

Rhode Island Energy Efficiency and Resource Management Council
RIPUC Docket 25-37-EE
In Re: 2026 Annual Energy Efficiency Plan
Responses to the Commissions First Set of Data Requests
Issued November 14, 2025

PUC 1-1

Request:

Please refile Attachment 1 to Johnson and Caesar's testimony removing participant costs and performance incentives from the Summary Tab, column (i) and updating column (k) accordingly.

Response:

Please see Attachment 1_PUC_1-1_Revision. The following is a summary of changes made to be responsive to the data request.

- Column (i) on the Summary Tab has been updated to remove participant costs and performance incentives. The Income Eligible values are unchanged because there are no participant cost or performance incentive values for this sector.
 - Electric Residential changed from \$0.15 to \$0.12
 - Electric Commercial & Industrial changed from \$0.12 to \$0.08
 - Electric Total changed from \$0.15 to \$0.12
 - Gas Residential changed from \$17.56 to \$14.22
 - Gas Commercial & Industrial changed from \$11.13 to \$9.22
 - Gas Total changed from \$18.58 to \$16.09
- A note has been added below Table 2 to clarify what costs are included in the cost per savings columns.

No changes were made to column (k) on the Summary Tab because the cost inputs to these values – columns (f), (g), and (h) – already excluded participant costs and performance incentives.
