Luly E. Massaro, Commission Clerk
Rhode Island Public Utilities Commission
89 Jefferson Boulevard
Warwick, RI 02888

**RE: Docket 4431 - 2013 Distribution Adjustment Charge (“DAC”)
Responses to Remaining Division Data Requests**

Dear Ms. Massaro:

Enclosed are National Grid’s responses to data requests from the Rhode Island Division of Public Utilities and Carriers (“Division”) in the above-referenced proceeding.

In this transmittal, the Company is providing its responses to the following data requests: Division 2-7, Division 2-17, Division 2-18, Division 2-19, Division 2-20, Division 2-21, Division 2-24, Division 1-15, and Division 1-16. This transmittal completes the Company’s responses to the remaining Division data requests in this proceeding.

Thank you for your attention to this filing. If you have any questions, please contact me at (401) 784-7667.

Very truly yours,

Thomas R. Teehan

Division 2-7

Request:

Re: witness Smith's Direct Testimony page 17 of 30, please provide monthly detail showing:

- a. The movement of individual Dual-Fuel customers from Non-Firm to Firm service;
- b. The movement of individual Dual-Fuel customers from Firm to Non-Firm service;
- c. Each Dual-Fuel customer that left the system for one or more months during the nine months ended March 31, 2013;
- d. Each Dual-Fuel customer added to the system during the nine months ended March 31, 2013 and the actual monthly service volumes and revenue for each added customer for each month of the referenced nine month period;
- e. Provide documentation of any and all adjustments to the Threshold levels of revenue that were made to reflect movements of customers to or from Non-Firm service for:
 - i. The seven months ended January 31, 2013;
 - ii. The two months ended March 31, 2013.

Response:

- a. Please see below for a list of Dual-Fuel customers who were Non-firm customers during Calendar Test Year 2011 and have since migrated from Non-firm to Firm service along with the month of their migration.

Assigned # 3- Moved to Firm service in December 2012.

Assigned # 21- Moved to Firm service in January 2012.

Assigned # 38- Moved to Firm service in November 2012.

Assigned # 45- Moved to Firm service in February 2013.

- b. There were no Dual-Fuel customers moving from Firm to Non-firm service during the nine months ended March 31, 2013.
- c. Customer assigned # 9 was the only dual fuel customer that left the system during the nine months ended March 31, 2013. The customer left the system in July 2012.

Division 2-7, page 2

- d. There were no Dual-Fuel Non-firm customers added to the system during the nine months ended March 31, 2013.
- e. In preparing its response to this request, the Company determined that it should have adjusted both the On-System Margin Threshold of \$1.8 million approved in Docket No. 4323 in effect for the period February 2013 and March 2013 and the On-System Margin Threshold of \$2.816 million originally approved in Docket 3943 and modified in Docket No. 4333 in effect for the period July 2012 through January 2013. These adjustments, which the Company is making in this response, however, offset one another and therefore result in a modest increase in the Total Margin in excess of Threshold of \$5,707 (a credit due to customers of \$462,061 filed in Schedule MCS-6 as compared to the revised credit due to customers of \$467,768 shown in Attachment DIV-2-7-e, Line 10, Column (p)). These small adjustments have had no impact to the propose On-System Margin Credit Factor proposed by the Company of (\$0.0012) per therm effective November 1, 2013.

In accordance with the Settlement Agreement in Docket No. 4323, the Company must adjust the \$1.8 million Threshold level to reflect the movement of customers between Firm and Non-firm service. The Company determined that four customers who were Non-firm customers during the 2011 Calendar Test Year in Docket No. 4323 have since migrated to Firm service. In accordance with the Settlement Agreement, the Company must reduce the On-System Margin Threshold by the Non-firm customers' forecasted rate year usage multiplied by the applicable Non-firm rate. In Attachment DIV-2-7-e, page 1, lines 1-7, the Company has calculated the annual Non-firm margin for these four customers to be \$154,849 and therefore is reducing the On-System Margin Threshold to \$1,645,151 as shown in DIV - 2-7-e, page 1, Column (h), line 8.

In accordance with the Docket No. 3943 and modified in Docket No. 4333, the Company must adjust the \$2.816 million Threshold level to retain a portion of any and all incremental natural gas distribution margin received by converting a Non-firm customer to Firm service. In accordance with the Company's tariff that was in effect from July 2012 through January 2013, the Company is to increase the On-System Margin Threshold by the minimum take commitment. During the period July 2012 through January 2013, two customers had a Minimum Margin Agreement with the Company for \$53,756 per year beginning in September 2012 and January 2013. In Attachment DIV-2-7-e, the Company has increased the On-System Margin Threshold by 5/12th of the annual minimum take commitment of \$46,865, and 1/12th of the annual minimum take commitment of \$6,891 or \$20,101 as shown in line 9 of the attachment mentioned above.

Division 2-7, page 3

Overall, these two adjustments result in a small increase of \$5,707 to the total On-System Margin credit. As indicated above, the Company's revision does not impact the overall factor proposed in the Company's DAC filing.

In addition to these adjustments to the On-System Margin Thresholds, the Company also discovered that the billing for a Firm dual fuel customer Assigned # 57 has been understated for the period July 2012 through January 2013. The Company is in the process of cancelling and rebilling this customer and will update this response in early October when the billing correction has been processed in the Company's billing system and the impact on the On-System Margin credit can be determined.

Customers moving from Non-firm to Firm service per Settlement Agreement of Docket No. 4323

Re: Minimum Margin Agreement
Modification of Docket 3943
Stipulation Regarding Reconciliation of Revenues from Firm and Non-Firm Dual
Fuel Customers

Cc: John Isberg / National Grid
Lori Spangler / National Grid
Mark DiPetrillo / National Grid

Dear Chris,

National Grid has had extensive discussions with the Rhode Island Division of Public Utilities and Carriers to modify the document titled "Stipulation Regarding Reconciliation of Revenues from Firm and Non-Firm Dual Fuel Customers". Collectively, National Grid customers who are part of this stipulation are referred to as "Dual Fuel Customers". This modification would enable National Grid to retain a portion of any and all incremental natural gas distribution margin received by virtue of a non-firm customer switching to firm service. This modification would also enable National Grid to utilize this incremental gas distribution margin to reduce the "Contribution in Aid of Construction" associated with any gas infrastructure work that National Grid installed, or has to install, to provide firm gas service to a former non-firm gas customer and to ensure the reliability of its gas distribution system.

