RE: Revolution Wind

Dear Energy Facility Siting Board Members,

On behalf of the North Kingstown Chamber of Commerce, I am writing to you in support of the Revolution Wind farm project.

The President of the United States and his administration has made it clear that offshore wind will power millions of homes up and down the Eastern Seaboard and Revolution Wind. The wind farm will power over 350,000 homes across Rhode Island and Connecticut, a major step forward in reaching both state's renewable energy goals. Committing to large-scale renewable projects like Revolution Wind will pave the way for providing good-paying green infrastructure jobs.

When it comes to corporate citizens, we recognize Ørsted and Eversource as two companies seeking to promote natural resources and renewable power. In a time where America is seeking to craft an entirely new industry, these two companies stepped up to deliver and help craft this country's future and this only says good things about their citizenship.

In closing, the Revolution Wind farm project will be a necessary and vital resource in the future. We have the opportunity and the means to grow the American offshore wind industry and to develop clean and renewable electricity. We ask that you approve the Revolution Wind farm.

Best,

A handwritten signature in blue ink that reads "Kristin Urbach".
