July 6, 2006

Ms. Luly E. Massaro, Commission Clerk  
Rhode Island Public Utilities Commission  
89 Jefferson Boulevard  
Warwick, Rhode Island 02888

Dear Ms. Massaro:

We are filing, herewith, for effect August 5, 2006, tariff material consisting of:

**RI PUC No. 15**

<b>Part/Section</b>	<b>Revision of Page(s)</b>	<b>Original of Page(s)</b>
TOC	45, 55, 56, and 57	N/A
H/5	3.1, 4, 9, 12, 12.1, 13, and 14	N/A
M/8	54, 55, 56, and 63	N/A

In this filing, Verizon Rhode Island (“Verizon RI”) proposes the following changes to Centrex Services:

- The introduction of a three-year term commitment for Centrex Plus with Assume Dial 9.
- The revision of the termination liability calculation of Centrex Plus with dial 9 functionality.
- The introduction of Proprietary Telephone Set Programmable Features for Centrex customers.

This filing also contains some minor changes to the tariff Table of Contents.

Verizon certifies that the rates for the Three-Year Term Commitment for Centrex Plus with Assume Dial 9 and the revised termination liability for Centrex Plus with dial 9

functionality and the Proprietary Telephone Set Programmable Features are not less than the Long-run Incremental Costs of providing the services.

If you have any questions regarding this filing, please contact Frances O'Neill-Cunha of my staff at 401 525-3560.

Enclosed are an original and nine copies of the tariff material. Please return a copy of this letter with your stamp of receipt.

Respectfully submitted,

Theresa L. O'Brien

## **Section 1 – Centrex Plus with Assume Dial 9 Three-year Term Commitment and Termination Liability**

### **Description**

The purpose of this tariff filing is to introduce a new billing option for the Centrex Plus with Assume Dial 9 service. Currently the Centrex Plus with Assume Dial 9 product is available only under a month-to-month payment plan. With this tariff filing, Verizon Rhode Island introduces the 3-year term commitment and also clarifies that Centrex Plus with Assume-Dial 9 is also referred to as “CustoPAK”.

Additionally, this filing modifies the existing termination liability calculation for Centrex Plus with dial 9 and introduces a termination liability calculation for the Centrex Plus with Assume Dial 9 three-year term product. The current one-year minimum requirement is eliminated and the interest component of the Centrex Plus with dial 9 termination liability calculation is also eliminated. This will simplify the calculation considerably so that the Verizon sales consultants can more easily explain the termination obligation to perspective Centrex Pus customers. Examples of the termination liability calculations are provided below.

### **Rationale for Filing**

Verizon’s product portfolio includes Centrex products with both the Dial 9 and Assume Dial 9 functionality. Some customers prefer a Centrex product for which it is not necessary to dial 9 when initiating a call. The introduction of the Centrex Plus with Assume Dial 9 three-year term product offering will give customers the opportunity to select a Centrex product where it is not necessary to dial 9 first, and these customers can take advantage of a reduced rate under the new term agreement and also benefit from installation of the Centrex System without non-recurring charges.

### **Proposed Rate**

The proposed rate for the Centrex Plus with Assume Dial 9 three-year term commitment is as follows:

<b>Centrex Plus with Assume Dial 9 Three-year Term Commitment</b>	<b>Rate</b>
Initial or Growth – 36 months – Monthly – Each line with the Assume Dial 9 – no access code dialing	21.00

## **Termination Liability**

### **Current Termination Liability for existing Centrex Plus (Dial 9):**

Centrex Plus customers disconnecting their entire system or any lines associated with their system are subject to termination liability charges. The current termination liability charges are calculated based on the difference between the rate for the term elected and the rate for the term the Centrex Plus was actually in service (The rate for the term for which the customer has satisfied the term period). Then, interest is applied based on a monthly interest rate of .99384%. For example, if a customer commits to a five- year term and terminates at the end of year two, termination liability would equal the difference between the one-year rate and five-year rate plus interest for those months that the customer has had the Centrex Plus system in service.

In addition, the current tariff language has a minimum service period of 12 months. Therefore if a Centrex Plus customer disconnects service during the first 12 months the service was installed, the customer would be billed for the service for the balance of the first year.

### **Proposed Termination Liability for existing Centrex Plus (Dial 9):**

Under the proposed termination liability, the following changes are proposed:

- Elimination of the monthly interest rate of .99384%.
- Elimination the 12-month minimum service period.

