**Subject:** Power Plant

Dear Mr. Bianco,

Because of your association with the EFSB, I believe you are the person I need to contact.

My name is Rev. Bryan Speroni. I have been the pastor of the Pascoag Community Baptist Church for the past 25 years and have great concern for the welfare of my community and especially my family. However, I am writing to you, not as a representative of the church, but as a concerned Burrillville citizen.

I have been following very carefully the debate concerning the proposed power plant to be built in Burrillville and to be honest, I see no way in which the benefits to this power plant could ever outweigh the danger it presents to the town of Burrillville. I also feel it very unfair that Burrillville be saddled with a second power plant.

I am asking for your help in keeping this power plant from being built in my community. I would also appreciate it if you would convey my feelings to the entire EFSB.

I know you are a very busy man and I know you must be hearing from many people on this issue, both pro and con. But I want to say thanks for taking a moment to read my email. I appreciate it.

Have a great day,

Rev. Bryan Speroni
