2023. The application was deemed administratively complete on December 6, 2023. Vermont Renewable Gas' air permitting consultants have strong confidence that the Facility will receive a valid air permit as a non-major source of air emissions. VRG had met with the Vermont Department of Environmental Conservation, prior to its application submission for a pre-s</p>
<p>F.9 Effective date of Valid Air Permit or equivalent authorization:</p>	<p>00/00/0000</p>