Under the proposed termination liability, if a customer terminates service prior to the expiration of the term agreement, the termination charges will be calculated based on the difference between the rate for the term elected and the rate for the term the Centrex Plus was actually in service (The rate for the term for which the customer has satisfied the term period. For example, Centrex Plus is offered under term periods of one year, three years, five years, seven years and ten years. If the customer disconnects after two years of a three-year term, the one-year rate is used in the liability calculation. If the customer disconnects after four years of a five-year term, the three year rate would be used. ).

### **Example of Termination Liability for Centrex Plus (with dial 9):**

A 5-line customer commits to a five-year Centrex Plus term and terminates at the end of Year 2.

The current rate for the 5-year agreement is \$14.00

The current rate for a 1-year agreement is \$22.00

**Current - Termination Charges** = 5 lines x (22.00 – 14.00) x 24 months = \$960.00 PLUS  
Interest = \$1,078.98

**Proposed** - Termination Charges = 5 lines x (22.00 – 14.00) x 24 months = \$960.00

The proposed termination charges will always be less than the current termination charges because the interest factor is eliminated.

**Termination Liability for Centrex Plus with Assume Dial 9 (CustoPAK):**

If a customer with the new Centrex Plus with Assume Dial 9 three-year term commitment disconnects any line or terminates the system prior to the expiration of the term commitment, the termination charges will be calculated based on the difference between the three-year rate and the month-to-month rate for the period that the Centrex Plus with Assume Dial 9 lines were actually in service.

**Example of the Termination Liability for Centrex Plus with Assume Dial 9 (CustoPAK):**

A 5-line customer subscribes to the Centrex Plus with Assume Dial 9 3-year term and terminates at the end of Year 2.

The proposed rate for the 3-year agreement is \$21.00.

The current rate for a month-to-month is \$27.00.

Termination Charges = 5 lines x (27.00 – 21.00) x 24 months in service = \$720.00

Verizon certifies that the rates for the Three-Year Term Commitment for Centrex Plus with Assume Dial 9 and the revised termination liability for Centrex Plus with dial 9 functionality are not less than the Long-run Incremental Costs of providing the services.

## Section 2 – Proprietary Telephone Set Programmable Features

### Description

This filing also introduces Proprietary Telephone Set features to Verizon Rhode Island customers. These features are available in DMS-100 switches with Intellipath and Centrex Plus services.

Customers may subscribe to features that work with customer-provided proprietary (electronic) telephone set feature keys. Proprietary telephone sets must be purchased by the customer. The first key of the set is always programmed as the primary telephone number of the set. The other keys on these proprietary sets can be programmed as feature keys or secondary directory numbers (virtual numbers).

### Proprietary Telephone Set Features - Feature Keys

The features available with proprietary telephone sets include:

- **Automatic Dial:** Allows a proprietary set user to call a frequently dialed number by pressing the assigned feature key.
- **Automatic Line:** May be assigned to individual appearances on a proprietary set, including the primary number. When an off-hook is reported, a connection is automatically established to a predetermined location. Single line application may be referred to as Hot Line.
- **Calling Name Display:** Provides for the display of the name of the person calling. This feature is offered for intragroup (intercom) calls only.
- **Display Called Number:** Provides the user with the called number display during the origination, termination, programming and feature activation operations.
- **Display Calling Number:** When an incoming call is received, this feature provides the station user with display of the calling number.
- **Key Short Hunt:** Allows for the primary and secondary numbers to be programmed into a hunt group specific to the proprietary set.
- **Multiple Appearance Directory Number (MADN):** Allows a Centrex number to be assigned to more than one proprietary set.
- **On-Hook Dialing:** An intrinsic feature of the set, it allows the user to originate calls without lifting the handset.
- **Time and Date Display:** Provides the current time and date on a station display number assigned to a proprietary set.

### Proprietary Telephone Set Features - Virtual Number

Virtual Number (also known as Secondary Number) is a software number that has the characteristics of a basic exchange access line but does not require a separate circuit. It is an additional directory number assigned to a proprietary (electronic) set. A subscriber must have the Proprietary Telephone Set feature on the line as a prerequisite for the Virtual Number feature.

**Rationale for Filing**

Proprietary Telephone Set Features provide business customers with the ability to have a number of features programmed on their telephone sets instead of using activation codes on analog sets. It also provides for additional telephone number appearances as well as display of certain data on the sets. The target market for these features is business customers who wish to provide greater telecommunications efficiency and functionality to their employees. Proprietary set features are currently a popular choice among Centrex customers in other jurisdictions. This filing will make these features available to Rhode Island Centrex customers as optional choices with either the tariff rates or as part of a Large System-specific Pricing Plan (LSPP) contract.

