**RE: Docket 4483 – Wind Energy Development, LLC (WED) and ACP Land, LLC  
Petition for Dispute Resolution Relating to Interconnection  
Compliance Filing**

Dear Ms. Massaro:

I have enclosed National Grid's<sup>1</sup> compliance filing in the above-referenced docket. At an open meeting on January 15, 2016, the PUC ordered that, within six months of the open meeting decision, National Grid shall report on the status of its review of the Division's recommendation to implement a publicly available website on which the Company's distribution generator interconnection queue for facilities over 15 kW can be reviewed by any interested party.

In considering the Division's recommendation, the Company has decided to follow the current process that is used by the Company's affiliate, Massachusetts Electric Company (MECO). Specifically, MECO posts a monthly report to its distributed generation (DG) website, which includes the following information regarding the current DG interconnection queue in Massachusetts: (1) Facility identification number; (2) Feeder number; (3) Project status; (4) Application type; (5) City/Town; (6) Date on which the Company received the customer's application; (7) Date on which the customer received the final approval to interconnect; (8) Name plate rating of the project; (9) Fuel type; (10) Date on which the Company receives the interconnection payment; and (11) Construction completion date.

As of July 15, 2016, the Company will post the enclosed report on its DG website to provide visibility of the current DG inventory in Rhode Island. The Company will update the report on the 15<sup>th</sup> of every month. This report includes the same information that is currently included in the reports posted to the MECO DG website.

---

<sup>1</sup>The Narragansett Electric Company d/b/a National Grid.
