Subject: plant comment

Todd,

If I'm making the public comment deadline, I wish to weigh in AGAINST the proposed power plant here in RI's Northwest Territories. I recently moved from Providence to Chepachet, maybe 5 miles from the proposed plant site.

My opposition is more global than local, however. Our state, nation and world are WAY past the time when we must stop burning fossil fuels. 'Bridge fuel' phase is over. Bridging has only enabled procrastination despite the growth of renewables, offering the appearance of genuine weaning. We must cut the cord and force ourselves to live sustainably, in Pascoag, in Rhode Island, everywhere people are living.

Thanks for throwing this message on the pile, and for taking public comments.

Jim Tull
Chepachet