**Proposed Rates**

The proposed rates for the Proprietary Telephone Set Features are as follows:

<b>Proprietary Telephone Set Features</b>	<b>Rate</b>
Proprietary Telephone Set Features – Feature Keys or Virtual Numbers – NRC – Per Line	\$20.00
Proprietary Telephone Set Features – Feature Keys – Monthly – Per Line	\$3.00
Proprietary Telephone Set Features– Virtual Number – Monthly – Per Number	\$2.00

Verizon certifies that the rates for the Proprietary Telephone Set Features are not less than the Long-run Incremental Costs of providing the features.

**5. Digital Centrex Services**  
**5.1 INTELLIPATH® Digital Centrex Service**

5.1.1	Description
<b>D.</b> (Continued)	
<b>e.</b>	SMDR is not represented to be a provision of billing detail.
<b>f.</b>	Local call records are provided only where available.
<b>g.</b>	Customer must designate all station lines in a customer group and/or facility groups on which SMDR is to be provided. SMDR must be provided on a minimum of two lines.
<b>h.</b>	Modems, collection devices, computer equipment and software are not provided as part of this service and are the responsibility of the customer.
<b>9.</b>	<b>Proprietary Telephone Set Programmable Features</b> — Where suitable facilities exist, Intellipath customers may subscribe to features that work with customer-provided proprietary telephone set feature keys. Proprietary telephone sets must be purchased by the customer separately from their Intellipath service. The keys on the proprietary sets can be programmed as feature keys or secondary directory numbers (virtual numbers).
<b>a.</b>	<b>Feature Keys</b> — The Telephone Company will provide features that are available on proprietary telephone sets feature keys. These include: Automatic Dial: Allows a proprietary set user to call a frequently dialed number by pressing the assigned feature key. Automatic Line: May be assigned to individual appearances on a proprietary set, including the primary number. When an off-hook is reported, a connection is automatically established to a predetermined location. Calling Name Display: Provides for the display of the name of the person calling. This feature is offered for intragroup (intercom) calls only. Display Called Number: Provides user with the called number display during the origination, termination, programming and feature activation operations. Display Calling Number: When an incoming call is received, this feature provides the station user with display of the calling number. Key Short Hunt: Allows for the primary and secondary numbers to be programmed into a hunt group specific to the proprietary set. Multiple Appearance Directory Number (MADN): Allows an Intellipath number to be assigned to more than one proprietary set. On-Hook Dialing: An intrinsic feature of the set, it allows the user to originate calls without lifting the handset. Time and Date Display: Provides the current time and date on a station display.
<b>b.</b>	<b>Virtual Number (also known as Secondary Number)</b> is a software number that has the characteristics of a basic exchange access line but without a separate circuit. It is an additional directory number assigned to a proprietary set.

(N)  
 \_\_\_\_\_  
 (N)

5.1.2	Provisions for Other Services
<b>A.</b>	<b>Directory Listings</b> — One directory listing without charge is furnished for each customer of Intellipath digital Centrex service. Additional directory listings may be provided as for business service.

Verizon New England Inc.