In the case of the Brown University Central Boiler Plant, National Grid collected a Contribution in Aid of Construction of \$379,715 in 2010 which reimbursed National Grid for gas infrastructure that was installed upstream of the Brown University Central Boiler Plant to reinforce our gas distribution system and to ensure the reliability of firm gas service to the Brown Central Boiler Plant

As part of this modification, National Grid must receive a written commitment from a Dual Fuel customer for a minimum amount of firm gas usage for a period of not less than five years. Therefore, to comply with the terms of this modification, Brown University and National Grid will collectively agree to the following terms:

Obligation of Brown University

Brown University agrees to utilize firm natural gas at the Central Boiler Plant for the next five years. In order to meet the requirements of this agreement, Brown University agrees to provide National Grid with a minimum incremental margin amount of **\$46,865** each year, for the period September 1, 2012 thru August 30, 2017. If this minimum margin is not met, National Grid will invoice Brown University for the additional monies needed to meet the minimum margin amount.

National Grid recognizes that, for reliability purposes, the Brown University Central Boiler Plant has dual fuel capability. National Grid also understands that in order to be in compliance with state regulation, these boilers must be tested on fuel oil from time to time. Nothing in this agreement shall preclude Brown University from testing the boilers on fuel oil.

Obligation of National Grid

National Grid will return to Brown University the earlier collected Contribution in Aid of Construction of \$379,715 minus the minimum regulatory contribution of \$600. Therefore, the net amount to be returned to Brown University will be \$379,115.

If you are in agreement with this Minimum Margin Agreement, please execute below and return an executed copy back to National Grid. In return, National Grid will provide a fully executed agreement back to Brown University for your records.

Agreed to by Brown University

Re: Minimum Margin Agreement
Modification of On-System Margin Credits Provisions of RIPUC No. 101, Section 3, Schedule A, subpart 3.8

Cc: Scott Thatcher / National Grid
Mark DiPetrillo / National Grid

Dear Telmo,

On July 11, 2012, the Rhode Island Public Utilities Commission modified the On-System Margin Credits Provisions of the Company's Distribution Adjustment Charge tariff, RIPUC NG-Gas No. 101, Section 3, Schedule A, subpart 3.8. Those provisions relate to Dual Fuel customers, which are an identified group of customers whose facilities have the ability to alternate between natural gas and oil to fuel their operations. This modification provides that the tariff threshold level for determining positive or negative On-System credits may be adjusted to reflect incremental natural gas distribution revenue margin received by virtue of a non-firm customer's making new investments resulting in incremental distribution revenue for the period ending June 30 of each year derived through applicable minimum take commitments. National Grid may utilize a portion of this incremental gas distribution margin to reduce the "Contribution in Aid of Construction" associated with any gas infrastructure work that National Grid installs, or has to install, to provide firm gas service to a Dual Fuel gas customer and to ensure the reliability of its gas distribution system.

In the case of Key Container, National Grid will need to collect a Contribution in Aid of Construction of \$600 (Minimum Charge), for the installation of 43' of 6" plastic low pressure service pipe to a location at 21 Campbell St, Pawtucket.

As part of the On-System Margin Credits Provisions tariff modification, National Grid must receive a written commitment from a Dual Fuel customer for a minimum amount of firm gas usage for a period not to exceed five years. Therefore, to comply with the terms of this modification, Key Container and National Grid will collectively agree to the following terms:

Obligation of Key Container

Key Container agrees to utilize firm natural gas for the next five years. In order to meet the requirements of this agreement, Key Container agrees to provide National Grid with a minimum distribution margin amount of **\$6,891** each year, for a five year period. The five year period will commence when the boiler is converted to gas which is expected to be January 1, 2013 and expire on December 31, 2017. If this minimum margin is not met, National Grid will invoice Key container for the additional monies needed to meet the minimum margin amount.

Obligation of National Grid

National Grid will install 43 feet of 6" Plastic low pressure service to the agreed upon location.

If you are in agreement with this Minimum Take Agreement, please execute below and return an executed copy back to National Grid. In return, National Grid will provide a fully executed agreement back to Key Container for your records.

Division 2-17

Request:

Re: Project A, 642 Allens Avenue, please provide:

- a. The costs of the semi-annual groundwater/NAPL gauging, groundwater sampling, and reporting to RIDEM. Please specify separately the costs of each item listed and provide supporting invoices for consulting costs;
- b. The dates on which maintenance was performed on the boom in the Providence River at this site, as well as the costs billed to National Grid for each maintenance activity performed;
- c. A copy of each report, study or evaluations performed relating to this site which was provided to National Grid during the 9 months ended 3/31/13.
- d. Supporting invoices for all consulting work performed during the nine months ended 3/31/13 showing:
 - i. Dates services were provided,
 - ii. Hours worked by consultants,
 - iii. Hourly rates, and
 - iv. Detail of other expenses billed by consultants

Response:

- a. The supporting invoices for \$15,809.60 in the Monitoring/Reporting costs for the 642 Allens Avenue site are included as Attachment DIV 2-17d for the July 2012 monitoring event and monthly gauging/NAPL recovery events. Due to the voluminous nature of this document, the Company is providing this attachment on CD-ROM.
 - o The July 2012 groundwater/NAPL gauging and groundwater sampling event incurred field labor and expense charges of \$6,994.34. The charges for this event can be found in GZA Invoice Numbers 0658706 and 0659957.
 - o The monthly groundwater/NAPL gauging and NAPL recovery events incurred field labor and expense charges of \$3,626.30. The charges for this event can be found in GZA Invoice Numbers 0656409; 0657917; 0659957; 0661655; 0664446; 0665549; and 0667450.
 - o The supporting invoices for \$5,188.96 for reporting to RIDEM can be found in GZA Invoice Numbers 0658706; 0661655; 0662614; 0664446; 0665549; and 0667450.

