1. How will this affect our already deteriorating 100yr old water system and sewer system?
2. Who will pay for our water when the power plant depletes our aquifer during the record droughts we have been going through?
3. How will this affect the known nesting areas on Wallum Lake rd for the bald eagles?
4. My family has a 100 acre plot located behind the proposed building site know as the Underwood estate. This is a known breeding ground for the rare wood and box turtle, construction on this site will certainly push them out and deplete this species in the area.
5. Why have none of the surrounding towns affected by the pollution zone been notified?