**5. Digital Centrex Services**  
**5.1 INTELLIPATH® Digital Centrex Service**

5.1.3 Application of Rates and Charges	
<b>A.</b>	<b>Vintages</b>
1.	Vintage I rates and charges apply to systems that are installed prior to March 1, 1993.
2.	Vintage II rates and charges apply to systems that are installed on or after March 1, 1993.
<b>B.</b>	<b>Service Establishment Charges</b> are payable with the first bill following installation.
<b>C.</b>	<b>Premises Work Charges</b> apply as appropriate.
<b>D.</b>	<b>Mileage</b> for main station line outside plant facilities are measured from the serving central office to the network interface arrangement(s) at each of the customer's premises. For distances in excess of three miles, charges based on cost apply for outside plant facilities.
<b>E.</b>	<b>Standard Features</b> may be activated at the time each line is installed or may be added or changed subsequently. When standard features are activated or changed by the Telephone Company at the customer's request subsequent to installation of the line, the standard features subsequent additions or changes Service and Equipment (S&E) charge is applicable.
<b>F.</b>	<b>Optional Features</b> — The NRCs for optional features described in this section are subject to Telephone Company initiated change.
1.	The appropriate private line channel is required between the serving central office and the customer's premises required per arrangement for the optional feature loudspeaker paging.
2.	<b>SMDR</b> rates are in addition to the rates and charges for the associated digital Centrex service, and for other associated services.
3.	Service and equipment charges only apply to system changes and do not apply to Optional Features changes.
<b>G.</b>	<b>Exchange Usage</b> charges are subject to Telephone Company initiated change.
1.	<b>Measured Service</b> — All local messages are provided at the per message, per minute charges for measured business main telephone exchange service.
2.	<b>Unlimited Service</b> — Usage charges are based on the total number of main station lines in-service at the end of each customer's billing period. Exhibit 1.1.2-1 in Part 1 specifies the PBX trunk equivalencies for main station lines. The monthly rates are multiplied by the PBX trunk equivalency to determine the monthly unlimited service usage charge for the system.
a.	Unlimited service usage charges are only available with SRC. Refer to the one-party unlimited residence trunk rate described in Part A, Section 5.
<b>H.</b>	<b>Main Station Lines</b> — Schedule A charges for central office and outside plant facilities are offered under the Flexible Rate Pricing Plan (FRPP) as described in Part A, Section 1. Current applicable rates and charges are contained in the Telephone Company's price list.
1.	When Schedule A charges for central office facilities are paid over a one, three, five or seven year OPP, Schedule A charges for outside plant facilities must be paid over the same period unless otherwise specified.

**5. Digital Centrex Services**  
**5.2 Nynex Digital Centrex Plus (Centrex Plus) Service**

5.2.1	Description
A.	<p>Centrex Plus is a business telecommunications system in which the controlling dial switching equipment is located at a Telephone Company digital central office that normally serves the principal premises of a customer.</p> <ol style="list-style-type: none"> <li>1. Centrex Plus is available with dial 9 or Assume Dial 9 – no access code dialing, also known as Custopak.                             <ol style="list-style-type: none"> <li>a. <b>Centrex Plus with dial 9</b> is available under Optional Payment Plan (OPP) term offerings of 1, 3, 5, 7, and 10 years.</li> <li>b. <b>Centrex Plus with Assume Dial 9</b> – is available with a month-to-month and 3-year term payment option. Centrex Plus with Assume Dial 9 lines cannot be equipped with Station-to-Station Dialing (dial intercommunications).</li> </ol> </li> <li>2. This service is offered with a 2-line minimum requirement, subject to the availability of facilities.</li> <li>3. Centrex Plus is available only on a measured service basis.</li> </ol>
B.	<p>Centrex Plus station lines may be either ground start or loop start. Transmission quality over ground start lines as received at the customer's equipment is not guaranteed. Additional transmission improvements requested by the customer due to specific equipment requirements will be provided by the Telephone Company at charges based on cost</p>
C.	<p><b>Standard Features</b> provided on all lines include the features described in Section 1 and as listed below.</p> <ol style="list-style-type: none"> <li>1. <b>Call Forwarding Busy Line</b> permits calls attempting to terminate to a busy line to be forwarded to a preselected line within the system or to a line external to the system.</li> <li>2. <b>Call Forwarding Don't Answer</b> provides for the forwarding of any incoming calls to a preselected line within the system or to a telephone number outside the system when the called line does not answer.</li> <li>3. <b>Call Forwarding</b> allows line to have incoming calls forwarded to another line within the system or to a telephone number outside the system.</li> <li>4. <b>Call Hold</b> enables a line user to place a call on hold for any length of time provided that neither party goes on-hook.</li> <li>5. <b>Call Pickup Group</b> allows a line user to answer incoming calls to another line within the Centrex Plus system by dialing a special code. One or more call pickup groups may be established.</li> <li>6. <b>Call Transfer All Calls</b> allows a line user to transfer any established call to another line inside or outside the customer group without the assistance of an attendant.</li> <li>7. <b>Conference Calling</b> enables a line user to establish voice connection involving the customer and two other parties. The line user, by switchhook operation is able to place an existing call on hold and dial the telephone number of a third-party, affecting a three-way call.</li> <li>8. <b>Hunting</b> permits the routing of calls to an idle line in a prearranged group when the called line is busy.</li> <li>9. <b>Touch Tone</b> provides for the origination of calls by means of instruments equipped for tone-type address signaling over special central office facilities.</li> </ol>

