1. Please note that the payments for energy, capacity, or other environmental attributes will not occur until the required metering is commissioned, the Company is successfully able to communicate with the meter, and all other related requirements are met (which may include, without limitation, ISO-NE asset registration)
2. The communication with the DER is critical in order for the Company to register the asset with ISO-NE (if required) and to obtain the necessary data used to calculate incentive payments, The customer's failure to provide or maintain the communication systems in good working condition could result in diminished, suspended, or terminated incentive payments.
3. As per [Net Metering RIPUC 2241](#), section II clause 10 on sheet 11, Net Metering Customer will only be able to receive net metering payments once all conditions are met including but not limited to, registration with ISO-NE. The company is required to provide meter data in order to sell the output of the Eligible Net Metering System into the ISO-NE administered markets.

Rhode Island Energy wishes you the best with your new system and hopes you get many years of use. If your system changes ownership, please [Contact Us](#) immediately so we can keep our records up to date.
