DIV 5-2 Reference Appendix A of Exhibit No. 7, Schedule 3, page 1, and Schedule 4, page 1. Please explain how total usage in August 2024 as shown on Schedule 3 can exceed the Max Monthly pumpage shown on Schedule 4 for 2024.

Response: The Max Monthly pumpage show on Schedule 4 was inadvertently linked to the second highest Max Month of pumpage for 2024. Schedule 4 should be changed to reflect the Max Monthly pumpage of 131,646,000 which occurred in July of 2024. See the Excel Spreadsheet titled 'DIV 5-2 Attachment' for the corrected demand study and the water production schedule for 2024 that shows the correct Max Monthly sendout.

Conversely, the maximum hour and maximum day ratios by class have been updated based on the correction. A comparison of the as-filed vs. corrected maximum day and maximum hour ratios by class are shown below. A revised cost of service study will be provided with Company Witness Herbert's rebuttal testimony that will reflect the updated maximum day and maximum hour ratios by class.