**5. Digital Centrex Services**  
**5.2 Nynex Digital Centrex Plus (Centrex Plus) Service**

5.2.1	Description
D.	(Continued)
c.	SMDR records are provided to the customer via one of the following two methods (1) Dial-up access where the customer dials into a centralized location to retrieve the call records when desired. Call records are stored for a maximum of 10 days. (2) Internet access where the call records are sent to the customer via the internet.
d.	SMDR is available only where facilities permit and from capable Central Office switches only.
e.	SMDR is not represented to be a provision of billing detail.
f.	Local call records are provided only where available.
g.	Customer must designate all station lines in a customer group and/or facility groups on which SMDR is to be provided. SMDR must be provided on a minimum of two lines.
h.	Modems, collection devices, computer equipment and software are not provided as part of this service and are the responsibility of the customer.
22.	<b>Trunk Answer Any Line</b> permits any line user within a group to dial a code and be connected to an incoming call to the listed directory number of the system.
23.	<b>Uniform Call Distribution</b> — A form of line hunting which provides for an even distribution of incoming calls among available members of a hunt group. This feature may be arranged with queuing and delay announcement from suitably equipped central offices.
24.	<p><b>Proprietary Telephone Set Programmable Features</b> — Where suitable facilities exist, Centrex Plus customers may subscribe to features that work with customer-provided proprietary telephone set feature keys. Proprietary telephone sets must be purchased by the customer separately from their Centrex Plus service. The keys on the proprietary sets can be programmed as feature keys or secondary directory numbers (virtual numbers).</p> <p><b>a. Feature Keys</b> — The Telephone Company will provide features that are available on proprietary telephone sets feature keys. These include:</p> <p>Automatic Dial: Allows a proprietary set user to call a frequently dialed number by pressing the assigned feature key.</p> <p>Automatic Line: May be assigned to individual appearances on a proprietary set, including the primary number. When an off-hook is reported, a connection is automatically established to a predetermined location.</p> <p>Calling Name Display: Provides for the display of the name of the person calling. This feature is offered for intragroup (intercom) calls only.</p> <p>Display Called Number: Provides user with the called number display during the origination, termination, programming and feature activation operations.</p> <p>Display Calling Number: When an incoming call is received, this feature provides the station user with display of the calling number.</p> <p>Key Short Hunt: Allows for the primary and secondary numbers to be programmed into a hunt group specific to the proprietary set.</p> <p>Multiple Appearance Directory Number (MADN): Allows a Centrex Plus number to be assigned to more than one proprietary set.</p>

5.2.1 Description	
D. (Continued)	
	On-Hook Dialing: An intrinsic feature of the set, it allows the user to originate calls without lifting the handset. Time and Date Display: Provides the current time and date on a station display.
b.	<b>Virtual Number (also known as Secondary Number)</b> is a software number that has the characteristics of a basic exchange access line but without a separate circuit. It is an additional directory number assigned to a proprietary set.

(N)  
 (N)

5.2.2 Application of Rates and Charges	
A.	<b>Exchange Usage</b> charges are subject to Telephone Company initiated change.
1.	<b>Measured Service</b> — All local messages are provided at the appropriate local usage charges for measured business main telephone exchange service.
a.	Local usage rates apply to intrasystem calls for Centrex Plus systems with Assume Dial 9.
B.	<b>Exchange Access</b> — Included in the monthly rates for main station lines are amounts that are attributable to exchange access.
C.	<b>Service Establishment Charges</b> are one time charges that are applicable for the initial installation of Centrex Plus and for subsequent additions or changes and are payable with the first bill following installation.
1.	
2.	Service Establishment charges do not apply for the initial installation or subsequent additions or changes of Centrex Plus lines and Centrex Plus with Assume Dial 9 when installed under a term commitment.
D.	<b>Premises Work and Jack Charges</b> apply as appropriate.
E.	<b>Extension of Main Station Lines</b>
1.	Channel charges do not apply to serve main station lines within the same exchange as the principal premises when the same central office is involved. When a different central office in a multi-central office exchange is involved, in addition to appropriate main station lines charges, an intraexchange interoffice channel charge (comprised of a monthly rate and S&E charge) applies. This charge is subject to Telephone Company initiated change.
2.	To serve locations not within the same exchange as the principal premises, in addition to the appropriate main station line charges, rate and charges also apply for the interexchange portion of Private Line Type 2001A channels, and for Centrex terminals. The Centrex terminal charge is comprised of a monthly rate and S&E charge, both of which are subject to company initiated change.
3.	Where extensions of main station lines are located at a premises other than where the main station lines are located, but within the same exchange and serving central office area, or where extensions of main station lines are located in a different building at the same premises. An NRC and a monthly rate applies for each arrangement. In addition premises work charges apply as appropriate.

