Subject: [EXTERNAL] : Public comments on PPL/Narragansett Electric transfer

Dear members of the DPUC,

I am writing to you today to express my strong opposition to the proposed sale of national grid's Operations to the PA-based PPL company. This company has openly admitted that they are reserving the right to charge already overburdened ratepayers even more through rate hikes, to the tune of up to \$82 million. They have slim to Jack-zero experience with operating renewable energy operations and interconnection, nor have they presented a rational strategy for how their operations in Rhode Island are in keeping with the new emissions target, which under legally-binding under the new Act on Climate law passed last year. Those facts alone should disqualify this sale from your approval. I join many others writing these letters to urgently request that you do so. Thank You

Sincerely,

Jordan Goyette
