Subject: Fracked Power Plant

Dear Coordinator of the Energy Facilities Siting Board, and RI Governor Gina Raimondo,

I am writing to let you know that siting a fracked gas power plant, with all its attendant leaks, known hazards, unknown, unplanned for hazards, huge volume of trucks carting fuels and other hazardous materials over crumbling bridges, pristine Chepachet and other now-quiet areas, inconsistencies with compliance with various regulations and permits is unacceptable for Burrillville, for ANYWHERE in RI and, indeed, ANYWHERE IN THE U.S. Given we are actually behind where we need to be to prevent much of RI from being submerged sooner than we think. Jobs for renewable energy, not locking us into 40 more years of disastrous non- preservation of our planet!!

Respectfully Submitted,

Torii Bottomley