**5. Digital Centrex Services**  
**5.2 Nynex Digital Centrex Plus (Centrex Plus) Service**

5.2.2 Application of Rates and Charges	
E. (Continued)	
4.	For locations in the same exchange but involving a different central office, intraexchange interoffice Intellipath channel rates and charges apply in addition to charges for outside plant facilities for initial main station lines.
5.	For locations in a different exchange, rates and charges for the interexchange portion of Private Line Type 2001A channels and Centrex channel terminals apply in addition to those charges for outside plant facilities for an initial main station line.
F.	<b>Standard Features</b> may be activated at the time each line is installed or may be added or changed subsequently. When standard features are activated or changed by the Telephone Company at the customer's request subsequent to installation of the line, the standard features subsequent change charge for Centrex Plus is applicable.
G.	<b>Optional Features</b> — NRCs apply on a per feature line basis. Service charges also apply for the activation of the optional feature(s). 1. The additional optional features busy verification by attendant of trunks or lines, loudspeaker paging, and selected customer control of facilities per facility group to which access is denied, require a Private Line Type 1001 channel between the serving central office and the customers premises. 2. <b>SMDR</b> rates are in addition to the rates and charges for the associated digital Centrex service, and for other associated services. 3. Service and equipment charges apply only to system changes and do not apply to Optional Features changes.
H.	<b>Tie Lines</b> may be furnished as required. Rates and charges for Private Line Type 2001B channels apply for intraexchange or interexchange channels. For interexchange tie line channels, charges for Centrex terminals apply. Centrex terminals are in lieu of local channels when tie lines terminate only in the Centrex switching equipment. Tie line termination rates and charges also apply.
I.	<b>Conversion Charges</b> 1. Conversion to Centrex Plus - Any existing Centrex system served by a digital central office may convert to Centrex Plus service provided that suitable and sufficient digital central office facilities are available in the same serving central office. Premises work charges and jack charges apply, if appropriate, at the time of conversion. The initial installation per line charge for Centrex Plus also applies unless installed under a term commitment. Existing Centrex customers converting to Centrex Plus are not subject to termination charges as long as the number of Centrex Plus lines are equal to or greater than the number of lines under their current Centrex term commitment. The duration of the new term commitment must be as specified under the available payment options for Centrex Plus and must be equal to or greater in length than the time remaining in the existing term commitment.

**5. Digital Centrex Services**  
**5.2 Nynex Digital Centrex Plus (Centrex Plus) Service**

<b>5.2.3 Payment Plan</b>	
<b>A.</b>	<b>Centrex Plus</b> is offered under the following payment plans.
1.	Centrex Plus service with the Assume Dial 9 is available under a month-to-month and a 3-year term commitment.
2.	Centrex Plus service with the dial 9 functionality is offered under a one-, three-, five-, seven-, or ten-year service term commitment.
3.	Under the term plans for Centrex Plus with Assume Dial 9 and Centrex Plus (dial 9) the line charges are not subject to Telephone Company initiated change other than as specified in Section 5.2.3A. However, such charges are under the jurisdiction of the PUC and are subject to change upon order of the PUC.
<b>B.</b>	The application of charges for customers subscribing to Centrex Plus is as follows:
1.	Service and Equipment charges are applicable as described in 5.2.2.C.
2.	Monthly rates apply.
<b>C.</b>	Centrex Plus lines comprise central office and outside plant facilities for which one schedule of charge is applicable. The monthly charges are subject to an annual increase equal to the change in the Consumer Price Index for the previous year.
1.	Centrex Plus line (initial or growth) monthly rates include amounts that are attributable to exchange access.
<b>D.</b>	<b>Discontinuance of Service</b> — If a customer terminates the service in whole or in part prior to the completion of the customer's chosen term commitment, the customer will pay an early termination charge calculated as follows:
1.	<b>Centrex Plus with Assume Dial 9</b> — The customer will be billed termination charges which are calculated based on the difference between the 3-year rate and the month-to-month rate, for the number of months the Centrex Plus with Assume Dial 9 was actually in service.
2.	<b>Centrex Plus with the dial 9 functionality</b> — The customer will be billed termination charges which are calculated based on the difference between the rate for the term elected and the rate that applies to the term period completed for the number of months the Centrex Plus was actually in service. For example: If a customer commits to a five year term commitment and terminates at the end of year two, the termination liability would equal the difference between the one year rate (term completed) and the five year rate for those months that the customer has had the Centrex Plus system in service.
