Owner	+/- Expand/Collapse
Operator	+/- Expand/Collapse
Location	+/- Expand/Collapse
Generation Unit Information	+/- Expand/Collapse
NEPOOL GIS Identification Number	NON229160
Nameplate Capacity AC (kW)	995.00
Maximum Demonstrated Capacity AC (kW)	995.00
Has the Unit been certified as a Renewable Energy Resource for eligibility in another state's RPS?	No
Technology Type(s)	Direct Solar Radiation
Commercial Operation, Metering and Location	+/- Expand/Collapse
Appendix D - Required of Applicants Seeking Eligibility for Customer-Sited and/or Off-Grid Generation Facilities, Remote Net Metered Facilities, and Associated Aggregations	+/- Expand/Collapse
D.1 Name(s) and Location(s) in Rhode Island of each Generation Unit in the aggregation:	
D.1(a) Generation Unit Name	Holliston Sand Solar - BTM

State	RI
Zip Code	02896
City	Slatersville
State	RI
Zip Code	02876
D.2(a) Name and contact information of the Aggregator (or single site) Owner, to which these regulations and stipulations of certification shall apply, and who shall be the initial owner of any NEPOOL GIS Certifications so certified:	
Name	Carmine Iacuone
Company Name	Holliston Sand Company, Inc
Street	PO Box 1168
City	Slatersville
State	RI
Zip Code	02876
Phone	2019703707
Email	w.shortiii@verizon.net
D.2(b) Name, contact information, and qualifications of the Verifier:	
Name	Bill Short
Company Name	William P. Short III
Street	PO Box 237173
City	New York
State	NY
Zip Code	10023
Phone	2019703707
Email	w.shortiii@verizon.net
Verifier Qualifications	The Independent Verifier of the solar facility output and resultant certificates will be Mr. William P. Short III, Master Meter Reader. Mr. Short has the following qualifications: • Undergraduate and graduate degrees in electrical engineering from Duke University and University of Pennsylvania, respectively; • Participant in the drafting of and knowledgeable about the Massachusetts Renewable Portfolio Standard regulations, including its Third-Party Meter Reader (now, Independent Verifier) regulations; • Participant in the drafting of and knowledgeable about all other New England states renewable portfolio standards, either at the legislative or regulatory levels; • Participant in the drafting of and knowledgeable about the Operating Rules of the NEPOOL Generation Information System; • Qualified Third-Party Meter Reader (now Independent Verifier) in Rhode Island, Independent Monitor in New Hampshire and Verifier in Connecticut. (There is no equivalent requirement in Maine); •

Verifier.	Among his duties for Holliston are the following: Holliston may request that Mr. Short assist Holliston with the registration, creation and sale of the NEPOOL GIS certificates generated by its solar generating facility, located in North Smithfield, Rhode Island (the "Solar Generating Facility"). Specifically, on Holliston's behalf, Mr. Short will register its Solar Generating Facility with the NEPOOL GIS. Mr. Short will also assist Holliston in marketing its NEPOOL GIS certificates. Included in this work, Mr. Short will offer the NEPOOL GIS certificates directly to New England Distribution Companies in their periodic REC auctions,
D.2(d) Please identify the type of technology that will be included in the aggregation (or single-site generation unit), and a statement that the aggregation will include only individual Generation Units that meet all the requirements of these regulations, for example physical location, vintage, etc.	The Solar Generating Facility is a 995 KV solar photovoltaic facility of which the facility includes only individual units that meet all of the requirements of the RI RES regulations; such as, physical location and vintage.
D.2(e) Please describe the proposed operating procedures for the aggregation (or single-site generation unit), by which the Aggregation Owner shall ensure that individual Generation Units in the aggregation comply with all eligibility requirements and that the NEPOOL GIS Certificates created accurately represent generation.	Mr. Short will at least quarterly access the Facility's on-line reporting system and determine the monthly production and compare its production to its lifetime records. Once Mr. Short verifies that production as being reasonable, he will enter it into his records for the Facility and upload it into the GIS.
D.2(f) Please describe how the Verifier will be compensated for its services by the aggregator. In no instances will an aggregation be certified in which the Verifier is compensated in a manner linked to the number of NEPOOL GIS Certificates created by the aggregation.	Since Mr. Short is paid a fixed fee for his services, there is no way, unless his consulting agreement is modified, that he cannot be qualified as an Independent Verifier (formerly, Third-Party Meter Reader). If Mr. Short's business relationship should change with Holliston (for example, if he were to become an officer, director, partner, employee or representative of Holliston or, if he were to be paid based upon production by the Solar Generating Facility), Holliston will immediately inform the RI PUC of such modifications. During the term of consulting agreement, Mr. Short will be paid a flat, fixed fee for his services. His agreement, which runs until the end of the 2027 Compliance Year, can be terminated by Holliston at any time without cause provided that Mr. Short has been paid the remaining balance of his fixed fee. None of Mr. Short's compensation will be subject to adjustment for the increase or decrease in production of Certificates by the Solar Generating Facility.
D.2(g) Please confirm and describe how, no less frequently than quarterly, the Verifier will directly enter into the NEPOOL GIS the quantity of energy production in the applicable time period from each Generation Unit in the aggregation.	<ul style="list-style-type: none"> • Mr. Short has visually seen the Solar Generating Facility. He can, therefore, independently provide an opinion that the Facility exists. • Mr. Short will take meter readings as frequently as monthly. He will verify quarterly the generator meter readings. • Mr. Short will directly input the generation data directly into the NEPOOL GIS website. • Mr. Short will respond promptly to any RI PUC questions, surveys or reports requested. • Mr. Short will report any unexplained deviation in production from the Solar Generating Facility to the RI PUC. Mr. Short will at least quarterly access the Facility's on-line reporting system and determine the monthly production and compare its production to its lifetime records. Once Mr. Short verifies that production as being reasonable, he will enter it into his records for the Facility and upload it into the GIS.
D.3(a) Applicant must acknowledge that any changes to or deviations from the Aggregation Agreement will be considered a change in generator status, and will require recertification by the Commission.	Yes
D.3(b) Applicant must acknowledge that the Commission will be promptly notified of any changes to or deviations from the Aggregation Agreement.	Yes
D.3(c) Applicant must acknowledge that in the event that notice of such changes or deviations is not promptly given, all Generation Units in the aggregation may be de-certified.	Yes

<p>Sections 2.3(5) and 2.3(26), respectively, or a Customer-sited (grid connected) or Remote Net Metered (grid connected) Generation Facility, the associated Generation Attributes have not otherwise been, nor will be sold, retired, claimed or represented as part of electrical energy output or sales, or used to satisfy obligations in jurisdictions other than Rhode Island.</p>
