**RE: Docket 3701 – Demand Side Management Programs  
Responses to Commission’s Record Requests**

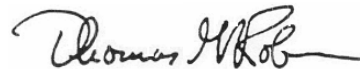

Dear Ms. Massaro:

I am enclosing the responses of The Narragansett Electric Company d/b/a National Grid to the record requests posed by the Commission at the technical session held on October 28, 2005.

In addition, the Company hereby withdraws its request for confidential treatment of its response to Commission Data Request 1-3. Accordingly, I am providing you with copies of National Grid’s response which do not contain an indication that the response is privileged and confidential.

Thank you for your attention to this transmittal. Should you have any questions regarding this filing, please do not hesitate to contact me at (508) 389-2877.

Very truly yours,

Thomas G. Robinson

cc: Docket 3701 Service List

Commission Record Request 1

Request:

Please provide a definition of installed capability and objective capability.

Response:

The following definitions come from the ISO-New England Manual for Definitions and Abbreviations, Manual M-35. Please note that the term "objective capacity" or capability (O.C.) was replaced by the term "Installed Capacity Requirement" when the Regional Transmission Organization became effective, but the underlying meaning did not change.

**Installed Capacity Requirement**

Installed Capacity Requirement shall mean the level of capacity required to meet the reliability requirements defined for the New England Control Area and calculated in accordance with Section III.8 of Market Rule 1. The Installed Capacity Requirement is used to determine an Unforced Capacity Requirement for the New England Control Area and individual Market Participants. [Market Rule 1]

**Installed Capacity (ICAP)**

Installed Capacity shall mean a MW capability from a qualifying ICAP Resource that meets the requirements set forth in Market Rule 1 and the ISO New England Manuals. [Market Rule 1]

Market Rule 1 and the manuals are available at:
