Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

M Feibelman

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clean River Energy Center, a massive new \$700 million fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Thank You
Maggie

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clear River Energy Center, a massive new fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

This giant power plant is not needed to keep the lights on. We should be preserving that piece of land and the surrounding land for future generations to enjoy. That part of Burrillville was farmland at one time is west of all the old mills sites that we had in our town at one time. That part of Burrillville is one of the cleanest parts of Rhode Island. It has excellent well water.

The roads in our town are not as nice as they were before winter and are crumbling apart. The truck traffic will be a large burden on our town. I'm really worried about air pollution, acid rain and acid snow and will have to move away from my family if this is built.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,
Marc Laprise Jr.

Dear Bianco,

Please come to your senses. If there is anything more important to us than the protection of our planet earth, I don't know it. If you have children, or grandchildren (I have three), then you must realize that their future, and the future of all life on earth, is at stake. We cannot get another planet. It's this one or nothing. You must, in the name of everything that's holy, do whatever it takes to save our mother, the planet earth.

As there is no need for the small amount of power that invenergy has managed to sell, there is no need to build this plant!

Buy your own charter you are only supposed to be involved in siting power plants in emergency situations. Those days are gone and the siting board should have no authority in this issue and should be disbanded.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Margaret Desjarlais

Most of the research coming forward will absolutely prove hands down that fracking is one the major causes of the devastation to the environment. Why are we not using green energy (ie. Solar, wind, wave, water, etc.) Stop the corruption and theft of our most valuable resources (life and liberty of the host or earth). Stop the madness and exploitation of the earth and all its resources.

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clean River Energy Center, a massive new \$700 million fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Mary Elliott

Dear Bianco,

At this point in the siting process, to have such an egregious lack of information goes against everything that the Siting Act had intended for this process.

While the recently submitted water plan update filled in the one critical missing piece of the application, the water source, what it also did was to change a significant amount of the application, a significant amount of the information that the town and the state have spent all of these past months studying and paying experts to understand and rendering advisory opinions on to the EFSB.

The advisory opinions of one half of the agencies that came in by the September deadline cited missing information.

Now, with the updated water plan change, many of the advisory opinions are now no longer accurate as they reflect a different proposal entirely.

With the new water plan we need to start all over studying the traffic (DOT), the air impacts (DOH), the footprint of the plant (DEM), the noise levels (Burrillville planning and Zoning Boards), to name some.

With the recent failure of Invenergy to obtain a forward capacity obligation yet again for the second unit, I fully believe that the application must be changed, yet again, to reflect this and only be looking to site one turbine, not the originally proposed two. The Siting Act is clear in that it is only to be used to site energy that is needed. Certainly energy that could not be sold two years in a row is absolutely not needed.

It is time to dismiss the application as it stands. Too much has been changed. Too much is still missing. To not allow the advisory period to reopen would be grossly negligent and yet you cannot just go back, you must go forward.

I ask that the EFSB members realize this and act accordingly and dismiss the Invenergy application as it currently stands.

Thank you,
Mary

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Mary Gauvin

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clean River Energy Center, a massive new \$700 million fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job. This power plant would not only be a step in the wrong direction but would also put our communities at risk. Just take a look at all the failed pipelines and all the damage caused by fracking. It's just not worth the risk! Please reject this project and help keep Rhode Island on track as a leader in clean energy. Thank you

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Mary Hill

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clean River Energy Center, a massive new \$700 million fracked-gas power plant in Burrillville, RI.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Please issue an order to dismiss Invenergy's application and close the docket for this project.

Sincerely,

Michael Langlais

Dear Bianco,

I request that the Energy Facility Siting Board dismisses Invenergy's application for the Clean River Energy Center, a massive new \$700 million fracked-gas power plant in Burrillville, RI.

Hundreds of acres of forest would have to be cleared for the plant, which would emit dozens of dangerous toxins and emit the equivalent greenhouse gas emissions of over 760,000 cars per year.

Residents of Burrillville have been resisting the fossil fuel industry for thirty years, and the town is already home to two fracked-gas pipelines, two fracked-gas compressor stations and a fossil fuel power plant.

Invenergy has failed to provide enough information for the agencies and subdivisions to issue a fully informed opinion, which violates the Energy Facility Siting Act. There is still not enough information for the Board to do its job.

Please issue an order to dismiss Invenergy's application and close the docket for this project.
