Re: Petition of Ambit Northeast, LLC to Reopen and Amend Its Renewable Energy Standard Compliance Filing for Compliance Year 2025 (ISO-NE Asset ID #43622)

Dear Ms. Wilson-Frias and Ms. De La Rosa:

Ambit Northeast, LLC d/b/a Ambit Energy ("Ambit"), an affiliate of Vistra Corp., respectfully petitions the Rhode Island Public Utilities Commission (the "Commission") to reopen Petitioner's Renewable Energy Standard ("RES") Annual Compliance Filing for Compliance Year ("CY") 2025 and to recalculate Petitioner's CY 2025 RES obligations using the final load data reflecting Retail Billing Adjustments ("RBAs") filed by The Narragansett Electric Company d/b/a Rhode Island Energy ("Rhode Island Energy") through December 2025. This petition is submitted pursuant to 810-RICR-00-00-1.11(A).

I. Petitioner and Grounds of Interest

Petitioner is a competitive retail electricity supplier serving customers in Rhode Island and an Obligated Entity subject to the RES, R.I. Gen. Laws § 39-26-1 et seq., and the Commission's RES regulations. Petitioner is a Delaware limited liability company with its principal place of business at 6555 Sierra Drive, Irving, Texas 75039. Ambit is authorized to do business in Delaware, Illinois, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, Ohio, Pennsylvania, Rhode Island, Virginia, and Washington, D.C. Petitioner's CY 2025 RES obligations are calculated on its Rhode Island load, and Petitioner is therefore directly affected by the load figure used to determine those obligations.

DuaneMorris

II. Facts

On June 11, 2026, Rhode Island Energy provided the original CY 2025 load volumes that were used to calculate obligation requirements for CY 2025 compliance filings due July 15, 2026. Petitioner timely submitted its CY 2025 compliance filing based on those volumes and met its obligations as originally calculated.

On September 29, 2026, the RES Program Administrator notified suppliers that the RES Portal had been updated with load volumes including RBAs filed by Rhode Island Energy through December 2025, and that suppliers preferring to use the updated load must revise their CY 2025 filings by 4:00 PM on October 30, 2026. At Petitioner's request, the Program Administrator reopened Petitioner's CY 2025 filing on October 19, 2026, and advised that adjusting the filing does not on its own adjust Petitioner's obligations and that a petition to the Commission is required.

Petitioner resubmitted its revised CY 2025 filing on October 20, 2026, a copy of which is attached as Exhibit A.

The RBA-adjusted load reduces Petitioner's CY 2025 total load and corresponding RES obligations as follows:

	Original Filing (July 2026)	**Revised Filing (Oct. 20, 2026)**	**Change**
Total load (MWh)	7,621.700	7,459.423	-(162.277)
RI New Calculated obligation (32%) RI New CY 2024 Banked RI New Net Obligation	2,439 12 2,427	2,388 12 2,376	(51) 0 (51)
RI Existing obligation (2%)	153	150	(3)
RI New CY 2025 surplus available for banking	0	51	51

Petitioner paid no Alternative Compliance Payment for CY 2025; accordingly, no refund is requested.

III. Relief Requested

Petitioner respectfully requests that the Commission:

1. Reopen Petitioner's CY 2025 RES Annual Compliance Filing and accept the revised filing submitted October 20, 2026;
2. Determine Petitioner's CY 2025 RES obligations on the basis of the RBA-adjusted load of 7,459.423 MWh; and

3. Authorize Petitioner to bank the RI New certificates in excess of its recalculated CY 2025 obligation, resulting in an ending balance of 51 RI New certificates (including approximately 51 additional certificates attributable to the RBA-adjusted load) available for use in subsequent compliance years, in accordance with applicable banking rules.

IV. Authority

The Commission has authority to administer the RES and to permit Obligated Entities to bank excess compliance under R.I. Gen. Laws § 39-26-6 and the Commission's RES regulations. This petition is filed under 810-RICR-00-00-1.11(A), which governs petitions for relief under any statute or other authority delegated to the Commission.

The requested relief is consistent with the Program Administrator's September 29, 2026 notice, which contemplates that suppliers whose updated filings lower their obligations may bank excess certificates under normal banking rules.