Division 2-17, page 2

- b. Maintenance was performed on the boom in the Providence River on August 2, 2012; November 20, 2012 and February 12, 2013 at a cost of \$19,011.18. Costs incurred by GZA for oversight of the boom replacement totaled \$1,285.85. The remaining \$17,725.33 was for Clean Harbors Environmental Services, Inc. to remove and replace the existing boom and fully replace the outer hard boom.
- c. A copy of the following reports, studies and evaluations relating to the 642 Allens Ave MGP site provided to National Grid during the nine months ended 3/31/13 are included as Attachment DIV 2-17c. Due to the voluminous nature of this document, the Company is providing this attachment on CD-ROM:
- *Review of Environmental Conditions - CNG Fueling Station –642 Allens Avenue, Providence, RI* by GZA GeoEnvironmental, Inc., dated August 1, 2012.
 - *Material Handling Area (MHA) Stockpile Summary, 642 Allens Avenue, Providence, RI* by GZA GeoEnvironmental, Inc., dated August 1, 2012.
 - *September 2012 Soil Management Plan (SMP) for 642 Allens Avenue, Providence, RI* by GZA GeoEnvironmental, Inc., dated September 12, 2012.
 - *Groundwater Monitoring Report detailing the July and August 2011 Activities for the Site for 642 Allens Avenue, Providence, RI* by GZA GeoEnvironmental, Inc., dated September 13, 2012.
 - *Review of Environmental Conditions – Hoxie Run gas line installation* by GZA GeoEnvironmental, Inc., dated January 15, 2013.
 - *Summary of September 2012 Sinkhole Repair at the LNG Facility* by GZA GeoEnvironmental, Inc., dated February 14, 2013.
 - *Letter to Accompany SMP – CNG Fueling Station Upgrades* by GZA GeoEnvironmental, Inc., dated February 25, 2013.
 - *Request for RIPDES Remediation General Permit – Construction Dewatering –* by GZA GeoEnvironmental, Inc., dated March 13, 2013.
 - *Request for RIPDES Remediation General Permit – Construction Dewatering – Additional Required Documents* by GZA GeoEnvironmental, Inc., dated March 18, 2013.

A copy of the below video survey can be provided upon request.

- *642 Allens Avenue, Providence, RI – CCTV video inspection, air test/grout seal & manhole rehabilitation of the storm drain collection system* by Inland Waters, dated, July 31, 2012.

Division 2-17, page 3

- d. The supporting invoices for all consulting work performed during the nine months ended 03/31/2013 are included in Attachment DIV 2-17d. The information requested above in Division 2-17d (1) through (4) is included in the attached invoices. A GZA invoice dated July 14, 2011 mischarged to 170 Allens Avenue during the previous reporting year was moved to this project during the nine months ended 3/31/13; however this invoice data was not included in response (a.) since the invoice was for work performed during a previous reporting year.

Division 2-18

Request:

Re: Project B, 170 Allens Avenue, please provide:

- a. A description of each legal matter associated with obtaining access to adjacent properties and easement with the City of Providence in order to perform the upland remedy and the current status of each identified legal matter.
- b. A complete copy of the contract or agreement under which fees for rental of dock facilities have been received;
- c. A copy of each monthly progress report provided to RIDEM during the nine months ended 3/31/13;
- d. Supporting invoices for all consulting work performed during the nine months ended 03/31/2013 showing:
 - i. Dates services were provided,
 - ii. Hours worked by consultants or attorneys,
 - iii. Hourly rates, and
 - iv. Detail of other expenses billed by consultants or attorneys.

Response:

- a. The Narragansett Electric Company (TNEC) retained Hinckley Allen to obtain access to several properties so that the remediation of the 170 Allens Avenue site could proceed under the Rhode Island Department of Environmental Management's (RIDEM's) remedial approval.

For Lot 325, which is part of the remediation "site" and owned by Ms. Gail Conley, Hinckley Allen provided notice to Ms. Conley's attorney, Dr. Patrick Conley, under the 2006 Access Agreement governing work on Lot 325 so that work could proceed. There were no other legal issues involved with access to Lot 325 other than providing such notice.

Division 2-18, page 2

Access to Lot 361, which is owned by Sims Metal Management (SMM) and is not part of the remediation site, was also necessary to perform the RIDEM approved remedial work. Hinckley Allen engaged in protracted negotiations with SMM during the subject period in order to obtain such access. After months of negotiations, an access agreement between TNEC and SMM was executed in July of 2013.

Access to Public Street was also required to perform the remediation. An easement was required as part of the access. The preparation of the easement was partially performed during the subject period. For the easement in Public Street, Hinckley Allen presented a petition to the City of Providence to obtain the easement so that remediation work could be done within Public Street and manholes added to the drainage system within the street. As part of this process, Hinckley Allen presented the need for and requirements of the easement, as well as the remediation plan, on two separate occasions to the Providence Public Works Committee and then appeared at City Council meetings where the easement was addressed. The Public Works Committee made a positive recommendation to the City Council for approval of the easement, and the City Council unanimously approved the easement in July 2013. During the process, Hinckley Allen worked with and facilitated an amended appraisal of the easement, which includes temporary and permanent aspects, that resulted in a much lower easement cost to TNEC.

- b. A complete copy of the license agreement between TNEC and American Cruise Lines, Inc. dated May 15, 2012 is provided as Attachment DIV 2-18b.
- c. Monthly progress reports provided to RIDEM between July 1, 2012 and March 31, 2013 are provided in Attachment DIV 2-18c. Please note that there was not a monthly progress report submitted for the month of September 2012.
- d. Consultant invoices for work performed during the nine months ended 03/31/2013 are included as Attachment DIV 2-18d. The invoices provide the information requested in 2-18d (1) through (4). Due to the voluminous nature of these documents, this attachment is being provided on CD-ROM. Please note that certain information contained in the EECS, Inc. invoices relates to projects other than the 170 Allens Ave project. The information unrelated to the 170 Allens Ave project has been redacted.

Division 2-19

Request:

Re: Project D, Pawtucket (Tidewater) MGP, please provide:

- a. Supporting invoices for all consulting work performed during the nine months ended 3/31/13 showing:
 - i. Dates services were provided,
 - ii. Hours worked by consultants,
 - iii. Hourly rates, and
 - iv. Detail of other expenses billed by consultants.
- b. A copy of each written report, study, evaluation, assessment relating to the Pawtucket (Tidewater) site provided to National Grid during the nine months ended 03/31/2013.

