Yes  No  N/A

**Comments:** AlsoEnergy provides independent monitoring and reporting services. Although AlsoEnergy sells equipment to be used in conjunction with the PV system, by no means does AlsoEnergy hold a direct or indirect ownership in the renewable energy source. AlsoEnergy has no financial interest and receives no compensation in Renewable Energy Certificates (RECs) generated by any source using AlsoEnergy as the independent monitor. AlsoEnergy shall not receive compensation for monitoring services that is a function of the number of certificates issued to any source using its independent monitoring and reporting services.

**B.2.3.1** Aggregation Agreement includes statement indicating under what circumstances the Verifier would not be considered sufficiently independent of the individual Generation Unit, and that Generation Units not meeting this independence test would not be allowed to participate in the aggregation. Yes  No  N/A

**Comments:** The aggregation owner will verify that the unit is in compliance with the RI RES rules and ensure that the independent verifier follows RI rules. The independent verifier will be required to collect energy production through a revenue grade production meter, taking measurements directly from the system's AC current lines and pushing that data to a data logging gateway device. The verifier will enter this data into the NEPOOL GIS system and confirm this entry with the aggregation owner. The verifier has a dedicated reporting and support team to review and verify data who can report to the Commission.

**B.2.6** Aggregation Agreement provides an adequate description of how the Verifier will be compensated for its services by the aggregator (in no instance is the Verifier is compensated in a manner linked to the number of NEPOOL GIS Certificates created by the aggregation). (per Appendix D.2.f)
