**Subject:** [EXTERNAL] : LNG Vaporization Facility at Old Mill Lane

Hi Emma

I am writing to express my concern regarding the proposals for a LNG site located at old mill lane in Portsmouth Ri, which is in close proximity to my Home on Peckham Ave in Middletown. I am opposed to any approval at this time for either temporary or permanent site location at old mill lane. To date there has been little opportunity for community input, no safety or evacuation plans readily available and no training for the local first responders if there were to be an incident. It seems as though there has been little effort made for a long term solution to the energy problems facing the island and National grid is simply defaulting to using what is existing, which was in no way designed or approved for the proposed utilization of the site. I feel this is extremely short sighted as the energy needs of the future will be failed to be met with this band aid solution currently being proposed. I ask that the board denies this application and require a sustainable long term solution to be developed by National Grid.

Respectfully,

Brian Burns
