We are willing to destroy the most biodiverse area in the state for no reason at all!

Thank you,
Sister Mary

Bianco, Todd (PUC)

Let's put this is the data under consideration for determining whether we should build a fracked gas/diesel power plant with truckloads of water needed!

[\[ecori.org\]](#)

"But the developer, Invenergy Thermal Development LLC, has had air-pollution problems at a natural-gas power plant it opened last year in Pennsylvania.

The [Lackawanna Energy Center \[lackawannaenergy.com\]](#) in Jessup, Penn., has violated air-pollution regulations since it began operations last spring and Invenergy hasn't been forthcoming with the details.

Since May 2018 there have been at least six unreported releases of [nitrogen oxides \[toxtown.nlm.nih.gov\]](#) (NOx) in excess of state standards. NOx is linked to several health and environmental problems, such as respiratory illnesses.

Invenergy didn't initially report the air-pollution releases to state officials. As reported by [The Scranton Times Tribune \[thetimes-tribune.com\]](#), residents and Jessup council members were critical of Invenergy's lack of communication on excessive air pollution, including an episode on Aug. 29, 2018, when the loss of power at the energy facility caused a NOx release more than three times the legal limit for an hour. Invenergy blamed the incident on an electrical malfunction."

Why any of you can even consider allowing this polluting, forest decimating, LYING company to ruin our state's air for future

generations is totally beyond comprehension. I am disgusted with this process.

Sincerely,

Sister Mary Pendergast,RSM