Response:

- a. The supporting invoices for all consulting work performed during the nine months ended 03/31/2013 are included in Attachment DIV 2-19a. The information requested above in Division 2-19a (i) through (iv) is included in the attached invoices. Due to the voluminous nature of these files, these attachments are being provided on CD-ROM. Please note that the Company has redacted certain invoices sent from a contractor to the Company's attorney that contain descriptions of work performed for the attorney because they are privileged attorney work product.
- b. A copy of the following reports, studies, evaluations and assessments relating to the Pawtucket (Tidewater) site provided to National Grid during the nine months ended 03/31/2013 are included in Attachments DIV 2-19b (1 of 3), DIV 2-19b (2 of 3) and DIV 2-19b (3 of 3). Due to the voluminous nature of these files, these attachments are being provided on CD-ROM.
 - *Biweekly Status Reports (June 25, 2012 through December 7, 2012)*
 - *Weekly Status Reports (December 10, 2012 through March 28, 2013)*
 - *Monthly Status Reports (July 2012 through March 2013)*
 - *Weekly Air Monitoring Data (December 17, 2012 through March 8, 2013; no data (no work performed) for weeks ending February 1, 15, and 22, 2013)*
 - *Other Reports and Evaluations:*

Re: Project F, PCB Regulated Pipe Abandonment, please provide:

- a. Documentation of the specific Construction/Disposal/Removal work performed for the nine months ended 3/31/13 as well as the date(s) on which each Construction/Disposal/Removal activity was performed, and identification of the sites at which Construction/Disposal/Removal activities occurred;
- b. Detail the costs of each Construction/Disposal/Removal activity performed the project costs incurred during the nine months ended 3/31/13; and
- c. The data and analyses relied upon to support the Company's assessment that "the costs this past period were similar to those incurred in the past fiscal year."

Response:

- a. The PCB Regulated Pipe Abandonment project tracks costs associated with the removal of gas pipe from throughout the RI gas system, as well as in-place PCB testing of our pipe as required by the U.S. Environmental Protection Agency. As the pipe is removed, the pipe material is brought to a Company facility where the materials are then consolidated, transported off site and decontaminated. Any associated condensate and drip water are removed from the field and disposed of by a licensed Hazardous Waste Transporter. The costs included in this project relate to the PCB testing, decontamination and transport of these materials. Please see Attachment DIV 2-20b for details on the dates, activity and location associated with the charges for this project.
- b. The detail of the costs associated with the Construction/Disposal/Removal activity incurred during the nine months ended 03/31/2013 are shown in Attachment DIV 2-20b.
- c. The costs for the PCB Regulated Pipe Abandonment project for the twelve-month periods ending June 30, 2012 and June 30, 2011 were \$122,057 and \$113,045, respectively. The costs for the PCB Regulated Pipe Abandonment project for the nine-month period ending March 31, 2013 were \$82,656 (which scaled to twelve months is \$110,208). The Company relied upon the cost data for the past three reporting periods which were within approximately 10% of each other.

Division 2-21

Request:

Re: Project K, Thames & Wellington, Newport, please provide

- a. Supporting invoices for all consulting work performed during the nine months ended 3/31/13 showing:
 - i. The specific services provided and the activity to which the services were related (e.g., Supplemental Site Investigation Work Plan, CRMC permitting, pilot study of the effectiveness of an oxygen release compound, groundwater monitoring, NAPL gauging, Short-Term Response Action Completion Reports, Remedial Alternative Evaluation Report),
 - ii. Dates services were provided,
 - iii. Hours worked by consultants,
 - iv. Hourly rates, and
 - v. Detail of other expenses billed by consultants;
- b. Detail documenting all environmental costs paid to the property owner; and
- c. Detail of all cost items included in Property Purchases/Settlements/Legal.

Response:

- a. Supporting invoices for all consulting work performed during the nine months ended 03/31/2013 are included as Attachment DIV 2-21a. The information requested above in Division 2-21a (ii) through (v) is included in Attachment DIV 2-21a. While the Company requires that the consultant invoices include a breakdown of tasks, that breakdown is not at the level of detail that is requested in Division 2-21a (i) of this data request. Thus, in an attempt to respond to this data request, it was necessary for the Company to ask its consultants to review daily timesheets for each person working on this project to produce the information contained in Attachment DIV 2-21a(i). Due to the voluminous nature of the document, the attachment is being provided on CD-ROM.

Division 2-21, page 2

- b. National Grid has not paid any environmental costs to the property owner during this reporting period (July 1, 2012 through March 31, 2013).
- c. No property purchases or settlements were made during the nine months ended 03/31/2013. Legal fees in the amount of \$25,216.31 were paid to Hinckley, Allen & Snyder LLP ("Hinckley Allen") during the nine months ended 03/31/2013. The remaining \$10,913.32 in cost items included in the Property Purchases/Settlements/Legal category were fees paid for research assistance for Hinckley Allen.

Re: Thames Street MGP Project
Newport, Rhode Island
MSA Purchase Order No. 0000102633
Work Authorization #GZA-7027-01
Change Notice #GZA-7027-01 through GZA-7027-01-12
GZA GeoEnvironmental, Inc. Invoice No. 0658811
Invoice for Billings from April 28, 2012 through July 31, 2012

Dear Ms. Schuelke:

Please find the attached Invoice No. 0658811 in the amount of \$52,984.03 for consulting services performed by GZA GeoEnvironmental, Inc. (GZA) associated with the Thames Street MGP project in Newport, Rhode Island. This represents the 45th invoice submitted in accordance with GZA's Proposal for Services dated October 2, 2007 (MSA Purchase Order No. 0000102633, Work Authorization GZA-7027-01, and Change Notices 7027-01-01 through 7027-01-12). It covers services performed by GZA between April 28, 2012 and July 31, 2012.

The following summarizes the work performed by task during this invoicing period. The attached Table A presents a breakdown of budgets, change notice amounts, billed to date amounts and percent complete by task.

Task 2.00 Meeting/Conference Calls

- General project management, coordination and administration;
- Site access agreement modifications;
- Project meetings; and
- Reproduction fees.

