Subject: Power plant in Burrillville

Dear Mr. Bianco:

This note is to say that I am very much in favor of the proposed Invenergy Plant here in Burrillville. As a citizen and taxpayer in Burrillville, I believe it will be advantageous for all residents of our town. Financially, it will be a great benefit and I do not believe it will compromise our rural atmosphere or damage our eco-system and air quality to an extreme degree.

The economic benefits of this plant will reach far beyond Burrillville. In the face of climate change we must continue to find alternate fuels but I cannot believe it is necessary to forfeit our well-being (food, shelter, warmth) as we proceed to find ways to deal with climate change. My senator (Paul Fogarty), certainly does not represent me on this issue.

There have been strong protests against the plant from my neighbors and fellow Burrillville residents but I believe much of this is based on false fears and an automatically negative reaction to any large project that even hints at influencing the environment.

Ruth Flowers
