Subject: Invenergy project - series of videos as public comment
Attachments: PastedGraphic-2.tiff

Greetings Rhode Island Energy Facility Siting Board Chairwoman Curran, board members Coit and Agrawal:

Part of the mission of the Burrillville Land Trust is to educate the general public on the benefits of land preservation and the issues regarding the degradation to our environment. Education is key in all areas, especially in climate change, energy production and the siting of a power plant in the middle of what many describe as a Natural Heritage Area.

The land trust has created an educational video “channel” on topics that relate to the proposed Invenergy project for northwestern Rhode Island. The videos range from nearly 2 minutes to about 8 minutes in length - or about the time it would take to read a 20 page report for one of the longer video segments.

I hope you review the videos and send them out to the service list so others can view them as well. Here is the link - <https://vimeo.com/channels/learnthefacts>

On behalf of the Burrillville Land Trust, thank you for your efforts, expertise and time regarding this project.
paul