Task 4.00 Routine Site Monitoring

- Monthly piezometric groundwater gauging and elevator pit inspections;
- Supplemental piezometric groundwater gauging and elevator pit inspections, following rain events which generate precipitation depths of 1 inch or greater;
- Meeting with NGrid and Wellington to discuss tennis court upgrades and construction scheduling;
- Response associated with sheen observations related to drilling activities. GZA's response included field inspections, field documentation, correspondence with NGrid and the Wellington and boom maintenance;
- Waste drum inventory and management for off site disposal;

- Review of Rhode Island Fire Codes for fire hydrant spacing requirements and geometric specifications;
- Sheen characterization laboratory analysis;
- Project management; and
- Travel and reproduction expenses.

Task 20.00 Remedial Alternative Evaluation

- Prepared and submitted an Executive Summary of the Remedial Alternative Evaluation (RAE) to the Wellington;
- Review of a Method 3 Risk Assessment;
- Sediment investigation review;
- Project management and administration; and
- Reproduction fees.

Task 21.00 Supplemental Site Investigation

- Preparation and submittal of Supplemental Site Investigation Work Plan and associated Coastal Resources Management Council (CRMC) permit for MW-202 / MW-307 Area;
- Correspondence with CRMC to obtain permit to perform subsurface investigations within MW-202 / MW-307 Area;
- Perform drilling activities, field oversight and project management for four NAPL recovery wells located within the MW-202/MW-307 Area (MW-401, 402, 403 & 404);
- Field data reduction and figure updates to incorporate new well locations within the MW-202 / MW-307 Area;
- Initial sheen response during drilling activities;
- Waste drum inventory for offsite disposal;
- Project management and communications with HEI;
- Drilling fee (Geosearch); CRMC permitting fee and field monitoring equipment rental; and
- Travel and reproduction expenses.

Task 24.00 Remedial Pilot Testing – Former Gas Holder

- Performed second round of groundwater sampling on eight wells, located down gradient of the ORC pilot test area;
- Second round of laboratory analysis for groundwater monitoring (ESS Laboratory);
- Purchase of ORC socks (additional balance);
- Field monitoring equipment rental;
- Data reduction; and
- Project management and travel expenses.

Task 25.00 Regulatory Submittals

- Preparation of the RIDEM Monthly Project Status Reports for April, May, June and July; and
- Soil Management Plan and ELUR correspondence.

National Grid
File No. 03.0033327.00

August 14, 2012
Page 3

Task 26.00 Soil Cap Remediation

- Project management and correspondence with NGRID and TFord to start soil cap remedial construction activities;
- Soil cap landscaping review and landscape warrantee replacements and field inspections;
- Field oversight and documentation of soil cap remedial and restoration activities; and
- Laboratory analysis associated with imported cap soil characterization and confirmatory analysis (ESS Laboratory).

We appreciate the opportunity to assist National Grid with this project. If you have any questions on project costs or status, please feel free to call Todd Greene at (401) 421-4140 ext. 2714 or email at tgreene@gza.com.

Very truly yours,

GZA GEOENVIRONMENTAL, INC.

[CUSTOMER SERVICE](#) [CATALOG HOME](#) [SIGN-UP](#) [MY PROFILE](#)

Thank you for your order. This message is to confirm the order you placed at NFPA's Online catalog. Pending credit card verification, your credit card will be charged for any inventoried products at the time they are shipped from our warehouse. At that time, if you requested rush (expedited) or international delivery of your order, those charges will be added to the final cost. NFPA will work to get you the lowest rate possible.

Your credit card will not be charged until the PDF file ordered is available. If the PDF file is not available immediately, you will be notified by email when the PDF has been placed in your NFPA online profile and is ready for download. Click on the following link to see downloading instructions for your PDF.

INSTRUCTIONS

To submit a request for modification of assent, the following must be submitted:

- ** Filing fee.** This will cover review of the proposed modification assuming that it can be processed without a new application. If a new application is required, you will be notified in writing.
 - a. Single family residence where no Public Hearing is necessary = **\$100.00**
 - b. All others shall be charged the appropriate application fee using EPC formula, or ~~\$250.00~~ whichever is greater.
- ** One copy of the CRMC Assent.**
- ** Four (4) copies of this form, signed by the owner.** (A potential purchaser may sign the request only if a copy of a valid sales agreement is provided.)
- ** If the request is by a new owner (not the original applicant), a letter from the local tax assessor stating ownership of the property must be submitted.**
- ** Four (4) copies of the proposed modified plans and/or specifications.** Be sure to include the appropriate revision notations and revision dates. Note that for plans and/or specifications originally bearing the stamp of a design professional (reg. engineer, reg. architect, reg. land surveyor, etc.), the revised plans must also be stamped, signed, and dated by a design professional, unless stamp is specifically not required by this office.
- ** Copy(s) of revised approval(s) of other pertinent regulatory authorities, such as local building official, DEM, etc.**

Mail the above information to:

CRMC ASSENT MODIFICATION REQUEST FORM

File Number of Assent/Permit: A2011-10-069 Expiration date (including extensions): July 1, 2016

Name which Assent was issued to: Wellington Condominium Association

Location of Project: Corner of Thames St. and Wellington Ave.

City/Town Newport Plat: 35 Lot: 204

Present Owner: Wellington Condominium Association

Mailing Address: 551 Thames Street

State: Newport, Rhode Island Zip Code: 02840

Phone No. Bus: 401-241-7100 Home: N/A Contact Person: Todd Greene

Phone No.: 401-421-4140

Abutters: See attached list

I hereby certify that the names and addresses of adjacent property owners whose property adjoins the project site are accurate and current as of the date of application. If said names and addresses are found to be not accurate and/or current, any subsequent Assent may become Null and Void. Signed: _____

Describe the proposed modification(s), including the reasons for change: Modification:
Installation of four (4) additional groundwater monitoring wells. Identified as MW-401 through MW-404 on attached Figure 9.

Reason: Further investigation of subsurface conditions.

