**ENERGY FACILITY SITING BOARD'S  
THIRD SET OF DATA REQUESTS TO  
INVENERGY THERMAL DEVELOPMENT LLC**

EFSB 3-1 At the March 31, 2016 public comment hearing, Invenergy Thermal Development LLC provided powerpoint presentation slides that represented the capacity of natural gas plants make "it possible to bring more renewables online in New England." Please provide detailed data and explanation to support this assertion.

EFSB 3-2 Does Invenergy intend to offer any Clear River Energy Center (CREC) output into ISO New England's Ancillary Markets, including both reserves and regulation services, and if so, which products are possible for this facility.

EFSB 3-3 Is the CREC, or will it be, qualified as a fast-start generator per the ISO New England's requirements. What does Invenergy anticipate CREC's CLAIM-10 and CLAIM-30 values will be?

EFSB 3-4 Are the fast start capabilities unique to CREC compared to the existing New England fleet of generators? If so, please explain.
