

**STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS
ENERGY FACILITY SITING BOARD**

IN RE: INVENERGY THERMAL DEVELOPMENT LLC :
APPLICATION TO CONSTRUCT AND :
OPERATE THE CLEAR RIVER ENERGY : **SB-2015-06**
CENTER, BURRILLVILLE, RHODE ISLAND :

**INVENERGY THERMAL DEVELOPMENT LLC'S RESPONSES TO
THE TOWN OF BURRILLVILLE'S THIRD SET OF DATA REQUESTS**

3-1: Please set forth in detail Invenergy's plans to decommission the Clear River Energy Center, including Invenergy's proposal for fully funding the entire decommissioning process, including, but not limited to, any costs associated with clean up of any hazardous wastes.

RESPONSE 3-1: Invenergy Thermal Development LLC ("Invenergy") is prepared to enter into a Decommissioning Agreement between the Clear River Energy Center Project and the Town of Burrillville ("the Town"). The Agreement will include dismantlement and other decommissioning activities. Invenergy will prepare a draft copy for the Town's review.

RESPONDENT: John Niland, Invenergy Thermal Development LLC

**INVENERGY THERMAL DEVELOPMENT LLC'S RESPONSES TO
THE TOWN OF BURRILLVILLE'S THIRD SET OF DATA REQUESTS**

3-2: Please explain what alternatives, other than the ones provided in the filing that relate to alternative energy options and no action, the company has considered relating to siting options throughout southern New England for this facility, including the criteria utilized for eliminating these other alternative sites that led to the selection of the Clear River site.

RESPONSE 3-2: Please see the pre-file testimony of John Niland filed with the Public Utilities Commission ("PUC") on April 22, 2016 discussing the alternative technologies considered. Regarding alternative sites, Invenergy investigated several sites in the SEMA/RI zone using criteria for sites or areas that have both existing gas and electric infrastructure and proper zoning that could support a project of the type proposed. Invenergy identified several areas that had potential, but those areas were eliminated due to insufficient gas pipeline capacity, insufficient electric transmission capacity or inadequate zoning. The Clear River Energy Center site was selected because it has all the necessary key attributes.