What state of construction is project in? Environmental site investigation and remedial activities are on-going in accordance with the RIDEM Remediation Regulations

Sharon M Campbell
Owner's Signature

Note: The applicant acknowledges by evidence of their signature that they have reviewed the Rhode Island Coastal Resources Management Program, and have, where possible adhered to the policies and standards of the program. The applicant also acknowledges by evidence of their signature that to the best of their knowledge the information contained in the application is true and valid. The filing of false information can result in the Coastal Resources Management Council revoking State Assent. Applicant requires that as a condition to the granting of this assent, members of the CRMC or its staff shall be access to the applicant's property to make on-site inspections to insure compliance with the assent. This application is made under oath and subject to penalties of perjury. 5/00

Re: Thames Street MGP Project
Newport, Rhode Island
MSA Purchase Order No. 0000102633
Work Authorization #GZA-7027-01
Change Notice #GZA-7027-01 through GZA-7027-01-13
GZA GeoEnvironmental, Inc. Invoice No. 0659954
Invoice for Billings from August 1, 2012 through August 31, 2012

Dear Ms. Schuelke:

Please find the attached Invoice No. 0659954 in the amount of \$6,538.08 for consulting services performed by GZA GeoEnvironmental, Inc. (GZA) associated with the Thames Street MGP project in Newport, Rhode Island. This represents the 46th invoice submitted in accordance with GZA's Proposal for Services dated October 2, 2007 (MSA Purchase Order No. 0000102633, Work Authorization GZA-7027-01, and Change Notices 7027-01-01 through 7027-01-13). It covers services performed by GZA between August 1, 2012 and August 31, 2012.

The following summarizes the work performed by task during this invoicing period. The attached Table A presents a breakdown of budgets, change notice amounts, billed to date amounts and percent complete by task.

Task 2.00 Meeting/Conference Calls

- General project management, coordination and administration;
- Site access agreement modifications; and
- Reproduction fees.

Task 20.00 Remedial Alternative Evaluation

- Sediment investigation review and evaluation;
- Meeting with RIDEM to present the findings of the sediment investigation;
- Sediment consultant fee (Anchor QEA); and
- Travel fees.

Task 25.00 Regulatory Submittals

- Preparation of the RIDEM Monthly Project Status Reports for August 2012.

We appreciate the opportunity to assist National Grid with this project. If you have any questions on project costs or status, please feel free to call Todd Greene at (401) 421-4140 ext. 2714 or email at tgreene@gza.com.

Very truly yours,

GZA GEOENVIRONMENTAL, INC.

Todd Greene, PE
Senior Project Manager

Re: Newport Harbor MGP - RI
Anchor QEA, LLC. Invoice No. 30716
Invoice for Billings through July 31, 2012
Project Number: 120645-01.01

Dear Jim:

Please find attached Anchor QEA invoice for the period through July 31, 2012 for the Newport Harbor portion of the former Newport Manufactured Gas Plant (MGP) site. During this period our services provided to GZA GeoEnvironmental, Inc. (GZA) consisted of the following:

Task 1 Data Evaluation and Bathymetric Comparison

- Participated in a project team meeting in Providence, Rhode Island to discuss status of project and proposed presentation to representatives from the Rhode Island Department of Environmental Management (RIDEM).
- Conducted online research regarding available bathymetric information in the vicinity of the Site to assess sedimentation rates.

A brief budget summary has been prepared and is attached to this letter.

Jim Clark
August 20, 2012
Page 2

We appreciate the opportunity to work on this project with GZA. Please call me if you have any questions.

Sincerely,

Billie Jo Thibault

Re: Thames Street MGP Project
Newport, Rhode Island
MSA Purchase Order No. 0000102633
Work Authorization #GZA-7027-01
Change Notice #GZA-7027-01 through GZA-7027-01-13
GZA GeoEnvironmental, Inc. Invoice No. 0663955
Invoice for Billings from September 1, 2012 through November 30, 2012

Dear Ms. Schuelke:

Please find the attached Invoice No. 0663955 in the amount of \$59,762.87 for consulting services performed by GZA GeoEnvironmental, Inc. (GZA) associated with the Thames Street MGP project in Newport, Rhode Island. This represents the 47th invoice submitted in accordance with GZA's Proposal for Services dated October 2, 2007 (MSA Purchase Order No. 0000102633, Work Authorization GZA-7027-01, and Change Notices 7027-01-01 through 7027-01-13). It covers services performed by GZA between September 1, 2012 and November 30, 2012.

The following summarizes the work performed by task during this invoicing period. The attached Table A presents a breakdown of budgets, change notice amounts, billed to date amounts and percent complete by task.

Task 2.00 Meeting/Conference Calls

- General project management, coordination and administration;
- Site access agreement modifications;
- Response for project financial summary for NGrid internal audits; and
- Reproduction fees.

Task 4.00 Routine Site Monitoring

- Labor associated with product recovery at monitoring wells, MW-202, MW-307 and MW-324;
- Stormwater outfall sheen monitoring;
- Annual soil cap inspection;
- Completed the annual groundwater sampling round which included the third groundwater monitoring round associated with the ORC pilot test;
- Performed soil gas survey around Buildings A through E, the Club House and pile supported condominium building entrances constructed with slab-on-grade foundations;
- Groundwater laboratory analysis;

National Grid
File No. 03.0033327.00

December 14, 2012
Page 2

- Data reduction;
- Piezometric groundwater gauging;
- Project management; and
- Travel, equipment rental, laboratory analysis and reproduction expenses.

Task 20.00 Remedial Alternative Evaluation

- Conference calls and correspondence with project team;
- Sediment response memorandum preparation and submittal to RIDEM;
- Sediment consultant fee (Anchor QEA); and
- Travel fees.

Task 25.00 Regulatory Submittals

- Preparation of the RIDEM Monthly Project Status Reports for August, September and October 2012.

We appreciate the opportunity to assist National Grid with this project. If you have any questions on project costs or status, please feel free to call Todd Greene at (401) 421-4140 ext. 2714 or email at tgreene@gza.com.

Very truly yours,

GZA GEOENVIRONMENTAL, INC.

Re: Newport Harbor MGP - RI
Anchor QEA, LLC. Invoice No. 31182
Invoice for Billings through August 31, 2012
Project Number: 120645-01.01

33327.00
Task 20
\$5,036.75 (48)

Dear Jim:

Please find attached Anchor QEA invoice for the period through August 31, 2012 for the Newport Harbor portion of the former Newport Manufactured Gas Plant (MGP) site. During this period our services provided to GZA GeoEnvironmental, Inc. (GZA) consisted of the following:

Task 1 Data Evaluation and Bathymetric Comparison

- Conducted online research regarding available bathymetric information in the vicinity of the site to assess sedimentation rates and historic water depths.
- Drafted and finalized a sediment investigation summary presentation for an August 21, 2012 meeting with RIDEM to facilitate discussion regarding the offshore portion of the Newport MGP site.
- Administrative tasks.

A brief budget summary has been prepared and is attached to this letter.

Jim Clark
September 24, 2012

Dear Jim:

Please find attached Anchor QEA invoice for the period through September 30, 2012 for the Newport Harbor portion of the former Newport Manufactured Gas Plant (MGP) site. During this period our services provided to GZA GeoEnvironmental, Inc. (GZA) consisted of the following:

Task 1 Data Evaluation and Bathymetric Comparison

- Drafted a response to comments submitted by the Rhode Island Department of Environmental Management (RIDEM) following the August 21, 2012 meeting.
 - Compared concentrations of polycyclic aromatic hydrocarbons and metals to Effects Range-Low (ERL) and Effects Range-Median (ERM) concentrations.
 - Calculated theoretical dredge volumes associated with removal of sediment exceeding ERL and ERM concentrations.
- Administrative tasks.

A brief budget summary has been prepared and is attached to this letter.

Jim Clark
October 18, 2012

Re: Newport Harbor MGP - RI
Anchor QEA, LLC. Invoice No. 32132
Invoice for Billings through November 30, 2012
Project Number: 120645-01.01

(51)

Dear Jim:

Please find attached Anchor QEA invoice for the period through November 30, 2012 for the Newport Harbor portion of the former Newport Manufactured Gas Plant (MGP) site. During this period our services provided to GZA GeoEnvironmental, Inc. (GZA) consisted of the following:

Task 2 Regulatory Response Support

- Drafted a response memo to comments submitted by the Rhode Island Department of Environmental Management (RIDEM) following the August 21, 2012 meeting.
 - Revised theoretical dredge volumes associated with removal of sediment exceeding ERL and ERM concentrations.
 - Developed draft costs for potential risk assessment and bathymetric study options
 - Compile available data for metals concentrations in sediment in Narragansett Bay
- Participated in two project team meetings to discuss response memo contents

December 14, 2012

Page 2

-
- Finalized memo and submitted to GZA for submittal to RIDEM
 - Administrative tasks.

A brief budget summary has been prepared and is attached to this letter.

We appreciate the opportunity to work on this project with GZA. Please call me if you have any questions.

Sincerely,

Billie Jo Thibault

Work Authorization #GZA-7027-01
Change Notice #GZA-7027-01 through GZA-7027-01-13
GZA GeoEnvironmental, Inc. Invoice No. 0665669
Invoice for Billings from December 1, 2012 through January 7, 2013

Dear Ms. Schuelke:

Please find the attached Invoice No. 0665669 in the amount of \$18,112.72 for consulting services performed by GZA GeoEnvironmental, Inc. (GZA) associated with the Thames Street MGP project in Newport, Rhode Island. This represents the 48th invoice submitted in accordance with GZA's Proposal for Services dated October 2, 2007 (MSA Purchase Order No. 0000102633, Work Authorization GZA-7027-01, Change Notices 7027-01-01 through 7027-01-13 and NGrid Purchase Order No. 3200006387). It covers services performed by GZA between December 1, 2012 and January 7, 2013.

The following summarizes the work performed by task during this invoicing period. The attached Table A presents a breakdown of budgets, change notice amounts, billed to date amounts and percent complete by task.

Task 2.00 Meeting/Conference Calls

- General project management, coordination and administration; and
- Reproduction fees.

Task 4.00 Routine Site Monitoring

- Data reduction associated with the annual environmental monitoring program performed in November 2012;
- Preparation of the draft Annual Environmental Monitoring Report;
- Project management; and
- Travel, equipment rental, laboratory analysis and reproduction expenses.

Task 24.00 Gas Holder Area Pilot Testing

- ORC pilot test groundwater data reduction; and

National Grid
File No. 03.0033327.00

January 28, 2013
Page 2

- Preparation of ORC pilot test result summary for insertion into the Annual Environmental Monitoring Report.

Task 25.00 Regulatory Submittals

- Preparation of the RIDEM Monthly Project Status Reports for November and December 2012; and
- Soil cap inspection summary write-up.

We appreciate the opportunity to assist National Grid with this project. If you have any questions on project costs or status, please feel free to call Todd Greene at (401) 421-4140 ext. 2714 or email at tgreene@gza.com.

Very truly yours,

GZA GEOENVIRONMENTAL, INC.

Re: Thames Street MGP Project
Newport, Rhode Island
NGrid Purchase Order No.: 3200006387
Work Authorization #GZA-7027-01
Change Notice #GZA-7027-01 through GZA-7027-01-14
GZA GeoEnvironmental, Inc. Invoice No. 0667552
Invoice for Billings from January 8, 2013 through March 1, 2013

Dear Ms. Schuelke:

Please find the attached Invoice No. 0667552 in the amount of \$8,295.00 for consulting services performed by GZA GeoEnvironmental, Inc. (GZA) associated with the Thames Street MGP project in Newport, Rhode Island. This represents the 49th invoice submitted in accordance with GZA's Proposal for Services dated October 2, 2007 (Purchase Order No. 3200006387, Work Authorization GZA-7027-01, and Change Notices 7027-01-01 through 7027-01-14). It covers services performed by GZA between January 8, 2013 and March 1, 2013.

The following summarizes the work performed by task during this invoicing period. The attached Table A presents a breakdown of budgets, change notice amounts, billed to date amounts and percent complete by task.

Task 2.00 Meeting/Conference Calls

- General project management, coordination and administration;
- Conference calls;
- Preparation of scope of work and field activity schedule for the site access agreement; and
- Reproduction fees.

Task 4.00 Routine Site Monitoring

- Preparation of the draft Annual Environmental Monitoring Report;
- Project management; and
- Reproduction expenses.

Task 24.00 Gas Holder Area Pilot Testing

- ORC sock waste profile and disposal correspondence with Clean Harbors and NGrid.

National Grid
File No. 03.0033327.00

March 19, 2013
Page 2

Task 25.00 Regulatory Submittals

- Preparation of the RIDEM Monthly Project Status Reports for December 2012 and January 2013.

We appreciate the opportunity to assist National Grid with this project. If you have any questions on project costs or status, please feel free to call Todd Greene at (401) 421-4140 ext. 2714 or email at tgreene@gza.com.

Very truly yours,

GZA GEOENVIRONMENTAL, INC.

A handwritten signature in black ink that reads 'Todd Greene'.

Division 2-24

Request:

Re: Project N, Insurance Recovery Activities, please provide:

- a. A detailed itemization of the Property Purchase/Settlements/Legal costs incurred during the nine months ended March 31, 2013;
- b. A copy of each insurance settlement signed within the nine months ended March 31, 2013;
- c. Identify all insurance recovery within the nine months ended March 31, 2013;

Response:

- a. A list of the Property Purchase/Settlements/Legal costs incurred during the nine months ended March 31, 2013 is included in Attachment DIV 2-24a.
- b. No insurance settlements were signed within the nine months ended March 31, 2013.
- c. No insurance recoveries were received within the nine months ended March 31, 2013. Although we have not yet received any monetary recovery in the last nine months, we have completed three trials with favorable results for all three. Procedurally, the insurance recovery case is ready for appeal, which should proceed shortly.

Division Request 2-24a

Notes:

1. The above referenced credit was the correction of a reporting year 2012 mischarge.

Division 1-15

Request:

Referring to Richer testimony, page 4, lines 15-18, what is the Company's present estimate of when the referenced information will be available?

Response:

The completion of the Gas Earnings Sharing Mechanism (ESM) for the period ended March 31, 2013 is contingent on completion of the Company's FERC Form 3-Q for the quarter ended March 31, 2013. The Company has sought an extension to October 28, 2013 for filing this report. The Company plans to submit the ESM shortly after the FERC Form 3-Q is completed.

Division 1-16

Request:

Referring to Richer testimony, page 7, lines 1-3, please provide the following:

- a. costs incurred to date associated with rectifying the problems related to implementation of the new financial system
- b. an estimate of costs expected to be incurred prospectively to rectify problems related to implementation of the new financial system
- c. a description of how the Company is accounting for the costs identified in parts a and b.

Response:

Background

By way of background and context, since the KeySpan merger in 2007, National Grid had been operating two financial accounting systems (Oracle and PeopleSoft). In late September 2012, National Grid began implementing a business change program, which included a system conversion to consolidate these two systems onto a single Enterprise Resource Planning ("ERP") platform and create a single set of processes to support the US business ("SAP" or the "US Foundation Program"). The primary objective of the US Foundation Program was the integration of National Grid's Human Resources ("HR"), Supply Chain, and Finance (Back Office/ERP) information technology platforms and business processes.

National Grid launched the majority of SAP applications on November 5, 2012. As discussed in the Company's April 10, 2013 response to the Division's letter dated March 11, 2013, a copy of which was provided to the Commission, the Company experienced significant implementation difficulties. Despite progress, the Company has continued to face implementation difficulties since the letter of April 10 was filed.

Costs Incurred to Date and Accounting

The costs incurred to date are set forth below, along with associated accounting. These costs are all-inclusive, and not limited to costs that relate solely to fixing design flaws. They include initial capital costs associated with system design, training, costs incurred in performing transactional work to correct data entry issues, employee support costs, process improvements, improving controls,

Division 1-16, page 2

costs of fixing root causes, and costs incurred to implement processes outside of the system to process payroll and prepare financial reports, among other related stabilization costs.

O&M costs associated with stabilization activities will be borne by shareholders and, thus, not recovered from customers. Whether the Company would seek recovery of any capitalized costs above the amounts currently reflected in rates will be determined after project completion and an appropriate accounting evaluation, taking into account prevailing ratemaking rules.

Inception to November 5, 2012

National Grid spent approximately \$360 million to design, build, test and launch the US Foundation Program. Those costs were incurred from inception to approximately November 5, 2012 when the system was largely launched. Those costs were accounted for as follows:

Operation and Maintenance Expense	Capital Expenditures
\$128.0 million	\$231.6 million was capitalized at National Grid USA Service Company, Inc. ("Service Company")

None of the operation and maintenance ("O&M") costs were included in Narragansett Electric ("Narragansett") rates charged to electric and gas customers. The amount of SAP costs that was assumed would be capitalized in Narragansett's last rate case in Docket No. 4323 was \$273.4 million. Although this amount is higher than the \$231.6 million actually capitalized as of the system implementation date, the Company has incurred additional amounts of capitalized costs as described below. Because the SAP system has been capitalized by the Service Company, Narragansett is charged a rental fee by the Service Company for an allocated share of the associated revenue requirement of the system. Narragansett's share of the annual revenue requirement of the assumed capitalized amount of \$273.4 million is \$2.6 million and \$1.1 million for electric and gas, respectively, as approved in Docket No. 4323.

Division 1-16, page 3

November 2012 through March 31, 2013

From November 2012 through March 31, 2013, National Grid incurred additional costs of approximately \$132.8 million. Those costs were accounted for as follows:

Operation and Maintenance Expense	Capital Expenditures
\$90.4 million was charged to the parent company, National Grid USA	\$42.4 million was capitalized at the Service Company

Through March 31, 2013, \$274.0 million of costs were capitalized by the Service Company.

April 1, 2013 through July 2013

From April 1, 2013 through July 2013, National Grid has incurred approximately \$138.8 million all of which has been expensed.

Operation and Maintenance Expense	Capital Expenditures
\$138.8 million was charged to the parent company, National Grid USA	

Forecasting Future Expenditures

As evidenced by the cost incurrence to date, the difficulties encountered with resolving the US Foundation Program issues have been more than could have reasonably been contemplated. The Company has performed a review of the tasks it believes are needed to bring the system to an acceptable level of performance, but at this point the Company is not forecasting what the final total of stabilization costs is likely to be. As of today, National Grid is forecasting total expenditures for this fiscal year in the range of \$283 million to \$333 million (which range includes the \$138.8 million spent through July). However, the Company is developing a program of work for fiscal year 2014 at the lower end of the range. The Company expects stabilization efforts to continue into the next fiscal

Division 1-16, page 4

year. Throughout the remainder of this fiscal year, the Company will be reviewing the status of the stabilization efforts to determine what level of additional expenditure will be necessary.

Accounting for Forecasted Expenditures

National Grid anticipates that future O&M system stabilization expenses will be allocated and charged to the operating companies to a below-the-line account, subject to review at the end of the fiscal year. Any capitalized amounts will be recorded at the Service Company.
